PHOENIX & AETNA

Insurance Companies,

OF HARTFORD, CONN.

Cash Assets, - - - \$5,459,013 85.

Annual Income, - - - \$4,500,000 00.

These sterling and time-honored Companies continue to do a legitimate Fire Insurance business, insuring on all classes of desirable risks, at rates consistent with solvency, and a fair New England profit, being uninfluenced by the tariffs of "combinations," or the ruinous rates of companies that, through ignorance of the actual cost of underwriting, or a lack of confidence in the quality of the indemnity furnished, are disposed to gamble away their assets in a suicidal competition with companies of sterling worth, inexhaustible resources and immense annual incomes, secured from small risks, scattered over the entire continent, making large losses impossible.

**Losses promptly adjusted by our Special Adjuster,
and paid in United States Gold Coin.**

The AETNA and PHOENIX are the only Companies doing business on this coast, that have fully commissioned agents at each prominent point, authorized to bind the Companies by the immediate issue of policies.

V. S. W. PARKHURST,

GENERAL AGENT FOR THE PACIFIC COAST.

305 MONTGOMERY STREET, N. W. Corner of Pine,

SAN FRANCISCO, CAL.

In introducing our Permutation Locks to the public, it is desired that Architects, Builders, Dealers, Committees on the erection of Buildings, and gentlemen erecting Private Residences, and others, should thoroughly understand the principle upon which they are constructed, together with a few of the many advantages they possess over all other locks heretofore made. We have published an illustrated catalogue, which will be furnished gratis on application to the Agent of the Pacific Coast. This catalogue illustrates the different sizes and styles, among which are Store Door Rim Dead Locks, Iron Door and Vault Locks, Mortise Dead Locks, Office Rim Dead Locks, Mortise Office Locks, Front Door Mortise Knob Locks, Mortise Knob and Catch Locks, Closet Locks, Drawer Locks, &c. Two Keys, with all the trimmings complete, go with each Lock.

OUR LOCKS DIFFER FROM ALL OTHERS, inasmuch as the lock conforms to the key in looking; whilst nothing but the precise combination and key, with which they are locked, will unlock them. With our Locks you have only to change the combination in the Key, and lock the door, in order to have a new lock whenever you desire.

OUR LOCKS ARE OPERATED WITH PERFECT SAFETY AND NO INCONVENIENCE.

OUR LOCKS ARE SAFER, with the Key thrown out of position and hung upon the door to which they belong, than any other common lock in use with the key in your pocket, with one of our ordinary locks upon your door; and the Key hung as above stated, it would require FIFTY-THREE HOURS AND FIFTEEN MINUTES to run the entire changes! Here is mechanism, and security for the Merchant and the Housekeeper. No False, Skeleton or Duplicate Keys operate on the Lock, and they make from 225 to 50,325 changes each, and vary in price from \$3.15 to \$15, according to size, style and finish.

SEND FOR A CATALOGUE.

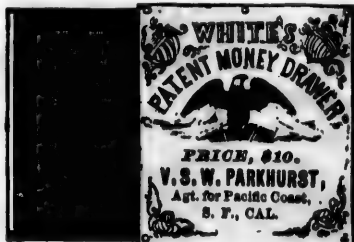

Our Locks took the first prize (a Silver Medal) at the Worcester, Mass., Fair the present year. The merits of our Locks have been indorsed by the Mechanics' Institute and State Agricultural Society of California, and by the best Mechanics on the Pacific Coast as well as elsewhere. Messrs. Kentner and Farquharson, (Architects for the Bank of California) say "they are superior in durability and security over any other manufacture." Messrs. S. H. Williams & Son, Architects, S. C. Bugbee & Son, Architects, William Patton, Architect, and others, have indorsed their merits, and their published testimony can be seen in our Catalogue.

People buy locks because they have the name of lock applied to them, supposing at the time they will protect whatever they secure with them, when, in fact, nine out of every ten sold are merely apologies for security, and may be opened by almost any skeleton key or bent wire. If you want a lock, buy a good one and one that will protect you, otherwise your money is expended to no purpose. And whenever you are in want of a lock always ask for the U. S. COMBINATION LOCK, and, if you purchase, you will have a lock superior to anything of the kind in the world, in point of durability, security, and excellence of workmanship.

For further particulars, and all matters appertaining to the business for the Pacific Coast, communications must be addressed to the Agent of the Company,

V. S. W. PARKHURST,

SAN FRANCISCO, CAL.

IMPORTANT INFORMATION

FOR

MERCHANTS, DEALERS, AND All Others who use Money Drawers.

To those who use a Money Drawer it is especially of importance, as it brings to their notice an invention whereby their money can be secure from the depredations of the light-fingered. In every community there is a class of people who pilfer Money Drawers from a natural or cultivated desire to take that which does not belong to them; to these especially is **WHITE'S PATENT THIEF-DETECTING MONEY DRAWER** a source of annoyance, as it baffles their skill, whilst to the merchant it is a guard of security in time of Danger. The usefulness of this Drawer is apparent when it is realized that there are boys of vicious tendencies whose habits are unknown to traders, who, when the proper time comes, empty a drawer of its contents, or abstract a valuable piece, and with an air of superciliousness cover up their theft by honest looks and assuming manners.

In a moral point of view the Money Drawer possesses a virtue by putting temptation beyond the reach of all classes of depredators on tills, thereby preventing crime, when it is known that a White's Thief-Detecting Drawer is in use, and saving, no doubt, to a would-be-thief, a moral character for life; for, by the experiences of State prisoners, in a majority of cases they have recorded their first acts of crime, when in youth, to the pilfering of their employer's drawer, or the drawer of some trader; and by frequent and dextrous methods in abstracting money, it becomes second nature to them, and in manhood it is carried on as a part of their vocation.

Those who possess one of White's Money Drawers are not only making themselves secure from the hand of the spoiler, but are rendering the commonwealth aid and support in preventing crime, and a community from the scandal that always follows in the wake of a dishonest act; therefore, it is the duty of every intelligent person to avail himself of the practical inventions of the age to aid and assist him in his avocations. Those who shove aside these useful inventions are the ones who suffer the most; they are continually telling over their grievances and losses, when, by a little forethought and the expenditure of a little money, their troubles would not have occurred.

In illustration of this latter class of people, I will mention an incident, which is one out of many occurring of like character: A San Francisco merchant, who in his general business is shrewd and intelligent, when asked to purchase one of White's Money Drawers, replied, he had got along without such appliances, and did not need it; a few days after his drawer was relieved of a large sum of money, and rather than run the risk of losing more money in so unceremonious a way, he immediately procured one of White's Thief-Detecting Drawers. Here is a perfect counterpart to the man who locked his stable door after his horses were stolen. Among the prudent and thoughtful business men on the Pacific coast who surround themselves with appliances of security from depredators, it is a notable fact that many of Wells, Fargo & Co.'s Agents are supplying themselves with White's Patent Thief-Detecting Money Drawers.

White's Patent Money Drawer took the First Premium (a Medal) at the U. S. Fair, at Cincinnati, and at New York, New Hampshire, California State Fair, and other Fairs wherever exhibited; and on the Pacific Coast, its merits have been fully attested and approved by the judges at all our exhibitions, and indorsed by some of the first houses who have them in use.

White's Money Drawers catch the rogues, and prevent any person opening the drawer except the ones who know the particular combination used, as there are numerous ways of setting it, and no one can detect it from a common drawer.

The regular manufactured size measures on the outside 16 in. front, 16 in. in length, and 8 in. deep on the inside. The front of the Drawer is made of black walnut, the rest of maple, and other wood of as durable a nature, and is dovetailed throughout. The cover of the Drawer is so arranged that it can be attached to the counter in a few minutes, and the Drawer ready for use.

The peculiarities of White's Money Drawer consist in its self-locking and self-adjusting principle—it is always ready to give the alarm. It has four bolts, by which sixteen different changes can be made. It can be locked by one, two, three, or all four of the bolts, thus making the Drawer perfectly secure. It is so arranged that thieves, by pulling any part of the Drawer, will raise the alarm. The lock is in the back part of the Drawer, leaving the front part free and clear for use. It has six sliding half-globe cups for change, designed for different pieces of money; separate apartments for greenbacks, and places to peek away silver, letters, bills, &c.

Another peculiarity in the Drawer is the stop-ketch, preventing the Drawer from coming entirely out, except at the option of the owner. **THE PRICE OF THE DRAWER IS TEN DOLLARS**, expense of transportation to be added; its weight is about twelve pounds. Extra sizes from the above specified size, to fit narrow counters, can be made; the measure must always be given from the outside. **WHITE'S THIEF-DETECTING MONEY DRAWER, DOUBLE SIZE, CONTAINING TWO LOCKS**; this Drawer is 21 inches wide, 16 in. in length, and 8 inches deep, inside, making a complication of combinations which are numbered on the front of the Drawer, making it easy to adjust. The Drawer is fitted up the same as the single size, with extra conveniences inside, and **THE PRICE IS TWENTY-FIVE DOLLARS**.

Among the large number of this Drawer that have been sold I have heard of no complaints in relation to it, and have many testimonials from parties who have purchased, speaking in the highest terms of its excellence. Send for Circular for further information.

V. S. W. PARKHURST,

Sole Proprietor of White's Patent Thief-Detecting Money Drawer for the Pacific Coast,

305 Montgomery Street, N. W. Cor. Pine, San Francisco, Cal.

U. S. SOLDIERS' BOUNTIES.

UNITED STATES AND STATE AGENCY,

(ESTABLISHED IN 1863)

FOR THE COLLECTION OF

BOUNTIES, PRIZE MONEY, CLAIMS, ETC.

BY A RECENT ACT OF CONGRESS.

Three Years' Volunteers, who enlisted between April 19th, 1861, and July 19th, 1864, and who have been discharged by reason of "expiration of term of service," for wounds received in the line of duty, (the breaking of an arm or leg, or hernia, is a wound) or by the ending of the war, if not less than two years' service, are entitled to \$100 additional bounty.

Those who have received more than \$100 bounty, by reenlistment or otherwise, are not entitled to the benefits of this Act.

Two Years' Volunteers, enlisting between the same dates and discharged for same reasons, are entitled to \$50 additional bounty.

Regulars, who enlisted between July 1st, 1861, and the above dates, discharged as per above, are entitled to \$100 additional bounty.

Send the Discharge in all cases. Claims WILL NOT be examined nor paid without it.

Those who have LOST, SOLD, or GIVEN AWAY their Discharges, cannot obtain bounties under this law.

Heirs of deceased soldiers, who died while in service, or after discharge, if in consequence of wounds or disease contracted while in the service, are entitled to the same bounties as living soldiers.

Volunteer Officers, below the rank of Brigadier-General, who were in service March 3d, 1865, and whose resignations were presented and accepted, or who were mustered out at their own request, or otherwise honorably discharged from the service after April 9th, 1865, are entitled to three months' pay proper.

Sailors and Marines are not included in the late Bounty Act; but, no doubt, justice will be done them at the next session of Congress, which meets December 3d, 1866, by putting them on the same footing with Soldiers.

Soldiers' and Sailors' Widows are entitled to \$3 per month additional pension for each child under 16 years of age.

Soldiers and Sailors, who have lost a HAND or FOOT, are entitled to \$7 per month additional pension, in all \$15. Those who have lost BOTH FEET, or ONE HAND and ONE FOOT, to an increase of \$12 per month, in all \$20. Those who have lost BOTH HANDS or BOTH EYES, and are helpless, an increase of \$17 per month, in all \$25.

Circulars containing full particulars and much valuable information will be forwarded wherever desired, upon the receipt of Wells, Fargo & Co.'s envelopes or postage stamps.

Soldiers', Sailors' and Marines'

BOUNTIES, PENSIONS,

Arrears of Pay, Prize Money,

And for the prosecution of all kinds of

CLAIMS AGAINST THE UNITED STATES.

HEIRS, OF DECEASED SOLDIERS who died in consequence of Wounds or Disease contracted in the Service, are entitled to a Pension and Bounty.

WIDOWS, OF SOLDIERS, SAILORS AND MARINERS, are entitled to additional Pensions for themselves, and for each child under sixteen years of age; also, to the additional Bounty of 1866.

All Soldiers who volunteered since April 19th, 1861, are entitled to U. S. Bounty.

SOLDIERS, SAILORS, MARINERS, and all others in the Army or Navy during the Retention, who were Wounded or Disabled while in the service, are entitled to Pension, from four to twenty-five dollars per month, according to the disability; they are also entitled to additional Bounty. Send your discharge and we will collect it for you.

ALL COLORED SOLDIERS ARE ENTITLED TO BOUNTY.

They are also entitled to Pension for Wounds or Disability, from \$4 to \$25 per month.

BOUNTY LAND WARRANTS.

All Officers, Marines, Seamen, Clerks and Landmen, and all Officers, Musicians, Clerks, Privates and Teamsters, either in the United States Army or in any State Service, if paid for by the United States, are each entitled to a Land Warrant for 160 acres, if they enlisted previous to March, 1865. Apply to us and we will obtain it for you.

We have a Resident Agent in Washington to attend to all Claims.

BUSSEY'S NEW COMBINATION LOCK.

We are informed that this Lock, invented by WILLIAM C. BUSSEY, of Amador County, in this State, is on an entirely new principle, and is acknowledged by locksmiths to be the strongest, simplest and best Combination Lock ever invented. It can be subjected to a million changes, and when these have been run the burglar is no nearer entrance than when he commenced. The exact set of the combination must be known before it can be opened. The inventor can instruct any one, in a few minutes, to open and also to set the combination, so that the inventor cannot gain entrance without you first divulge the set. No key is used, nor is there any guide on the face of the Lock. No derangement is possible; fire cannot injure it if not melted.

The Bank of British Columbia being the first one of these Locks introduced in this City, and the following recommendation has been received by the inventor:

BANK OF BRITISH COLUMBIA, San Francisco, May 24th, 1866.

Recently, two of Wm. C. Bussey's New Patent Combination Burglar-Proof Locks were placed upon the vault doors of the Bank of British Columbia. They are found to operate with all the efficiency claimed by the inventor, and in every way meet our fullest approval. They were ordered upon mature deliberation, after strict investigation of their merits, in comparison with some of the most noted and popular old styles of Combination Locks. We deem the Lock entirely burglar-proof. It is strong in construction, without intricate or delicate parts, with simple and easy movement. We find no difficulty in either opening or closing it, nor in changing its combinations, which may be made almost innumerable. As a California invention of extraordinary merit, we take pleasure in recommending it to public attention, believing it to possess all the advantages which are claimed for it.

WM. H. TILLINGHAST, Sub-Manager.

DOCTOR LIBBEY,

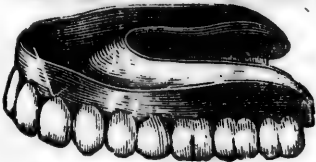

SURGICAL AND MECHANICAL

DENTIST,

109 MONTGOMERY STREET,

Between Bush and Sutter, opposite south end of Occidental Hotel,

SAN FRANCISCO, CAL.

DR. LIBBEY devotes his exclusive attention to the practice of DENTISTRY. He will not make elaborate pretensions to any mysterious claims, made by many in the Profession, but flatters himself that a constant and extensive practice of twenty years, with due attention to all improvements extant, will capacitate him to compete with any in the Profession.

TEETH adapted in any STYLE or on any BASE desired—GOLD, SILVER, PLATINUM, or VULCANITE, (now much in vogue.) Teeth PLUGGED substantially, with all popular materials. Teeth EXTRACTED, with or without anæsthetic agencies. All professional Services—Medical, Surgical or Mechanical—insured to give satisfaction.

PRESERVE YOUR SIGHT!

BY PURCHASING PERFECT SPECTACLES, EXACTLY SUITED TO YOUR EYES,

FROM

C. MULLER, OPTICIAN,

205 Montgomery Street, Russ House Block.

SPECTACLES

MY OWN SPECIALITY.

From constant observation of the HUMAN EYE, I have obtained a thorough knowledge of this most valuable Organ. I am enabled to discern, in the majority of cases, from a mere inspection of the pupil, whether or not Glasses can be of any benefit for the Eye, or the exact Focus required to enable the wearer to pursue the most minute employment with an ordinary amount of light, without causing that weakness or fatigue to the Organ usually complained of.

C. MULLER, Optician,

No. 205 Montgomery Street, Russ House Block.

DR. T. C. JESSUP.

DR. D. BURBANK.

JESSUP & BURBANK, DENTISTS.

N. W. Cor. Montgomery and Sacramento Sts.
Over Tucker's Jewelry Store, **SAN FRANCISCO.**

Parties wishing ARTIFICIAL TEETH inserted in an artistic manner, have only to inquire to know that Dr. BURBANK is one of the oldest, as well as one of the most successful Dentists on this Coast. His reputation as such is sufficient guarantee for his ability.

Dr. T. C. JESSUP, formerly at No. 18 Third Street, makes it a specialty to OVERT ACROSSSES, FILL FANGS, RESTORE CROWN, and permanently save TEETH, that have been considered worthless, thereby avoiding the pains of Extracting, and necessity of wearing an Artificial Plate. He Fills the Teeth with good solid Gold Fillings that will last a lifetime. Special attention given to Cleansing and Beautifying the Teeth, Correcting Irregularities, etc., etc.

STENCIL PLATES

CUT BY

F. M. TRUEWORTHY,

**321 FRONT STREET, CORNER COMMERCIAL,
SAN FRANCISCO, CAL.**

STENCIL PLATES, when handsomely executed, present the cheapest and best mode of advertising that can be adopted. This is the experience of all who use them.

STENCIL PLATES OF EVERY PATTERN cut at this Establishment in a style unequalled by any other workman in California.

Merchants and others are invited to call and examine specimens in proof of the above assertion.

Orders from abroad, as well as those given in person, promptly executed and forwarded. Parties sending orders by letter are particularly requested to WRITE PLAINLY and give the EXACT SPACE THEY WISH THE LETTERS TO OCCUPY.

By close application and superior execution of work during an experience of ten years, Mr. TRUEWORTHY has extended his business to its present proportions. His present facilities for rapid and tasteful execution of all work in his line are far superior to those of any other in this State or in the Union.

BRUSHES, INK AND MARKING POTS FOR SALE.

TIME & LABOR SAVED
BY USING

STANDARD SOAP CO'S WASHING POWDER.

This Powder is approved by all who have used it. Far superior to soaps and compounds for washing and cleaning. It is made of pure material, and contains nothing that will injure the finest fabric. Equally as good for using in HARD as SOFT water. No soap ever required to be used with it. One pound will make THREE GALLONS of beautiful SOFT SOAP. Give it a trial and you will never be without it. Put up in packages of 1 lb each, and in boxes of 10 lbs. bulk, with full directions. Sold by all Grocers throughout the Pacific Coast. See and buy none but Standard Soap Co's.

Manufactured at 207 Commercial Street. Office, 204 Sacramento Street, San Francisco, Cal.

Standard Soap Co. also manufacture superior Pale, Chemical, Olive and Detergent Soap, equal to Eastern manufacture, and sell at lowest market rates.

REMINGTON'S ARMY AND NAVY REVOLVER.

ALBERT E. CRANE,
AGENT FOR PACIFIC COAST, SAN FRANCISCO, CAL.

THE REMINGTON REVOLVER

Has been approved by the United States Board of Ordnance, and has so satisfactorily met the requirements of the Government, not only in the field, but in the official tests and examinations made by prominent officers of the Ordnance Department, that it stands at once the most popular, serviceable and approved arm of the kind in use.

Upwards of 150,000 have been supplied to the Government since 1861, for the land and naval service, furnishing ample evidence of the estimation in which the arms are held.

Simple and symmetrical in its entire construction, securely strong, of most modern improvement in mechanism and material; its unequalled range and penetration, together with its durability, are points in its favor now well-known, and which challenge a comparison with any other pistol of the kind made in this country or in Europe.

The superior strength and capacity of the arm for constant and long use is apparent from the fact that the entire frame is constructed of a **SINGLE PIECE OF METAL**, thus preventing the extension of some portions of the frame, from the effect of firing—a serious defect in many pistols—in which the frame is composed of two or more parts.

The frame of the Remington Revolver furnishing a **TOP STRAP** or support above the cylinder, serves to protect the base pin (on which the cylinder revolves), from any undue strain to which it would otherwise be subjected, and which would immediately render the line of fire from the cylinder to the barrel imperfect, thus destroying force and accuracy.

Another advantageous feature of the arm is the means afforded for the instantaneous removal of the cylinder from the frame. This not only facilitates the cleaning of the pistol, but by quick adjustment of the cylinder, one pistol can be made as effectual as two—and, considering the difference of weight, it is far preferable—by simply possessing a spare cylinder loaded and capped to instantly replace the exhausted one.

The above is a general summary of the points of peculiar merit in the Remington Revolver, which a trial of the arm is only needed to attest.

PRICE LIST

— OF —

REMINGTON'S

Celebrated Steel, Iron and Stubs Twisted

RIFLE AND SHOT GUN BARRELS.

Cast Steel Barrels of 6 lbs. weight, or less, each.....	\$ 5 00
" " " over 6 lbs., extra per lb.....	50

" " " over 6 lbs., extra per lb.....	60
" " fine, usual proportions, each.....	7 00
" " " over 6 lbs., extra per lb.....	70
Matched Barrels (rifle) for double guns, cast steel, per pair.....	10 00
" " (shot) for double guns, cast steel, usual proportions.....	12 00
" " for double guns, plain, iron, per pair.....	6 00
" " stubs twisted, plain, per pair.....	14 00
" " stubs twisted, fine.....	15 to 20 00

For putting on cone seat, working to a gauge, grooving for rod, and for making barrels to a PARTICULAR LENGTH, CALIBRE AND WEIGHT, an additional charge will be made. Also, an extra charge for smaller calibre than 150, and for barrels over $3\frac{1}{2}$ feet long.

Correspondents ordering barrels, will greatly oblige us by observing the following suggestions:

All orders should be **PLAINLY WRITTEN**, to prevent mistakes in transferring to our order-book.

All the dimensions of barrels—Length, Calibre and Weight (or Diameter) should be given, allowing as much variation as possible in the several dimensions, when it is not essential that the barrels be made of precise length, calibre and weight.

PRICES OF GUN MOUNTING.

Brass Mounting, (Castings) per lb.....	\$ 60
Iron " " ".....	30
German Silver " " ".....	2 00

Directions for forwarding should accompany each order, mentioning whether to send by Railroad as freight, or by Express.

CALIFORNIA COLLEGIATE INSTITUTE.

**The only Church Boarding School for Young
Ladies in this Diocese.**

The Sixteenth Session of this well established Seminary will commence on the 16th of July, at its commodious building on Silver Street, San Francisco.

The few vacancies remaining should prompt early application on the part of Parents and Guardians, who desire for their wards and daughters the advantages of the thorough Christian, literary, and classical education, which is afforded by this Institution.

The Principal will be assisted by a corps of thoroughly qualified Teachers; and no pains will be spared to make this the best school on the coast, in all those branches of education which shall prepare Young Ladies to fill the duties of life with knowledge and accomplishment.

The services of the Church, and such Biblical and devotional exercises as are approved, are regularly attended by the Boarding pupils.

For Terms and other particulars, apply to the Principal, Lock Box 1600.

VISITORS.—The Rt. Rev. Bishops of California, Oregon and Honolulu.

REFERENCES.—The former and present patrons of the Institute, and the Church Clergy of the Diocese.

THE
BOARDMAN, GRAY & CO.
PIANO-FORTES
WHOLESALE AGENCY.

The subscriber, late a member of this well known firm, has established a

WHOLESALE AGENCY,

581 BROADWAY, NEW YORK CITY,

Where he will be pleased to receive the orders of his friends and the public, and especially to hear from those who have so liberally bestowed their patronage on the firm heretofore. He will supply these superior instruments to the trade

WHOLESALE AND RETAIL,

AT THE VERY LOWEST PRICES,

Made with the Insulated Iron Rim and Frame, (cast in one solid plate.) They excel all others in durability, superiority of tone, and elegance of external appearance.

All these Pianos have overstrung Scales, giving in connection with the patent iron rim and frame, full, round, powerful and sweet mellow tones. The cases are elegant in appearance, and easily and safely handled.

Warranted to Prove Satisfactory, or the Money Returned.

Address all Orders to

SIBERIA OTT, 581 Broadway, New York.

S. D. & H. W. SMITH'S AMERICAN ORGANS, THE MOST PERFECT AND BEAUTIFUL MUSICAL INSTRUMENT

IN THE WORLD, FOR THE
AMERICAN HOME CIRCLE.

— THE —
AMERICAN ORGAN

Makes home attractive, refines and elevates the minds of all, beautiful
in appearance and effects.

**SIBERIA OTT, 581 BROADWAY, NEW YORK,
WHOLESALE AGENT.**

The immense popularity of these Organs, and their superior Musical powers, is fast bringing them before the public, as the instrument so long desired in American homes. And although the cost price is but a trifle over the Melodeon, yet the musical advantages, beauty of tone and quickness of touch and action are so far superior, that they are fast superseding the Melodeon, and the call is now almost exclusively for the American Organs. It is adapted to any Music, from the quickest and most lively, to the heavy tone of the Church Organ. And almost universally they are preferred to the Piano, by persons who have them, yet costing less than half, and only taking a small amount of room.

Send for descriptive circulars, giving full particulars and prices. Exclusive Agencies secured to dealers, and large discounts to the trade and Teachers.

— TO MUSIC TEACHERS AND DEALERS. —

The subscriber is fully prepared to furnish Sheet Music, Strings, Musical Instruments, and Music Books of all kinds, at the lowest trade rates, wholesale and retail, from the largest collections in this country.

Orders punctually and faithfully attended to. Address all orders,

AMERICAN ORGANS.

(From "Godey's Ladies' Book," February, 1866.)

REED ORGANS, &c.

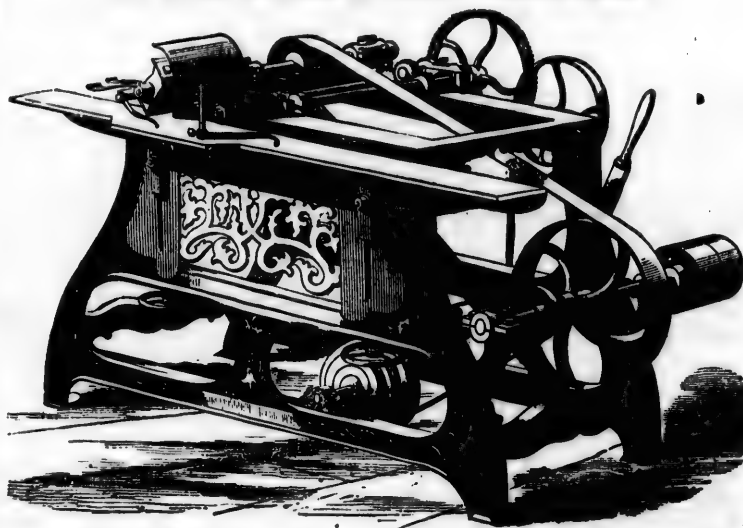

The following remarks and suggestions relative to this immensely popular instrument will doubtless interest and profit very many of our readers. We commend the article to their careful perusal:

A hundred and one makers of Organs, Cottage, Parlor, Cabinet, American, School Organs, etc., are each claiming to make the best instrument in the world. Being comparatively a new instrument, as at present constructed, we are convinced that the public are much less capable of judging of its merits, or demerits, than of most other instruments. If there is really an essential difference in them, if there are some excellent and some worthless ones, the public should have some criterion for judging of them, some facts which will enlighten them. We cheerfully concede the space for this article, knowing that there is hardly a family, or church, or school in all the land, but is more or less interested in this topic. We are also aware of its being a great misfortune, a real calamity, to any of them to purchase an inferior or worthless Organ, ruinous to good playing, and often a source of much annoyance and vexation. We know this article to emanate from a candid and intelligent source, and thus we give it to our readers.

The question is often asked, what are "reed organs?" We answer, they are, in most cases, nothing in the world but the old melodeon in disguise. Many of the so-called organs have the same bellows, the same reeds, and the same general internal arrangement. With the bellows turned on edge to gain room, they have simply put on a more pretentious exterior, and a more high sounding name. But an organ, to be in reality an organ, must have a wind-chest or reservoir for air separate from the bellows, into which wind-chest the reeds open, and the tone has room to expand and perfect itself into the full, round tone, similar to the flute or pipe organ, even, smooth, firm and mellow; and this tone from reeds cannot be obtained in any other way known. Nothing so annoys a true organist as to have the volume of sound swelling and jerking spasmodically with every variation of force on the bellows, which is always the case where the reeds open direct into the bellows or air-passages, instead of a wind-chest or sound-box. And yet some makers even go so far as to claim this spasmodic or automatic jerking of the bellows on the reeds as an excellence, just as though they did not know that it must very soon throw the reeds out of tune, and injure the bellows; and as though it were not an easier matter to obtain a much better and more easily managed swell by other methods. The truth is, any organ, so-called, or melodeon, which has the wind acting directly upon the reeds, is nothing more nor less than a huge accordeon, dress it up as you may. And when organists and true musicians become aware of the fact that they can obtain those that are organs in fact as well as in name, they will buy no more of the objectionable ones. Then again the swell should always be separate and distinct from the bellows, so as not to be acted on by the hard or soft blowing, but convenient, so that the player can use it with the knee, separate from the hands or feet, and thus always under easy control, to be used *ad libitum*.

The large divided bellows, or double bellows, is also a very important improvement. By this means not only can the wind be supplied more evenly, but with far greater ease to the performer, from the fact that either bellows alone will be sufficient for the lighter melodies, thus permitting the player to change about and rest the feet at will; then, if the bellows is of the requisite large size, and having the wind-chest or reservoir, all will be well. As to the reeds, they must be scientifically tuned and voiced, or all the other good qualities in the world cannot produce a good toned instrument. The inquiry now very naturally arises, where can the organ be procured combining all these essential and desirable qualities? There is only one possessing all these points, and that is the AMERICAN ORGAN, made by S. D. & H. W. Smith, of Boston, Siberia Ott, Wholesale Agent, 581 Broadway, New York. These organs have a wind-chest extending the whole length of the instrument, and so constructed as to act at the same time as a reverberating sound-box or board, and having the same important relation and part to perform that the sounding-board has to the piano. This feature the makers have patented, and to it are owing in a great measure the entirely unequalled fullness and richness of tone so highly prized by all who have used these organs. They also have the largest and best divided bellows in use, which is another important feature. No part of their work is slighted, no expense or pains spared to make the American Organs perfect musically, as well as mechanically, and, judging from the immense sale of them at present, they bid fair to long maintain the proud position they have won by superior merit alone. We would most heartily advise all interested to call upon or address Mr. Siberia Ott, the Wholesale Agent, at 581 Broadway, New York, and can assure them he will, in the most gentlemanly and truthful manner, impart to them all the information they may desire, and send them descriptive circulars, relative to this truly delightful instrument.

E. C. TAINTER,
BUILDER AND DEALER IN
WOODWORTH PLANERS,
MOULDING, MORTISING, TENONING,
AND
GENERAL WOOD-WORKING MACHINERY,
WORCESTER, MASS.

SALE AT THE JUNCTION SHOP.—L. L. Mason sold at auction about seven thousand dollars worth of tools and machinery at J. A. Fay & Co's yesterday afternoon. E. C. Tainter purchased the good-will and part of the fixtures of the concern, and we trust will retain a large share of the business of this well known firm. They have just completed several large wood planing machines for the Russian Government; two of which will plane fifty feet long each; others will be shipped to Liverpool this week. The sale will be resumed again to-day at 10 o'clock.—*Worcester Daily Spy*, September 2d, 1861.

Having purchased the Good-Will of our late firm, Builders of SASH and DOOR MACHINERY, and started the business in connection with Witherby, Rugg & Richardson, with New Patterns and superior facilities, will thank our late Patrons and all in want of first-class Wood-Working Machinery to favor me with their orders.

SEND YOUR ADDRESS AND RECEIVE A PRICE LIST AND CIRCULARS.

MANY MILLIONS SQUARE FEET OF WARRENS' ROOFING

Are now in use throughout the United States,
upon the most costly Public and
Private Structures.

By Twenty Years' actual test, its merits have been
established as a Valuable and
Durable Roofing.

Ninety of the largest Manufacturing Corporations in the New England States have more than
2,500,000 square feet of surface covered with Warrens' Roofing, many thousand feet of which has
replaced Tin.

WARRENS' ROOFING is both **WATER-TIGHT** and **FIRE-PROOF**.

It will not expand and contract with heat and cold, like metal roofs.

One inch to the foot is all the inclination required on the roof.

It can be walked upon without injury.

It can be used for drying purposes.

It is not affected injuriously by changes of temperature.

It is adapted to every climate.

It is not injured by the jarring of machinery.

It will bear more than double the heat of zinc, tin, or galvanized iron, without danger to the
boarding beneath it.

Firemen can stand upon it in perfect security, and control the fire in adjoining buildings.

It will withstand the action of chemicals in buildings where the same are manufactured or used ;
and is not affected by gas which rises in founderies, blacksmith shops, etc.

It is a non-conductor of heat.

Upper rooms are cooler in summer, and warmer in winter, than with any other materials.

Its cost is very much less than that of any other fire-proof in use.

Insurance is effected in the best offices in the United States and abroad, at same rates as on build-
ings covered with other fire-proof materials.

MANUFACTURED BY THE

New England Felt Roofing Company,

MAYNARD & NOYES'

WRITING INK.

Testimony of Parties who have used it for more than a Quarter of a Century.

REGISTRY OF DEEDS OFFICE, Boston, Jan. 10th, 1859.

Messrs. MAYNARD & NOYES: Gentlemen—I am glad that longer-use of your Writing Ink enables me to repeat the testimony given in its favor many years ago. I have used it in this office thirty-seven years, and my oldest records are as legible and black as when first written. This rare quality for permanence renders it invaluable for State and County Records, and all mercantile purposes where it is important that the writing should remain legible and unchanged in color by the lapse of time.

HENRY ALLINE, *Register of Deeds.*

BOWDOIN PUBLIC SCHOOL, Boston, Jan. 7, 1857.

Messrs. MAYNARD & NOYES: Gentlemen—I have used your Ink in the Writing Department of this School the past thirty years, and take great pleasure in renewing my testimonial of its superior quality. It flows freely from the pen, its color is brilliant and permanent, and it combines all the necessary and desirable qualities of good Ink.

JAMES ROBINSON, *Writing Master.*

The following extract of a letter from a well known and long established bookseller in Dover, N. H., is like many others often received, and will be found to express the opinion and correspond with the experience of a large number in the business:

After trying various kinds of Ink, most of my customers come back to yours. I am tired of the miserable compounds offered every little while pretending to be superior to all other Inks, and will have nothing further to do with them. I have used your Ink on my books over twenty-six years, and my customers can see how it stands against time. Entries made in 1832 are as fresh as those made during this year.

E. J. LANE.

DOVER, N. H., October 16th, 1858.

MAYNARD & NOYES' COPYING INK.

This Ink yields a copy as distinct and perfect as the original. It also combines all the properties of our Writing Ink, for which it can be substituted.

MAYNARD & NOYES' CARMINE INK.

This article is a beautiful red or crimson color, and surpassingly brilliant and rich. It is free from sediment, and will not mold, fade or turn dark by exposure to the air.

The above popular Inks, together with

Blue, Red, Indelible and Stencil Ink, Chemical Writing Fluid, Ink, Powder, &c.

For sale by the Manufacturers,

75 AND 77 WATER STREET, - - BOSTON,

And by all Stationers and Booksellers in California.

VOLNEY W. MASON,

PROVIDENCE, R. I.

MANUFACTURER OF

PATENT FRICTION PULLIES.

ALSO,

PATENT FRICTION COUPLINGS

FOR STARTING MACHINERY WITHOUT SUDDEN SHOCK,

Saving wear and tear of machinery and belting. It is now six years since we first commenced their manufacture and we are able to refer to nearly all our Eastern mechanics and manufacturers who are conversant with their utility, among which are Corliss Steam Engine Co., Providence; Tatham & Brothers, New York City; Smith & Jewell, Brooklyn, N. Y.; Lowell Machine Shop, Lowell, Mass.; Wm. Sellers & Co., Philadelphia, Penn., etc.

Circulars, describing and illustrating them more fully, with prices, &c., sent on application. They are especially useful on heavy machinery, such as for hoisting for Mining purposes, for Flour Mills, Grist Mills, Saw, Mills, Paper Mills, Print Works, Bleacheries, in Factories for starting lines of shafting, or stopping without hindrance to motive power, and thousands of places which cannot be enumerated here.

Parties ordering or desiring further information, will please give full description as to size of shaft, diameter and width face required, space occupied, speed to run and power transmitted, &c.

All orders or correspondence will receive prompt attention.

CALHB HAMMILL, **GENERAL COMMISSION MERCHANT,** NO. 30 PLATT STREET, NEW YORK.

Particular attention paid to Purchasing Goods on Orders.

REFERENCES.—Dodge, Gilbert & Co., Boston, Mass.; New England, Butt Co., Providence, R. I.; Bliven & Mead, New York; Sargent & Co., New York; Trowbridge, Wilcox & Co., Detroit, Mich.; Tuttle, Hibbard & Co., Chicago, Ill.; Hammond & Co., Sacramento, Cal.; Wm. Botsen & Co., San Francisco, Cal.

Dr. S. B. Smith's Direct and To-and-Fro Current Electro-Magnetic Machines, for Medical Purposes.

"The arrangement of the Direct Circuit in Smith's apparatus gives a much stronger physiological effect than I have seen from any other apparatus. The Induced Current is extremely intense."—*B. Stillman, Jr., Professor of General and Applied Chemistry, Yale College, Conn., July, 1883.*

The so-called Six Currents made by different combinations of three distinct helices, were made many years ago by J. Jewell & Co., Bristol, Conn. The Six Currents, so-called, were made by myself some years before Jewell & Co. I called it the Torpedo Magnetic Machine, from its giving out shocks from all parts of it like the torpedo.

"I have had one of Dr. S. B. Smith's Torpedo Magnetic Machines in my possession ten years. Six shocks or more may be obtained from it."—*L. V. Newton.* (Dr. Newton is proprietor of the "Druggists' Circular.")

I never applied for a patent for this six-current contrivance. All these six currents can be obtained from my Direct and To-and-Fro Current, by means of a bit of small wire, five inches long, attached according to the directions in my pamphlet. Price \$18 and \$20. Extra office size, \$45. Sent to all parts. Payment can be made to Express Agents on delivery of goods. Address,

DR. S. B. SMITH, 309 BROADWAY, N. Y.

*I could give the testimony of one hundred physicians, and others, but I adduce that of Prof. Stillman alone, as all-sufficient for my purpose.

"It Works like a Charm."

RENNE'S	PAIN	RENNE'S
	KILLING	
MAGIC	MAGIC	MAGIC
OIL?	OIL?	OIL?
THE WONDER OF THE WORLD.		

Clean, delicious and safe to use, and cures pain in any part of the body as water quenches fire. Try it. It is better for you than your money. Directions with each bottle, how to use Renne's Pain-Killing Magic Oil externally and internally. Every family should keep it in the house. All travelers should have this Magic Oil with them. Everybody is liable to accident, to sprains, Headache, Toothache, Colds, Cholera, Morbus, Cholera, Bruises, Burns, Rheumatism, Neuralgia, Colds in the Head, Ague in the Face, Lameness, Sciatica, Fits, Poison! All these the Magic Oil cures! and it is now known to be the best Remedy in the world. A bottle of Renne's Magic Oil is a perfect "Self, Health Insurance Company"—so the people say. There is health, beauty, and happy home, sealed up in every bottle, waiting for you, Reader. Inquire for it where you trade. Sold by Druggists, Merchants and Grocers, who are my Agents throughout the country.

HISTORY OF THE NAPA SODA SPRINGS,

Located East Side of Napa Valley,
on the Side of the Mountain,
FIVE MILES FROM NAPA CITY.

Analysis of the Napa Soda Springs, by Dr. L. LANSZWEERT, Practical Chemist, San Francisco.
Made, May, 1856:

TEMPERATURE FAHRE.....	68
RESIDUUM FROM EVAPORATION, IN A QUARTER GALLON, GRS.....	17 19
BICARBONATE OF SODA.....	3 25
CARBONATE OF MAGNESIA.....	6 53
CARBONATE OF LIME.....	3 73
CHLORIDE OF SODIUM.....	1 30
SUBCARBONATE OF IRON.....	1 96
SULPHATE OF SODA.....	0 46
SILICEOUS ACID.....	0 17
ALUMINA.....	0 15
LOSS.....	0 63
	17 19

We, the undersigned, Physicians practicing in the City of San Francisco, have examined the result of the analysis made by Dr. L. LANSZWEERT, Practical Chemist, of the water from the Napa Soda Spring of Napa. The water, according to this examination, possesses Aperient, Antacid and Tonic properties, which cannot fail to be very beneficial in the treatment of Chronic Diseases, and affording a pleasant, healthful and invigorating beverage.

H. M. GRAY, M. D.,
ARTHUR B. STOUT, M. D.,
CHARLES BERTODY, M. D.,

J. P. WHITNEY, M. D.,
A. F. SAWYER, M. D.,
WILLIAM O. AYRES, M. D.

NOTICE.—I beg to submit to the notice of the Public the above Analysis of the celebrated NAPA SODA SPRINGS, which aspires to the general favor of Medical Men, and the same attested to by six of our best and most eminent Physicians, who are perfectly familiar with the medicinal properties of this Mineral Water—which has been extensively used for eight years with perfect success, for the cure of Heart, Liver and Kidney Diseases, Indigestion, General Debility and Female Weakness. In cases of Emaciation and Debility, an increased nutrition of the body is the result of the use of this Water. Nothing so beneficial! The components are so perfectly united by Nature, that for a healthful and refreshing beverage this Water surpasses any other Mineral Water in use; and for SEA SICKNESS it is infallible.

Allow me to invite your attention, with the request that you will give it a trial, and if you find it worthy, your influence.

Steamers, Hotels, Saloons and Families will be promptly served on leaving orders at the Napa Soda Office, No. 232 Bush Street, opposite Occidental Hotel, San Francisco.

J. H. WOOD, Proprietor.

N. B.—Some Bar-keepers, and others, have imposed upon the Public by palming off other water for Napa Soda. LOOK WELL AT THE BOTTLE! None is genuine unless in bottles with the following blown in the glass: "NAPA SODA," on one side, and "NATURAL MINERAL WATER," on the other side; and the same secured as Trade Mark. J. H. W.

HATS AND CAPS

WHITE SULPHUR SPRINGS, NAPA COUNTY.

—♦—
This Favorite Resort will remain under the management of Mr. ALSTROM.
—♦—

Having made extensive improvements on the buildings and grounds, the public can rest assured that their sojourn at the Springs will be made pleasant.

J. BREMBERG & CO., - - - PROPRIETORS.

WHITE SULPHUR SPRINGS.—This popular watering place is pleasantly situated in Napa Valley, about eighteen miles from Napa City, and eight miles this side of Calistoga, Springs. The Sulphur Springs is fast becoming a favorite resort not only for pleasure seekers, but also for those who would while away a few days, weeks, or months, in agreeable and pleasing recreations, free from the dust, care, and bustle incident to city life. Those who have not frequented the place recently will be surprised on their next visit at seeing the extensive improvements, consisting in part of the most elaborate arrangements and artistic adornments in both the buildings and grounds; also of the excellent provisions made in the culinary department of the establishment.

We can assure those who wish to spend a short period in pastime and recreation, that there is no place to be found on this coast that offers inducements so favorable as the White Sulphur Springs.

 SAN FRANCISCO, CAL.

MANUFACTURE ALL KINDS OF
MACHINERY,
STEAM ENGINES & QUARTZ MILLS;

DUNBAR'S IMPROVED
Self-Adjusting Piston Packing,

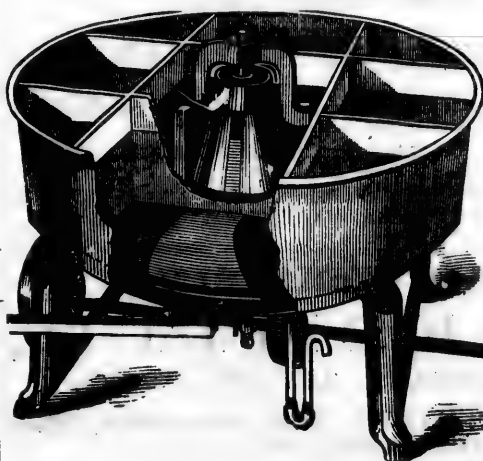

Requires no springs or screws; is always steam-tight; without excessive friction, and never gets slack or leaky.

WHEELER & RANDALL'S
NEW GRINDER AND AMALGAMATOR,
 Hepburn & Peterson's Amalgamator and Separator,
TYLER'S IMPROVED WATER WHEEL,

Giving the greatest power, at lower cost, than any Wheel in use. There are over 1,500 running.

KNOX'S IMPROVED PATENT AMALGAMATOR & SEPARATOR,

With Palmer's Patent Steam Chamber or Die.

This cut represents an Amalgamator and Separator that has stood the test of **THIRTY YEARS'** practical working in the gold mines of California, and for nearly the same time in the silver mines of Nevada, having been introduced into the first steam mills built in the then Territory, since which time they have been successfully working against all competition. The great advantages these Amalgamators have over any others, are—

1st. **MUCH LESS COST.**
 2d. They do not "flour" the mercury, and collect any that may have been "sickened" in the battery or grinders.

3d. The "sloshing" motion given to the pulp (by the revolution of the miller under the stationary frame) against the amalgamated copper plates that are fastened to the frame, and by this means catching the fine gold and mercury that will not settle.

4th. The gate in the cone, through which the pulp is discharged, from the top, and where there is the least motion, almost precluding the possibility of any granulated mercury or fine gold escaping.

There are over **500** of them in use in California and Nevada, where those interested can see their practical workings.

Genuine White Iron Stamp Shoes and Dies.

Having been engaged for the past eight years in quartz mining, and being conversant with all the improvements, either in Mining or Milling, we are prepared to furnish, at the shortest notice, the most perfect machinery for reducing ores, or saving either gold or silver.

STANFORD BROS.

Opposition Courtied ! Comparison Invited ! Competition Defied !

NOW IS YOUR TIME TO SUBSCRIBE FOR

ATLANTIC PERIODICALS.

SPECIAL AGENT FOR THE PACIFIC COAST OF ALL OF

Frank Leslie's Publications,

Comprising the "Illustrated News," the "Chimney Corner," "Illustrated Zeitung," the "Budget of Fun," "Family Magazine," and the "New Monthly."

Special Editions for the Pacific Coast of the "Illustrated Family Almanac," "Ladies' Illustrated Almanac," "Comic Illustrated Almanac," and the "Tribune Almanac."

10,000 different kinds and subjects of CARD PICTURES, Plain and Colored. FLAGS, Silk and Bunting, all Sizes and Prices. A complete assortment of MILITARY BOOKS. NEW NOVELS by all the best authors. A complete assortment on hand of all kinds of

STATIONERY, WHOLESALE AND RETAIL.

Attention is called to my extensive catalogue of American and Foreign Periodicals, for which I receive subscriptions. Permanent arrangements having been made by the United States Government for the carrying of the Mails from the Atlantic States by steamer three times a month, I am enabled to receive subscriptions at a much lower rate than formerly. The same care and attention will be paid to the forwarding of all packages, for which this establishment has gained such an enviable reputation throughout the Pacific Coast.

By special arrangements with the Publishers, I am able to receive later dates of the LEDGER, and other STORY Papers, in advance of other News Agents on the Pacific Coast; and also, with the Tribune Publishing Co., I receive the Tribune Almanac a month in advance of other dealers.

If I am running out of business all other News Dealers in this city, I can't help it. I can, and I will sell cheaper than any other house in this city.

Any Newspaper, Magazine, or Review not mentioned in my published catalogue, will be furnished to order. Orders for Books, Music, Cards, Card Pictures, and Fancy Articles, etc., filled promptly at the lowest rates. Subscriptions payable invariably in advance.

And remember, I make good all copies lost by Mail. Money at my risk, if in Registered Letters.

Wholesale Country Agent for the Spirit of the Times, Police Gazette, and SUNDAY MERCURY.

Subscriptions received for all the San Francisco Dailies and Weeklies at Publishers' Prices. Address **J. STRATMAN, News Agent**, No. 506 Washington Street, near corner of Sanson, San Francisco, Cal.

Send for catalogue. Any work referred to therein will be sent to any place, free of postage, on receipt of price.

Send Cash Orders to **JOHN STRATMAN**, San Francisco, Cal.

THE EQUITABLE LIFE ASSURANCE SOCIETY, MUTUAL.

ASSETS—TWO AND THREE-QUARTERS MILLIONS.

Income for 1886—Two Millions.

KINDS OF POLICIES.

Policies will be issued, assuring any amount between \$250 and \$25,000.
For Life.

For a Term of Years—One or More.

On the Endowment Principle, payable when the assured attains a certain age; or at death, should he die before. This kind of Policy is rapidly gaining favor with the public, as it makes provision both for one's self in old age, and also for one's family in case of early death.

On Joint Lives, payable at the death of the first of two or more persons.

On Survivorship, payable to a party named, in case he survive another.

And, in a word, all Contingencies of Life, that can be calculated, will, if practicable, be provided for by the Society.

POLICIES WILL BE ISSUED,

In favor of the Person whose Life is assured, transferable by assignment, and payable to himself, his heirs, executors, or assigns.

In favor of Another, transferable and payable as above.

In favor of any Person as Trustee for Others.

In favor of a Wife and payable to her; or, in case of her death, to her Children or their Guardian.

UNITED STATES CASUALTY INSURANCE CO. INSURANCE AGAINST ACCIDENT!

**TEN DOLLARS Annual Premium will secure a Policy granting Insurance for
TWO THOUSAND DOLLARS**

IN THE EVENT OF DEATH BY ANY DESCRIPTION OF ACCIDENT, WITH TEN DOLLARS PER WEEK COMPENSATION, (WITH PARTICIPATION IN PROFITS) for any Personal Injury—Total Disability from Business, so that should the Policy continue in force for Five Years, any one Accident causing disability for FIVE WEEKS, will reimburse the assured for the whole cost of his Insurance.

TWENTY-FIVE DOLLARS PREMIUM will, in like manner, secure a Policy for **FIVE THOUSAND DOLLARS**, and **TWENTY-FIVE DOLLARS** per week compensation, with Dividends.

FIFTY DOLLARS PREMIUM will, in like manner, secure a Policy for **TEN THOUSAND DOLLARS**, and **FIFTY DOLLARS** per week compensation, with Dividends.

A GENERAL ACCIDENT \$5,000 POLICY FOR FIVE YEARS,
COSTS ONE PREMIUM OF \$100. Dividends will reduce the next Payment at the "Ordinary" rate, and a
\$5,000 POLICY FOR THREE YEARS,
COSTS ONE PREMIUM OF \$62.50, with Dividends.

TOLAND MEDICAL COLLEGE. SAN FRANCISCO, CAL.

The annual Course of Lectures of this institution commences on the first Monday of June, and continues four months.

During the regular term, the students will have an opportunity of visiting the various hospitals of the city, under circumstances which will enable them to observe medical and surgical treatment, to listen to clinical teaching, and make records of the progressive development of diseases, with the results of Medicine and Hygiene. The Faculty desire to call attention to the following local advantages:

1st. There is no climate, perhaps, in the world, which has a more invigorating effect upon persons coming from the interior of our States and Territories, thereby qualifying the votaries of study with essential health and inspiration. 2d. No city of the same population has more ample hospital facilities, or greater opportunities for organizing and maintaining the very best elements of clinical teaching. 3d. The singular characteristics of our climate are such, that every branch of Medical study can be prosecuted during the entire year. In winter or summer, dissections can be made without detriment to the health of the student.

Fees and Regulations.

The aggregate fees of the Professors for a full term.....	\$190 00
The Matriculation fee, (this fee is paid but once).....	5 00
The Graduation fee.....	40 00
The Demonstrator's ticket.....	10 00

REQUIREMENTS FOR GRADUATION.

1st. The candidate must be 21 years of age.

2d. He must have attended two full courses of Medical lectures, one of which must have been delivered in this Institution.

3d. He must have attended a course of practical anatomy in the dissecting room.

4th. The candidate must have studied medicine for three years, (the terms of attending lectures included) under the direction of a respectable medical practitioner.

5th. He must write a Medical Thesis, and submit the same to the Faculty two weeks prior to the commencement.

Graduates from other Medical Colleges, in good standing, are required to matriculate only.

BOARDING.

Students can obtain good board in the city, at prices varying from five to ten dollars per week. Application for further information may be addressed to the Dean.

Board of Trustees.

THE UNION BUSINESS COLLEGE,

Merchants' Insurance Building,

NO. 408 CALIFORNIA STREET, SAN FRANCISCO.

This Institution is designed to prepare Boys and Men for Business pursuits, and to impart a thorough Commercial education. It is conducted upon actual business principles. The student, upon entering this College, is furnished with a capital in Cash and Merchandise—rents a place of business, opens an account with the Bank, insures his goods in the Insurance Office of the College, and enters upon

The Arena of Business.

He commences speculation, carrying out all the details of trade, buying and selling goods, depositing in and checking from the Bank, making and negotiating Notes, Drafts, Bills of Exchange, etc., (foreign) recording the transactions, and keeping the books in a regular and scientific manner. From this he advances to a field of labor, calling forth the highest order of executive skill, from the simplest forms of Co-partnership, as a Dry Goods and Commission Merchant, Flour, Grain, Jobbing and Produce Dealer, to the more advanced exercises of Insurance, Exchange, Brokerage, Mining Secretary, and Custom House business, the pupil holding each and every position, from the least to the highest; thus becoming practically familiar with Stock and Joint Stock Companies; Simple and Compound Fellowship; Simple and Compound Equation; General Average, or loss at sea, Merchandise and Adventure Companies, Board of Directors' Meetings, Organization and Management of Banks, Custom Duties, ad valorem and specific, and Internal and External Revenue, together with the thousand and one details essential to each. Everything is conducted upon real Money, Merchandise and business paper bases. A graduate from this College will be competent to fill creditably any position in the various departments of business life.

The public are invited to call and examine the various departments. Students enter upon any business day during the year.

SESSIONS, DAY AND EVENING.

THE SAN FRANCISCO DIRECTORY

FOR 1867,

WILL BE PUBLISHED EARLY IN MAY, 1867.

THE PACIFIC COAST ALMANAC

FOR 1868.

WILL BE PUBLISHED NOVEMBER 15TH, 1867.

HENRY G. LANGLEY, Publisher,

619 Clay Street, San Francisco, Cal.

Entered, according to Act of Congress, in the Year of Our Lord eighteen hundred and sixty-seven,

By HENRY G. LANGLEY,

In the Clerk's Office of the District Court of the United States for the District of California.

ADDITIONS AND CORRECTIONS.

GOLDEN CITY CHEMICAL WORKS.—Since the sheets of this work, giving an account of the manufactories of San Francisco have been printed, a company has been incorporated under this title, with a capital of \$500,000. They have an extensive laboratory, with all the modern improvements, located on the corner of Seventh and Townsend streets, under the superintendence of H. P. Wakelee, Esq. The operations of these works have been, thus far, principally confined to the manufacture of sulphuric, nitric, and muriatic acids, their capacity being sufficient to manufacture 20,000 pounds of the former each day. These works have the contract to supply the U. S. Branch Mint, and the San Francisco Assaying and Refining Works. They are prepared to manufacture every variety of chemical preparation for which there is any demand.

QUARTZ MILLS, CALIFORNIA, PAGE 72.—The aggregate number of stamps in the State is four thousand nine hundred and ninety-seven.

METALLURGIC AND ASSAY ESTABLISHMENTS, page 103. The San Francisco Assaying and Refining Works are also engaged in the assaying of the precious metals.

NEWSPAPERS, PAGE 111.—Since the list has been compiled, The Recorder, a weekly paper, has been commenced at Vallejo, by George A. Poor & Co.

AREA AND RESOURCES, OREGON, PAGE 118.—In a part of the edition, the area of the State is placed at 120,000,000 acres, the extent of the old Territory, instead of its present limits, 60,000,000 acres.

MANUFACTURES.—Oakland Cotton Mills, page 96; California Clothing Company, page 97; and Salem, Oregon Woolen Mills, page 194; add to each, Badger & Lindenberg, agents, 411 Battery street, San Francisco.

PREFATORY.

THE publication of a periodical work of a statistical character, on the resources of the Pacific Coast, has long been contemplated by the compiler of the present volume; but the want of success of similar enterprises in other sections of the Union has deterred him from prosecuting his intention in the form originally designed, and induced him to adopt the title and plan of the present volume as the one more likely to secure popular attention and patronage.

THE PACIFIC COAST BUSINESS DIRECTORY is intended to be a biennial publication, which will contain the name and post office address of each merchant, manufacturer, and professional engaged in business in the States and Territories bordering on or in the immediate vicinity of the Pacific Coast, with such information connected with the resources of that section of the country as will best exhibit their variety, character, and extent; together with any other data of general interest that will add to the value of the work as a useful manual of reference.

A work of the above description, if faithfully prepared, will be of essential importance to the interests of the residents of the Pacific Coast, for it will be the aim of the compiler to furnish in each volume an exhibit of their advance as a people, and the progress made in the development of the valuable and inexhaustible resources placed within their reach. The necessity of circulating information of this character is universally admitted, and the success of THE PACIFIC COAST BUSINESS DIRECTORY, it is believed, will accomplish much in that direction.

In accordance with the above plan, the present volume has been prepared, and a brief reference to its contents will show the varied character of the information embraced therein. The first part of the work contains the organization of the different departments of the Federal Government on the Pacific Coast, and the officers thereof, with a variety of useful data of a general character; the organization of the different States and Territories on the Pacific Coast, and the officers attached thereto, with appropriate references to the various departments of each; and a carefully prepared exhibit of the resources of the States and Territories included in the plan of the work. In this department the agricultural, the mineral, the commercial, and the manufacturing interests have each received careful attention, and a large amount of valuable information, including an important contribu-

tion upon the mineral resources of California, by W. S. Keyes, Esq., will be found contained therein, more complete and thorough in its details than any hitherto published. Part second embraces a gazetteer of the counties, cities, and towns of the Pacific Coast, the local officers governing the same, with the address of each merchant, manufacturer, and professional residing therein. Part third includes a classified Business Directory, containing the name of each merchant, manufacturer, and professional in the States of California, Oregon, Nevada, the Territories of Washington, Idaho, Montana, and Utah, and the Colony of British Columbia, arranged under the head of the business or profession in which he is engaged. The number of different addresses referred to in these various departments of the work exceeds forty thousand. An analytical table of contents, and a full and complete index, are added, which will exhibit at a glance the variety and character of the subjects referred to in the work, and greatly facilitate reference thereto.

The labor of collecting and preparing for the press the information for a work of the above character has required an amount of time and expense which, if stated, would be, perhaps, scarcely realized. In addition to the assistance of a number of special agents, who traversed nearly every section of the States and Territories embraced within the plan of the work, over ten thousand communications have been forwarded to Federal, State, County, and Municipal officers, and those engaged in developing the resources of this coast. In this way a mass of material was collected together which has required a much longer time to collate and tabularize than was anticipated when the work was first announced, and which has been the principal cause of the delay in its publication.

In submitting the results of his labors to the attention and consideration of the public, the compiler would express his thanks to his numerous correspondents for their valuable assistance. To Messrs. Wells, Fargo & Co., he is especially indebted for their courteous assistance and the valuable facilities extended through the numerous and attentive representatives of their House on this coast, by which he has been enabled to complete many subjects of importance, thereby adding increased value to his efforts. He would also express his obligations to the editors of the different newspapers throughout the coast for the interest manifested in the success of the enterprise; to his patrons, for their numerous substantial evidences of good will; and to Messrs. Towne & Bacon, for the care bestowed in the execution of the typographical department of the work.

The second volume of THE PACIFIC COAST BUSINESS DIRECTORY will be issued on or about July 1st, 1868.

F. S. WINSTON, PRESIDENT.

ASSETS, \$19,000,000
ALL CASH,

Annual Income, 1866, \$7,000,000.

This is a PURELY MUTUAL Company, there being no stockholders to share the profits. The ENTIRE PROFITS are divided annually among the policy-holders. Dividends can be used as cash, or added to policy, at the option of the assured.

DIVIDENDS LARGER and RATES LOWER than most other companies.

The business of this Company is conducted entirely upon the CASH PLAN; its assets, receipts, &c., being in cash only. No Premium Notes are received or held.

LIFE POLICIES issued payable at death and payable FOR LIFE, or paid up in full in FIVE or TEN YEARS.

ORDINARY and TEN YEARS' ENDOWMENTS, CHILDREN'S ENDOWMENTS, SURVIVORSHIP ANNUITIES, &c., &c., issued.

DIVIDENDS can always be used to reduce the SECOND ANNUAL PAYMENT.

NINTH INFANTRY—Brevet Major General John H. King, Commanding. Headquarters on Angel Island, California.

FOURTEENTH INFANTRY—Colonel Charles S. Lovell, Commanding. Headquarters at Fort Yuma, Cal.

TWENTY-THIRD INFANTRY—Brevet Major General George Crook, Commanding. Headquarters at Fort Boise, Idaho.

THIRTY-SECOND INFANTRY—Colonel Thomas L. Crittenden, Commanding. Headquarters at Tucson, Arizona.

*Fortifications have been erected at the following points. San Francisco Harbor; Fort Point and Alcatrazes Island; Mouth of the Columbia River; Fort Stevens and Cape Disappointment. Batteries have also been erected at Point San Jose and Angel Island, San Francisco Harbor.

NOTE.—Under the act of July 28, 1866, the Regular Army now comprises ten regiments of cavalry, five regiments of artillery, and forty-five regiments of infantry; making an aggregate maximum strength of seventy-five thousand three hundred and eighty-two rank and file. Its present strength is fifty-four thousand three hundred and two. In addition to this force there are eleven thousand volunteers, white and colored, still remaining in service.

* The Navy of the United States consists of 278 vessels, armed with 2,331 guns, of which 61, carrying 187 guns, are Iron Clads. In commission, 115. Total number of seamen in the Naval and Coast Survey Service, 12,000.

NOTE.—The following are the different squadrons as at present organized. European Squadron, Rear Admiral L. M. Goldsborough. Asiatic Squadron, Rear Admiral H. H. Bell. North Atlantic Squadron, Rear Admiral J. S. Palmer. South Atlantic Squadron, Rear Admiral S. W. Godon. North Pacific Squadron, Rear Admiral H. K. Thatcher. South Pacific Squadron, Rear Admiral J. A. Dahlgren. Gulf Squadron, Commodore John A. Winslow. In addition to the vessels attached to these squadrons, there are several others engaged on special service.

POST OFFICE DEPARTMENT, PACIFIC COAST.

DEPARTMENT OF CALIFORNIA.

Benj. C. Truman, Special Agent, San Francisco.

DEPARTMENT OF OREGON, NEVADA, WASHINGTON AND IDAHO.

Q. A. Brooks, Special Agent, Portland.

RATES OF DOMESTIC POSTAGE.

Letters to any part of the United States, 3 cents for each half ounce. Drop Letters, 1 cent—where carriers are employed, 2 cents. Registration Fee, for valuable letters, not exceeding 20 cents.

Transient Newspapers, Periodicals, Pamphlets, Blanks, Proof Sheets, Book Manuscripts, and all mailable printed matter, (except books and circulars) 2 cents for each four ounces.

Books, 4 cents for each 4 ounces or fraction thereof.

Unsealed Circulars, not exceeding 3 in number to one address, 2 cents, and in the same proportion for a greater number.

Seeds, Cuttings, Roots, etc., 2 cents for each 4 ounces.

All Packages not charged with letter postage must be so arranged that the same can be conveniently examined by Postmasters; if not, letter postage will be charged.

Daguerreotypes, when sent in the mail, are to be charged with letter postage by weight.

Photographs on Cards, Paper, and other flexible material, (not in cases) can be sent at the same rate as miscellaneous printed matter, viz: 2 cents for each 4 ounces or fraction thereof.

Photographic Albums are chargeable with book postage—4 cents for each 4 ounces or fraction thereof.

No package will be forwarded which weighs over 4 pounds.

All Postage Matter, for delivery within the United States, must be prepaid by stamps (except duly certified letters of soldiers and sailors); otherwise letters are sent to the Dead Letter Office.

Newspapers and Periodicals, not exceeding 4 ounces in weight, to any part of the United States, if paid in advance—daily, per quarter, 35 cents; six times per week, 30 cents; tri-weekly, 15 cents; semi-weekly, 10 cents; weekly, 5 cents. Semi-monthly, monthly, and quarterly periodicals, 1 cent for each copy. Newspapers and periodicals, when weighing over 4 ounces, double the above rates.

Weekly Newspapers, within the county where published, free, if passing through the mails to regular subscribers.

Quarterly payments, in advance, may be made either where published or received.

Any word or communication, whether by printing, writing, marks or signs, upon the cover or wrapper of a newspaper, pamphlet, magazine or other printed matter, other than the name and address of the person to whom it is to be sent, and the date when subscription expires, subjects the package to letter postage.

RATES OF FOREIGN POSTAGE.

NOTE.—The figures following the name of each country are intended to represent, first, the postage in cents, on letters weighing one-half ounce or under; and second, the postage on single newspapers.

North America.—British Columbia, 10, 2. Canada, 10, 2. Mexico, 10, 2. Mexico, (West Coast) 10, 2. Costa Rica, 10, 2. Guatemala, 10, 2. Honduras, 34, 6. Nicaragua, (Gulf Coast) 34, 6. Nicaragua, (Pacific Coast) 10, 2. West Indies, (British) 10, 2. Cuba, 10, 2. Bahama Islands, 10, 2.

South America.—Argentine Republic, 45, 4. Aspinwall, 20, 2. Bolivia, 34, 6. Brazil, 45, 4. Chile, 34, 6. Ecuador, 34, 6. New Grenada, 18, 6. Panama, 10, 2. Paraguay, 45, 4. Peru, 22, 6. Uruguay, 45, 4. Venezuela, 10, 2.

Europe.—Austria, 30, 6. Bremen, 30, 6. Corsica, 21, 2. Denmark, 35, 6. France, 30, 2. France, (qr. oz.) 15, -. German States, 30, 6. Great Britain, 24, 2. Greece, 42, 6. Hamburg, 30, 6. Holland, 42, 2. Lombardy, 42, 6. Modena, 42, 6. Norway, 46, 6. Parma, 42, 6. Poland, 37, 6. Portugal, 45, 8. Prussia, 30, 6. Rome and Papal States, 44, 6. Russia, 37, 6. Sardinian States, 42, 6. Sicilies, (the Two) 47, 6. Spain, 42, 2. Sweden, 34, 6. Switzerland, 35, 6. Turkey, 28, 6. Tuscany, 42, 6. Venetian States, 30, 6.

Asia.—Arabia, 45, 8. China, 5, 2. Hindostan, 68, 13. Japan, 5, 2. Jerusalem, 33, 4. Siam, 45, 6. Smyrna, 40, 6. Syria, 45, 6.

Africa.—Algeria, 33, 6. Canary Islands, 45, 6. Cape de Verde Isl., 37, 4. Cape of Good Hope, 45, 4. Egypt, 45, 8. Liberia, 33, 4. Tunis, 60, 2. West Coast, 33, 4.

East Indies.—Australia, 22, 6. Borneo, 53, 10. Ceylon, 60, 6. Java, 60, 6. Manila, 5, 2. New Zealand, 22, 6. Philippine Islands, 5, 2. Sandwich Islands, 3, 2. Singapore, 60, 6. Sumatra, 60, 6.

On either letter or packet, of any weight, the whole postage or none at all should be prepaid. If anything less than the whole is prepaid, no account is taken of it, and it is entirely lost to the sender.

THE POSTAL MONEY ORDER SYSTEM.

The Money Order System is intended to promote public convenience, and to insure safety in the transfer of money through the mails. Orders may be obtained at any of the money order offices for any amount up to fifty dollars, on payment of the following fee: On sums up to and including \$20, 10 cents; above that sum, 25 cents. Instructions are inclosed on the back of each order. The money order offices on the Pacific Coast are distinguished in the list of Post Offices by an asterisk (*) affixed to each.

Total area, inclusive of Territories, 2,815,311 square miles. Population, 1860, including Territories, (Slave, 3,953,760) 31,443,322. Total representation in Congress, 234. Presidential vote, 1864: Lincoln, 2,223,035; McClellan, 1,811,754; total, 4,034,789; Lincoln's majority, 411,281.

* Population of Great Britain and Ireland, 1861: England and Wales—Males, 9,825,246; Females, 10,880,268. Total, 20,205,504. Scotland—Males, 1,448,982; Females, 1,614,269—Total, 3,063,251. Ireland—Males, 2,904,961; Females, 2,956,582—Total, 5,761,543. Total, Great Britain and Ireland, 29,031,298. The decrease in Ireland from 1841 to 1861 was 288,468 families, being at the rate of 18.28 per cent.; (the average number of persons to a family in 1861 was 5.10; in 1861, 5.44; in 1841, 5.54) results showing a gradual thinning out of the households, attributable to emigration and the other causes leading to a decline in the population. From these statements it will be perceived that the people of Great Britain and Ireland but little exceed 29,000,000, and that the population of the United States has not only, for the first time, reached that of the mother country, but has run beyond it near two and a half millions of people.—Federal Census, 1860.

† Democratic majorities.

Population of the United States.—The total population of the United States, 1860, is 31,443,522, of which 3,968,700 are slaves, and 487,970 are free colored. Aggregate increase since 1850, 36.59 per cent. The fifteen slaveholding States contain 12,240,000 inhabitants, of whom 8,639,000 are whites, 261,000 free colored persons, and 3,960,000 are slaves. The actual gain of the whole population in those States from 1850 to 1860, was 2,627,000, equal to 27.38 per cent. The slaves advanced in numbers 740,931, or 23.44 per cent. This does not include the slaves of the District of Columbia, who decreased 502 in the course of the ten years. The nineteen free States and seven Territories, together with the Federal District, contained, according to the eighth census, 19,201,544 persons, including 37,749 Indians; of whom 13,936,579 were white, and 237,216 free colored. The increase of both classes was 5,698,608, or 41.24 per cent. According to the best estimates, the total population of the United States, at the close of the present century, will amount to 100,000,000, as follows, viz: 1870, 42,328,432; 1880, 56,450,241; 1890, 77,236,989; 1900, 100,355,802. The excess of the Males is about 730,000. The number of Deaf and Dumb persons is 14,266; Blind, including slaves, is 12,635; Insane, including slaves, 23,996; Idiotic, including slaves, 18,868.

Wealth.—The assessed value of Real Estate, \$6,978,106,049; Personal, \$5,111,553,866. Total, \$12,084,660,005. True value, \$16,159,616,068.

Mortality.—The number of deaths in the United States during the year 1860, was 892,821—about 1 in 79.

Education.—During the year 1860 not far from \$5,000,000 of persons received education in the various educational institutions of the different States, or about one-fifth of the white population of the country.

MILITARY DEPARTMENT OF THE STATE.

In reorganizing the military of the State under the law of 1866, the troops mustered into the service, as the National Guard, consist of one Division, which is divided into six Brigades.

OFFICERS—GENERAL STAFF.

Governor F. F. Low..... Commander-in-Chief.

Staff of the Commander-in-Chief.—Brig. Gen. Geo. S. Evans, Adjutant General and Chief of Staff; Col. J. B. Frisbie, Chief Engineer; Col. S. Pattee, Paymaster; Col. J. M. McNulty, Surgeon; W. H. L. Barnes, Judge Advocate; Lieut. Col. William Harney, T. R. Mosely, William B. Hyde, Thomas W. Knox, Steve Venard, Aids-de-Camp.

Maj. Gen. L. H. Allen, Commanding National Guard, Cal.

Staff.—Lieut. Col. S. C. Ellis, Assistant Adjutant General; Lieut. Col. A. W. Von Schmidt, Engine Lieut. Col. D. Norcross, Paymaster; Lieut. Col. J. H. Stearns, Quartermaster; Lieut. Col. / Houston, Commissary; Lieut. Col. George Hewston, Surgeon; Lieut. Col. Robert Simson, Ordnance Officer; Lieut. Col. J. W. Brunning, Judge Advocate; Majors Theodore A. Mudge, James L. B. Samuel P. Middleton, Aids-de-Camp.

John Hewston, Jr.....	..3d Brigade.	John Bidwell.....	".....	..5th Brigade.
W. A. Davies.....	".....	".....	".....	..6th Brigade.

AREA AND LANDS OF THE STATE.

The State of California extends from latitude 32° 20' south to 42° north, is seven hundred miles long, with an average width of two hundred and twenty miles, making an aggregate area, including all interior lakes, bays, and precipitous mountains, of 154,116 square miles, or 98,634,240 acres. Of this amount it is estimated that 65,000,000 are adapted to agriculture, 15,000,000 to grazing purposes, and 4,600,000 are swamp and overflowed lands. The greater portion of the latter is capable of reclamation, and is, to a great extent, each year being added to the cultivated lands of the State. The area of the lakes, bays, and mountains is about 14,000,000 acres. Congress has made the following grants of land to the State:

For Common School purposes—the sixteen and thirty-six sections in each township, or lands in lieu thereof, amounting to.....	5,479,680 acres.
For Internal Improvements (changed to schools).....	500,000 "
For a Seminary of Learning.....	46,080 "
For an Agricultural College.....	150,000 "
Total for Educational Purposes.....	6,175,760 "
Also, for Public Buildings.....	6,400 "
Besides about 4,600,000 acres of swamp and overflowed lands.	

Of the 65,000,000 acres of agricultural land, there were returned by the County Assessors, for the year 1865, as under fence, 4,055,690 acres, and under cultivation 1,504,680 acres. It will thus be seen that there is but six per cent. of the agricultural land of the State under fence, and little over two and one-half per cent. under cultivation. The returns for 1866 will increase these estimates about fifteen per cent.

RESOURCES—AGRICULTURE.

With a most genial climate, and a soil unsurpassed for fertility, nowhere under the sun is the labor of the agriculturist more amply repaid than in the region comprised within the boundaries of the State of California; and the wonderful vegetable productions of this region are as widely celebrated as the marvelous development of her mineral wealth, which followed the discovery of the gold in her mountains. Every quality of soil, as well as varied degrees of temperature, favorable to a varied vegetable growth, is encompassed within her borders. In this mild region, both animal and vegetable life flourish to a degree unknown in more rigorous and less favorable latitudes. All the necessaries of life, and almost all the luxuries, are produced upon the soil, and the varied operations of the husbandman can be successfully carried on with but little interruption. While the grape, the fig, the orange, the olive and pomegranate flourish here as luxuriantly as on the shores of the Mediterranean, those great staples which supply home consumption, and enter largely into the commerce of the world, wheat and the other cereals, flax, hemp, cotton, tobacco, with every variety of vegetable, can be produced from the soil.

TABLE

Exhibiting the Number of Acres of Land Inclosed and under Cultivation in California, during the year 1863, with the amount of Wheat, Barley, and Oats, raised thereon.

The preceding exhibit for 1865 are the returns collected, with few exceptions, by the County Assessors during their official duties for the year 1866. As the yearly assessment is levied between the first of March and the first of August of each year, the statistics of the crop collected by the Assessors refer to the year preceding. When it has been found necessary to seek other channels of information, the most reliable have been applied to, and the greatest care exercised to use such estimates only as would approximate to the actual amount raised.

WHEAT.—The amount of land in cultivation in 1865 was 481,472 acres, producing 11,579,127 bushels, an average of over 24 bushels per acre. The county of Humboldt averaged 32 bushels, the counties of Monterey, Santa Clara, and Santa Cruz averaged 30, Alameda and Butte 25, and Sonoma 18. The county of Santa Clara is the heaviest wheat growing county in the State: number of acres, 93,000, producing 2,790,000 bushels. These figures are an improvement on those for the year 1858 of 19½ bushels per acre, the latest complete returns heretofore published. "It is now a well ascertained fact, established by several years' experience, that California stands without a rival in respect to her capacity for producing wheat and other small grains. She produces it in larger quantities to the acre, of better quality, with more certainty and with less labor than any other country in the known world." Instances are frequent of particular crops averaging forty and fifty bushels to the acre.

BARLEY.—The number of acres in cultivation in 1865 was 558,916, producing 15,462,783 bushels, an average of nearly 27½ bushels per acre. The county of Colusa produced an average of 48 bushels, Santa Cruz 46, Alameda 41, and Santa Clara 37 bushels to the acre. Santa Clara is the heaviest barley growing county in the State: number of acres, 90,000, producing 3,400,000 bushels. The soil of California is admirably adapted to the cultivation of this cereal. In many portions of the Sacramento and other valley lands of the State, the product will average seventy-five bushels to the acre, and in the red lands of the mountain districts, the yield is correspondingly large. As many as half a dozen successive annual crops are harvested from one sowing, the volunteer crop of the second season producing a greater yield than that of the preceding year. In one instance, in the Santa Clara Valley, the fifth crop from a field of fifty acres averaged a yield of forty-two bushels to the acre.

OATS.—The number of acres in cultivation in 1865 was 77,776, producing 2,078,627 bushels, an average of 26½ bushels per acre. The county of Lake yielded an average of 62 bushels, Butte 46, and Alameda 45 bushels per acre. Although this product turns out well in most instances, from the superiority of the yield of wheat and barley, and the greater demand for these cereals, there is not that attention devoted to its culture which is given to it in the agricultural districts of the Atlantic States.

INDIAN CORN.—The returns from forty-one counties give the crop of 1865 as follows: acre; under cultivation, 31,235, producing 1,003,914 bushels; average, 32.45 bushels per acre. Los Angeles County produces 180,000; San Luis Obispo County, 80,000, and Sonoma County, 145,335 bushels: each averaging about 40 bushels per acre. Yolo County returns 82,575 bushels, averaging 45, and Sutter, 40,160 bushels, averaging 56 bushels to the acre.

* For the purpose of comparing the prolific character of the soil of this State with that of New York, we have compiled from the census of 1855, the following interesting statement of the productions of that State: Wheat—acres cultivated, 795,481; bushels, 9,082,402; average, 11½ bushels. Barley—acres, 212,608; bushels, 3,563,540; average, 16½ bushels. Oats, average 29½ bushels; Rye, 10½ bushels; Buckwheat, 8½ bushels; Corn, 21 bushels; Potatoes, 70 bushels; Peas and Beans, 16 bushels per acre, each.

RYE AND BUCKWHEAT.—The returns from thirty counties give the crop of rye of 1865 as follows: acres, 1686, yielding 33,411 bushels, an average of about 20 bushels per acre. Butte County returns 200 acres, yielding 3,000 bushels, and Yolo County, 75 acres, 3,000 bushels, each averaging 40 bushels per acre. The crop of buckwheat for the entire State is estimated at 1,000 acres, yielding 24,000 bushels, an average of 24 bushels to the acre.

PEAS.—Returns from twenty-six counties are as follows: acres under cultivation, 2,998, producing 89,232 bushels, an average of nearly 30 bushels to the acre. The yield of Humboldt County is 33,890 bushels, an average of over 40 bushels per acre; and Sacramento County, 2,136 bushels, averaging over 50 bushels per acre.

BEANS.—The returns of the crop of 1865 are: acres under cultivation, 5,622, producing 150,110 bushels, an average of 26½ bushels to the acre. San Luis Obispo County produces 70,000 bushels, an average of 35 bushels per acre; and Yuba County, 2,500 bushels, at an average of 50 bushels per acre.

POTATOES.—Returns of the crop for 1865 are as follows: under cultivation in forty counties, 32,624 acres, producing 1,372,441 bushels, an average of 42 bushels per acre. Humboldt County produces a crop of 205,965 bushels, an average of 218 bushels to the acre; Marin, 200,000 bushels, an average of 100 bushels; Sacramento, 69,000 bushels, 150 bushels to the acre, and Sonoma, 235,279, an average of 62 bushels per acre.

SWEET POTATOES.—Returns from eighteen counties for the crop of 1865 are as follows: acres under cultivation, 812, producing 90,475 bushels, an average of 111 per acre. Merced County returns 10,500 bushels, averaging nearly 300 bushels per acre; and San Joaquin, 9,443, an average of 200 bushels to the acre.

HAY.—Returns from forty-four counties of the crop of 1865, give the number of tons at 375,893, at an average of 1.17 tons to the acre. Several of the counties average over two tons per acre, and 12 counties average 1½ tons per acre. The crop of the entire State is estimated at 500,000 tons.

HONEY BEE.—The experiments to introduce the honey bee into the State have met with the most complete success. The number of hives returned for 1865 is about 27,000, yielding about 300,000 pounds of honey annually.

BUTTER AND CHEESE.—The returns from forty-two counties for 1865, exhibit a production of nearly 2,250,000 pounds of butter. The largest yield in a single county is in Marin, which produced 932,427 pounds. Sacramento produced 331,120 pounds, and Sonoma County 203,794 pounds. It is estimated that the yield of the entire State will aggregate 3,000,000 pounds. Returns from twenty-seven counties show a production of 1,601,782 pounds of cheese. Marin County yielded 523,000 pounds; Santa Clara County, 500,000 pounds; and Santa Cruz, 231,000 pounds.

VEGETABLES.—It is estimated that there are in this State 40,000 acres devoted to the production of

vegetables of the following kinds: the following are the most common:—

vegetables, of which almost every variety is produced in the greatest abundance. As an evidence of the capacity and character of the soil, we append the following description of products exhibited at a recent State Agricultural Fair:

"Two pumpkins from Sacramento, weighing two hundred and ten and two hundred and forty pounds; a beet grown by Col. Hall, of Sacramento City, weighing seventy-three pounds; a carrot, weighing ten pounds, measuring one foot and eight inches in circumference and three feet and three inches in length—there were fifty in the same bed of equal size, the seeds were sown on June 25th and the carrots dug September 20th; a tomato, seventeen inches in circumference; a squash weighing one hundred and forty-one pounds; an onion, weighing two pounds and fifteen ounces, and measuring twenty-two inches in circumference; a corn stalk twenty-one feet and nine inches in height; water melons from near Nevada—twenty-seven gave an aggregate of five hundred and fifty pounds; a sweet potato from San José, weighing eleven pounds and two ounces; an Irish potato, from Bodega, weighing seven and a quarter pounds; a bunch of potatoes of the Oregon red variety, from a single eye, weighing ten pounds, grown at the forks of the Turnback Creek, near Sonora; grapes—several bunches, weighing over four pounds each; peas, second crop, fine and good, from Los Angeles, a citron lemon, sixteen and a half by eighteen and three-quarters inches in circumference, weighing two pounds and fourteen ounces, from Los Angeles; fig tree—a slip one foot in length and five-eighths of an inch in thickness, was planted April 1, and in the month of September following, was eleven feet and six inches high, and nine and a quarter inches in circumference at the base, with a corresponding growth of branches; peach trees, in twenty-eight months from the planting of the seed, bore fruit over nine inches in circumference, and weighing from seven to eight and a half ounces; there were thirty-four of these large peaches on one tree; an apple, measuring fifteen and one-third inches each way, weighing twenty-three ounces, grown in the Yamhill Orchard."

COTTON.—Within the past few years, during the time which this great staple commanded so large a price, owing to the circumstances of the case, the culture of cotton attracted much attention from the agriculturists of this State. In the southern portion of California, where the soil and climate are peculiarly favorable, and where the facilities for irrigation are abundant, the experiment has been tried upon an extended scale, and found to be a thorough success. The first attempt to cultivate this staple to any considerable extent here was made by Matthew Keller, of Los Angeles, to whom was awarded the premium of \$3,000 offered by the State for the first cotton plantation. During the last season, increased crops were grown in Los Angeles, Tulare, and Fresno counties. That in those sections of the State, and, in fact, along the whole southern coast, this would prove a highly remunerative crop, is a fact established beyond question or doubt.

TOBACCO.—Although the soil and climate of this region appears to be well adapted to the culture of tobacco, and the manufacture of this article in San Francisco during the past year amounted to considerably over a million of dollars, there has not been that attention devoted to the matter that the subject deserves. Limited quantities only have been raised in Sacramento, Contra Costa, Humboldt, Sonoma, San Joaquin, San Mateo, Shasta, Trinity, Los Angeles, and other counties, but the raw material manufactured here is almost entirely imported from abroad. Among the liberal premiums offered by this State in 1863, for the encouragement of the cultivation of this staple, but one, that of \$300 offered for the first one hundred

red bales, which crop was produced by Thomas Edwards, of Sacramento, has been taken. The California leaf produces a superior article of smoking tobacco, but there is little of it manufactured at present for chewing.

RICE.—Notwithstanding the abundant field offered by the immense and unsurpassably fertile tracts of swamp, overflowed, and tule lands of the State for the successful cultivation of rice in California, where an immense Asiatic population creates such a heavy demand for this article, nothing has yet been done in the matter. The time, however, must sooner or latter arrive when this will form one of the staple products of this portion of the Pacific.

SUGAR CANE.—Although the experiment of cultivating sugar cane has been tried in some of the southern counties of California and found to succeed, yet there has never been a sufficient quantity raised to warrant any attempt at its manufacture except in limited quantities. Considerable quantities of the sorghum, or Chinese sugar cane, are produced in various portions of the State, from which a fair article of syrup and molasses is manufactured.

HOPS.—The soil and climate of California proving most propitious for the cultivation, ripening and curing of the hop, the growth of this crop has, during the past few years, assumed a considerable degree of importance among the staple products of the State. The absence in the climate here, during the growing season, of that excess of moisture which in other hop growing localities produces the mildew which ruins the crop, is one great advantage possessed by the grower here. The damage caused the article by a long sea voyage, and its rapid deterioration by age, are also largely in favor of the home grown article. The crop raised last season was large, averaging about 600 pounds per acre. The prices ranged from 70 to 87 cents per pound.

SILK CULTURE.—To Mr. L. Prevost, of San José, belongs the credit of being the pioneer in this important department in California. Upon the arrival of that gentleman in this State, in 1849, he was attracted to the facilities offered by the climate for the production of silk. Acting upon the impression, he procured from France the seeds of the mulberry, from which he raised a quantity of trees. After two importations of silk-worm's eggs from China, which failed to hatch, he procured some from France, with which he was successful, and in 1860 raised a quantity of superior cocoons. Since that time this gentleman, as well as numerous others in the Sacramento Valley and the southern portion of the State, have gone extensively into the business, planting out large orchards of the mulberry, and producing last season a considerable quantity of cocoons. Enough has been done to prove that this is bound to assume an important position among the products of this coast. The erection of the extensive establishment at San José for the manufacture of silk is a fair indication of its importance.

FLAX AND HEMP.—Notwithstanding the predictions that the dryness of the summers on the coast would prove an insuperable barrier to the successful production of this branch of textile fabrics, sufficient quantities of these articles have been produced here to show that they can be cultivated with a profit. The erection of the extensive oil and paint mill at San Francisco, during the past season, affording a steady and remunerative market for all the flax seed that can be produced, will give an impetus to the business. Hemp of a superior quality has been raised for some years past in several of the valley counties. A quantity produced in Sonoma County last season met with a ready sale at the cordage manufactory in San Francisco, on account of the strength and superior quality of its fiber.

GRAPE AND WINE GROWING.

Next to the mineral resources and extended mining operations of California, the culture of the grape and the manufacture of wines and brandies from this product are the most important. Every portion of the State, from the extreme north to the southern boundary, has proved to be admirably adapted to this purpose; even the mountain sides of the mining regions, once deemed incapable of producing anything but gold, teem with millions of vines, which produce superior grapes, from which hundreds of thousands of gallons of wine are made each year. Previous to the passage of the act of Congress, levying a tax of two dollars per gallon on native brandies, the distillation of this article was carried on to a considerable extent, and was rapidly increasing; but the heavy impost has caused an almost entire suspension of this highly important adjunct of the grape growing interest. The soil and climate of California have proved by actual experiment to be adapted to the successful cultivation of every variety of the grape, whether for the table, the manufacture of wines and brandies, or prepared in the form of raisins. The average crop of a well cultivated vineyard in full bearing is about seven tons per acre. The average yield of each vine is about fourteen pounds, the amount necessary to produce a gallon of wine.

TABLE

Showing the Number of Grape Vines cultivated, and the product of Wines and Brandies, in the State during the Year 1865:

				Yuba	900,000	38,200	6,000
Carried forward ...	13,497,848	858,223	77,048	Totals	28,278,244	1,433,933	101,159

Total number of vines growing 1865, 28,278,244, of which it is estimated 5,600,000 are bearing. Wine manufactured, 1,433,933 gallons; brandy, 101,159 gallons. These figures will be materially increased by the returns for the year 1866, which are estimated as follows: vines planted, 35,000,000; wine manufactured, 2,100,000 gallons. The Counties of Los Angeles, Sonoma, Santa Clara, El Dorado, and Yuba exhibit a large excess over the previous year, and throughout the State the wine growers generally are manifesting an increased interest in the development of this important branch of our resources.

FRUITS.

There is probably no area of territory of the same extent in the world which produces so great a variety of the fruits of the earth as is included within the boundaries of California. This is mainly attributable to the great varieties of soil and climate embraced within the limits of the State. All the harder productions peculiar to a rigorous northern climate are here found in abundance, along with every variety of tropical fruits peculiar to the milder latitudes. The apple, peach, pear, plum, nectarine, grape, fig, orange, lemon, citron, pomegranate, and other tropical varieties, are produced here in abundance, along with the almond.

* Date of
15; blackberry
July to Decem
peaches, June
berries, May

English walnut, and other varieties of nuts. Of apples and pears, it is not uncommon in some localities, to find two, and even three crops produced in a single season. The oranges grown in the vicinity of Los Angeles, and in other portions of southern California, are an abundant crop, and of a quality superior to those imported from abroad; while the almonds, of which considerable quantities of the soft-shelled variety are raised, are fully equal to the best qualities imported from Languedoc, and other districts in the south of France. The cultivation of the best varieties of the fig has largely increased within the past few years, and when the requisite care is devoted to the preparation of this fruit the imported article will be driven from the market. California raisins are already a staple article of trade; and as the growth of the grape in this region is nowhere surpassed in the world, the time is not far distant when this article will, like her extraordinary wine product, take a high rank as an article of trade. The peanuts grown in California, of which the crop of last year amounted to 200 tons, are of quality, in point of size and flavor, far superior to any imported from abroad. The number of fruit trees in the State, exclusive of the grape and other vines, is estimated at about 4,500,000, of which 2,500,000 are peach, 1,250,000 apple, and the balance of different varieties. Value of the fruit raised during the year 1865 is estimated at \$1,625,000.*

OLIVES.—In the establishment of the Missions, in the early history of California, great attention was devoted to the cultivation of the olive, from which considerable quantities of oil were manufactured. Although these establishments have mostly gone to ruin, yet the large orchards, still remaining, show the extent of their cultivation in former times. The trees bear abundantly, and the olives put up for the market are of a superior quality.

LIVE STOCK.

Prior to the discovery of gold in California, and the rush of immigration to these shores, almost the entire pursuits of the native population were confined to the raising of horses and cattle, with sparse flocks of sheep. The fertile plains of this then pastoral region were dotted with immense bands of horses and herds of cattle, and the annual *rodeos*, when the rancheros met to identify and brand their stock with their peculiar individual brands, were seasons of festivity and excitement. The staple exports from this coast in those days of primeval simplicity were confined solely to hides and tallow—Monterey, Los Angeles, Santa Barbara, and San Diego constituting the principal ports from whence these articles were shipped. Along with immense droves of elk and herds of antelope, bands of mustangs, or wild horses, were found on the plains in great numbers, and until within a few years were still to be found in portions of the great Tulare Valley. In those days, with all these countless herds of cattle, those products of the dairy, milk, butter and cheese, were almost entirely unknown. Since the taking possession of this country by the Americans, stock of all kinds has largely increased, and the breeds vastly improved. Instead of the untamed mustang, or almost equally wild Spanish horse, we have the thorough-bred American, between which and the native produces a quality of saddle-horse nowhere surpassed. The character of the California roadster stands deservedly high, and the carriage and draft horses raised here are also a superior class. The best breeds of the short-horned Durhams, imported from the Atlantic States and Europe—unsurpassed either for milking qualities or for beef—have entirely driven out the lank, long-horned natives of the country; and the fine-wooled Merino, Leicester, and Cotswold, with the heavy-bodied Southdown, have taken the place of the coarse-haired flocks of former days. The earliest improvements in this department were from the importations of the Hudson's Bay Company, since which time valuable additions have been made from abroad. Number of Horses in the State, 185,033; Sheep, 983,886; Cattle, including cows, 500,000; Hogs, 212,101. Value of cattle, hogs, and sheep slaughtered during the year 1865 is estimated at about \$6,000,000.

POULTRY.—Number of Poultry of all kinds in the State, 850,000. Eggs produced per annum, 2,500,000 dozens.

WOOL AND HIDES.—Notwithstanding the general opinion which prevailed for several years after the settlement of the State that the business of wool growing could never be profitably pursued in California, the results of the past few years, and the extensive and increasing manufactures here, have forever set that question at rest. The first flocks were composed entirely of the native or New Mexican sheep; shortly after the commencement of the first immigration to these shores, herds of sheep from the Western States were driven here across the plains; and the best breeds belonging to the Hudson's Bay Company, together with others from Australia, were introduced here about the year 1854. Since that time the herds of sheep have been still further improved by the addition of the finest varieties of thorough-bred stock from Vermont, New York, and other States, until the quality of the wool produced here will compare favorably with that produced abroad. Owing to the favorable influences of the climate and abundant feed, the sheep raised here produce a heavier fleece than is the case in other countries, and, owing to the same causes, they increase far more rapidly than elsewhere. With some varieties five lambs are produced at a birth, and with

* *Date of Appearance of Fruits at San Francisco.*—Apples, June and throughout the year; apricots, May to June 15; blackberries, June and July; cherries, June and July; figs, July to November; gooseberries, May and June; grapes, July to December 15; limes, November to January; nectarines, July 15 to August; oranges, November to March; peaches, June to November; pears, July to December; plums, June to August; quinces, September to January; raspberries, May 20 to August 15; strawberries, January to December.

most breeds triplets and twins are common. The sheep range of this State is extensive; as the season advances, and the feed dries up on the foot hills, abundant pasturage is afforded in the woods that skirt the snow belt of the mountains. The production of wool in the State, for the year 1865, was, according to the Mercantile Gazette, 6,455,070 pounds. It is estimated that 6,546,750 pounds were clipped during the year 1866.

HIDES.—The number of Hides exported during the year 1865 was 340,690, and during the year 1866, 157,358, of which about one-third are received from the Mexican ports and Oregon. A large number of hides are annually manufactured into leather in this State, which renders it difficult to obtain an approximation to the actual yield.

MINERAL.

MINERAL RESOURCES OF THE STATE OF CALIFORNIA.

BY W. S. KEYES, MINING ENGINEER.*

The opening of the year 1848 marks the beginning of a new era in the history of modern civilization.

A small company of hardy pioneers had sought the western limit of the continent, and, under the leadership of Gen. Sutter, had founded the colony of New Helvetia. These few adventurers formed the advance guard of an army of immigrants comparable only to the flood of population to America immediately subsequent to its discovery by Columbus.

Some of the members of this company discovered, on the fourth of January, 1848, a few particles of gold on Mormon Island, Sacramento; but it was on the ninth of February that Marshall, while digging a race for Sutter's mill, near the site of the present town of Coloma, made his discovery, the report of which had, by the Spring of 1849, spread to every hamlet in the United States.

That the northwestern provinces of Mexico, of which California then formed a part, were rich in mineral wealth, had, long previously to 1848, been understood and stated by men of science and practiced observation. We have also good reason to believe that the Jesuit missionaries were convinced of the fact of the existence of the precious metals, but forbore either themselves to inaugurate extensive explorations, or to encourage the pursuit on the part of others.

Professor Dana observed, in the year 1842, on the banks of the Umpqua River, in southern Oregon, certain talcose and micaceous schists, which were auriferous, and, further, distinctly stated that similar pieces of rock had already been met with on the line of the Sacramento River, in California.

Likewise De Mofras, who made a survey of the country for the French Government, in 1841, mentions, in his report, the fact that a gold mine was worked near San Fernando, Los Angeles, and that there was produced from it about one ounce of gold per day. He also alluded to the similarity of the schists of the foot hills of the Sierras to the gold-bearing rocks of Mexico.

Moreover, the Mexicans obtained, in the year 1842, a "bonanza" of thirty to forty thousand dollars from the superficial deposits of the San Francisquito Cañon, Los Angeles County. Of this amount one thousand dollars and upwards was carried, by Don Alfredo Robinson, through Mexico, to the Mint in Philadelphia; the certificate of deposit for which he still preserves.

This gentleman has thus the honor of having been the first American to bring California placer gold into the United States.

These deposits were ultimately abandoned by the Mexicans, owing chiefly to a deficiency in the water supply. From time to time, however, some needy native would laboriously wash out with his "batea," sufficient gold to fill a large sized eagle's quill; on obtaining which he would return to the "pueblo" of Los Angeles, to live lux-

viously as long as his treasure lasted. The greater portion of the gold found in these placers was fine; but occasionally there were found pieces of the size of a dime.

This re-discovery of gold by Marshall, taking place after the occupation of the country by the Americans, opened up to the vision of the old world not only the rich placers and quartz mines of California, but also induced such a search after the precious metals, as brought to light the gold fields of Australia, the silver mines of the State of Nevada, and more recently the gold and silver regions of Oregon, Arizona, Montana, Idaho, and the interior territories.

As soon as the facts of Marshall's discovery became substantiated, the hopeful and vigorous, the energetic and adventurous youth of all nations began to flock to the shores of the modern El Dorado. The early part of 1849 saw many thousands on their way, and other thousands making all haste to set out. Once arrived within the limits of California, the onpouring wave of population quickly spread itself over the interior portions of the State, and, with eyes sharpened by an eager longing for sudden fortune, began an ardent search after the half hidden treasure of the valleys and foot hills of the Sierras.

Myriads of ages had rolled away since the yellow dust, set free from some deeply rooted vein system, washed, tossed, and rounded by the down-pouring floods, sank quietly to the "bed rock," there to await the all-searching energy and indomitable perseverance of the composite Anglo-Saxon race.

Naturally, the first rude efforts of novices in the metallurgic art were directed to the simplest and readiest means of separating the precious metal from the worthless matter accompanying it. The ordinary pan, the rocker, long tom, sluicing, and hydraulics, as the art of mining became better understood, supplemented and gradually supplanted the at first unaided labors of the adventurers, until the present perfected means of crushing and amalgamation have introduced and domiciled in the State a comprehensive and lasting industry.

Before treating more at length of the various methods of mining for and reducing the different metals with which the lavish hand of Nature has filled the land, it may not be out of place, here, briefly and cursorily to touch upon the limits and extent of the mineral regions of California. A glance at any good map of the State will readily show two main chains of mountains: the Coast Range, outlining the western coast and having a general northwest and southeast course, and the Sierra Nevada, lying on the eastern border and separating the States of California and Nevada. These two mountain systems are parted longitudinally through the central portions of the State, by the long valley drained by the rivers Sacramento and San Joaquin. Towards the north and towards the south these ranges again unite, and nowhere at these points has the line of demarcation between them been, as yet, sharply determined. On the eastern flanks of the Sierras are found the principal silver regions of the coast; while the western slopes are the chief habitus of the gold quartz, placer deposits, and copper mines. The Coast Range has had, here and there, some trifling placers and one or two gold quartz veins; but its economical importance is due more to its valuable beds of coal and sulphur; its rich deposits of cinnabar and asphaltum; its borax, soda, and petroleum; as well as various minor minerals, lime, gypsum, clays, etc.

EXTENT OF THE GOLD REGION.

The gold region of the State of California, embracing, under this term, all superficial detrital formations as well as the injected or infiltrated system of gold quartz veins, may be said to extend from the thirty-fourth to the forty-second parallel of latitude: a distance of about five hundred miles, in a northwest and southeast direction, conformably to the general trend of the main chains of mountains. This tract of country has a varying width up to one hundred miles; being narrow towards the south but widening out in the upper and middle counties, and embracing an area of upwards of twenty thousand square miles.

The principal field of mining operations has, however, been limited to the range of country extending from the lower edge of the county of Mariposa, on the south, to

the upper limit of the county of Plumas on the north; in length not exceeding two hundred miles. This stretch of country is largely covered with placer formations, and has very numerous quartz veins. The volcanic scoriæ and lavas poured forth from the craters of now extinct volcanoes, have, however, in many places, so deeply overlain the gold bearing strata as very materially to thin out the regions of superficial exposure, and thereby to limit the fields of profitable prospecting. Assuming a length of two hundred miles, and an average width of only twenty-five miles, we have an auriferous area of five thousand square miles in the central part of the State. Added to this area the mining region centering around Clear Creek, in Kern County, and a comparatively unexplored tract of country in the northern part of the State, in the counties of Shasta, Siskiyou, Trinity, etc., and we have a gold bearing zone sufficiently large to warrant the probability of realizing from the State, for centuries to come, a very considerable gold product.

The gold belt extends through California into Oregon, and probably thence through British Columbia into the Russian Possessions.

Both the northern and southern counties of the State have been retarded in their development by causes, which year by year are giving way to conditions more favorable to enterprise. The former are, as compared with the central counties, difficult of access; are inhabited by a hardy and warlike race of Indians, and are largely covered with eruptive volcanic matter. The latter, comprising very nearly one-half of the superficial area of the State, have, in like manner, been but little explored.

Water is in many places with difficulty attainable; the great Mojave Desert fills a considerable portion of the counties San Bernardino and San Diego; and the most valuable lands are covered by Spanish grants, so that but trifling inducements are offered to the settler or prospector.

The many millions of gold, which California has contributed to stimulate the productive industry of the world, have been derived from three classes of deposit, viz: the Superficial Placers, the Deep Placers, and the Quartz Veins.

In the early history of the country, enterprise contented itself with those of the first class; mainly, because, besides a pick, shovel, pan, and rocker, no other capital was required—saving and except a strong arm and an adventurous disposition. Fabulous stories of the richness of banks and bars have come down to us, which have, doubtless, lost no roundness of proportion while passing from mouth to mouth. That many nuggets, weighing each a number of pounds, were discovered, is, however, a matter of authentic history. Most of them were melted down and turned to immediate practical account, instead of finding their resting places on the shelves of Government or private cabinets.

Now that the mineral interests of the United States have attained so great a prominence and bid fair to exercise an ever-increasing influence on the national economy, it is time that steps be taken by the authorities to continue to collect and publish reliable statistics of production; estimates of yield and profit, and detailed maps of the mining localities; and further, to establish technical schools for instruction in the various branches of mining for the precious and useful metals and minerals, somewhat similar in plan and scope to the mining schools of Saxony and France.

The superficial placers have furnished the capital which has been expended with such reckless energy, not, however, always combined with the best of judgment, to develop the resources of California and the other States and Territories on its borders.

PLACERS.

The term "placer" is derived from the Spanish, in which language it is used to designate merely such surface deposits as yield up the precious metal by a simple washing in a "batea" (species of pan). The genius of the American miner has, however, greatly extended the significance of the term, and has rendered valuable vast fields of auriferous earth containing too small a per centage of gold to be worth the saving by the slow and laborious methods of washing practiced by the Mexicans.

These deposits, embracing under the generic term of placers both the loosely aggregated earthy particles and the compact cement, are evidently the result of the disintegration of certain primitive quartz veins, through the eroding action of water. The auriferous detritus thus formed was deposited along the borders of inland lakes, on the shores of former seas, or found its resting place in the channels of now extinct water courses, where pressed upon for æons by volcanic matter, either scoriaceous or liquid, it has hardened into a species of conglomerate so tenacious as to require for its disintegration the use of stamps. The simple surface deposits have been found over a very extended area, and at altitudes above the sea varying from 1,000 to 5,000 feet.

We find auriferous earth more or less valuable as far south as San Bernardino and Los Angeles counties, in Holcomb Valley, Lytle Creek, the foot-hills of the San Fernando Mountains, in San Francisquito Cañon, and some other points in the Coast Range in the lower half of the State. Inside these mountains, in places on the rivers Kings and Kern, in Kern County. Further north, along the coast, placers of some value are reported in Monterey County near the Mission San Antonio; these have been purchased and are to be worked by one of the Chinese companies. Traces of gold are to be found in San Mateo County, and in Saucelito in Marin County. Placer deposits have been reported also in Mendocino County.

Not the least curious of the various forms of gold detritus are the so-called "Sailor's Diggings," located on the sea-shore, two and a half miles south of Crescent City, in Del Norte—the northwesternmost county of the State. These deposits, under the name of the "Gold Beach," gave rise to a great excitement in the year 1854, which caused an exodus of the more credulous portion of the mining population; only to return after having, by a personal inspection, dissipated the illusion. This formed one of those migratory movements, which, fortunately, are becoming year by year of less frequent occurrence, and exercise a less marked effect on the permanent prosperity of the State.

In these diggings, the pay dirt or sand extends back from the ocean in places a distance of one hundred yards, and claims have been located along the shore for many miles. The pay stratum does not appear to be constant either in richness or locality, but varies with the state of tides, currents, etc. The gold is saved by washing in long toms, six by four feet, having near the upper end a sieve made of perforated sheet-iron, and underneath a series of amalgamated copper plates.

In the most northerly counties, Trinity, Shasta, and Siskiyou, placers are still worked, and new discoveries are reported—particularly in the vicinity of Yreka, on Humbug and Cottonwood Creeks, Siskiyou.

The central counties, from Mariposa to Plumas, inclusive, have had the most extensive and most lucrative surface diggings. These deposits have been mainly worked out and have fallen into the hands of the Chinese, who patiently and laboriously glean over the fields abandoned by the whites. This people are contented with a small return for their labors; but their contributions, small in themselves individually, nevertheless make up for the whole State a very considerable aggregate. Within three years after the discovery at Coloma, the gold produced from the superficial placers alone amounted to an annual average of over 60,000,000 of dollars; and the year 1858 saw the highest amount produced in the State. So intense was the search after this species of mines and so numerous the seekers, that the richest deposits were soon exhausted, and the rocker and long-tom became incapable of washing a sufficiency of low-grade earth to return a profit.

The necessities of the case spoke loudly to the inventive genius of the gold-seekers, and the method of mining called "Hydraulics" sprang into existence, which has continued to offer a profitable field for enterprise up to the present day.

HYDRAULIC DIGGINGS.

Under the head hydraulic diggings are to be embraced all those varieties of placer deposits which are worked by large bodies of water, with the help of flumes, ditches, etc.—in its more restricted sense, the term is applied to those

accumulations of auriferous detritus which may be disintegrated and washed down by the force of streams of water issuing from contracted orifices under a very high hydraulic pressure. This species of washing is chiefly used for working the hills and deep placers, or cement diggings. The quantity of water requisite for the purposes of hydraulics could not be supplied at all points, either by damming the streams or forming reservoirs by collecting the winter's rains; and hence, in order to work large fields of auriferous earth distant from a water supply, there was built an intricate and extensive system of canals, flumes, and ditches. Large capitals were embarked in these enterprises, and water was brought from the High Sierra to wash the earth of the foot-hills. Costly excavations, lofty flumes, and many miles of ditches attest the giant energy of the early gold-seekers. The water thus turned to economic uses, was made to perform, under the guidance of man, precisely the same kind of labor as the streams of ages had performed in the vast laboratory of nature. The heavier particles of gold dust, obedient to the laws of gravity, settled themselves on the bottoms of the sluice-boxes, which were fitted with blocks of wood, rounded stones, riffles, quicksilver, etc., to detain the precious dust, while the lighter and less valuable particles were borne down by the current.

Various ingenious contrivances, undercurrents, etc., etc., were adopted, all having in view a more thorough saving of the gold.

In many of the central counties, the bare and unsightly hills which disfigure the landscape bear witness to the prodigious wearing power of these artificial water-courses impinging against the hill-sides with the terrific force due to a head of two or three hundred feet. Frequent accidents have arisen from the unexpected detaching of large masses from the higher portions of the hills; and in some instances the ground has been so cut away as to give rise to very extensive land slides, as lately happened at Deadwood, in Siskiyou County—the mountains above that place, for a distance of one hundred and twenty yards in length, and nearly as many in breadth, slid downwards into the bed of the creek, completely blocking it up, and forming a dam which filled with water to a depth of sixty feet, and temporarily covered up a large number of claims.

A very interesting center of hydraulic diggings is at Ma Anita Hill, near North San Juan, Nevada County. Here, perhaps the heaviest blast for mining purposes, of which we have any record, was discharged during the present year, with the object of loosening the hard ground before hydraulicing. A drift was run into the hill a distance of ninety feet, from the ends of which wings were extended at right angles some sixty feet; five hundred and ten kegs of powder were placed in the tunnel, the entrance closely tamped, and the charge fired. A dull report broke upon the ear, and a mass of earth, one hundred and fifty feet deep, two hundred feet wide, and three hundred feet long, rose a short distance into the air, and fell back thoroughly disintegrated and in a fit condition for washing.

Still another species of hydraulic working consists in running long drifts under the hills, in order to tap the very extensive accumulations of auriferous gravel in the beds of ancient lakes and water-courses, which have been covered by volcanic matter and alluvium. These drifts vary in length, from a few hundreds to several thousands of feet, and have been driven, many of them, at a cost of thousands of dollars, and four, five, and even six years' continuous labor. They must frequently be blasted the entire distance, through hard bed-rock; they rise from the mouth inwardly, with a grade of one in twelve to one in twenty, and, in coming in under the gravel, are intended to be from fifty to one hundred feet below the lowest point of the deposit. Very frequently the work of years is rendered abortive from a miscalculation as to the exact locality of the gravel, and a lower gallery must be driven in before the work of hydraulicing can begin. In cases where a connection cannot be made with a neighboring claim, it is frequently necessary to run a supplementary tunnel for ventilation, or for the purpose of not interrupting work while cleaning up the sluices; it being necessary during this operation merely to turn the current from one tunnel into the other. From the end of the gallery a shaft is driven upwards to the deposit.

The pay dirt is either carried from the tunnel by tramway—the excavation taking place after the manner of working a horizontal coal bed, or the tunnel itself is made to serve as a sluice way, the boxes being set up throughout its entire length, and often extending far beyond its mouth. Where the gravel does not lie too deeply, the shaft is made to serve the purpose of a huge funnel, down and through which the entire surface of the hill is hurled, disintegrated by the fall, and washed into the sluice boxes. A representative center of this species of mining is at Smartsville, in Yuba County, eighteen miles from Marysville. There are a number of hydraulic claims in this vicinity, the most celebrated of which is the Blue Gravel Mining Company. This claim was opened by a tunnel, started in 1855; it is reported to have yielded, since March 1864, the gross amount of over \$600,000. A new tunnel, sixty feet deeper, has been started, in order more thoroughly to wash the bed-rock. The sluice-boxes are over 3,000 feet long; a cleaning up is made eight or nine times in the year, from each of which there are obtained varying amounts, up to \$50,000. One of the largest incomes derived from mining, for 1865, is credited to the principal owner in this claim. The returns from this species of mining are often very great from the accumulations of dirt mined during the dry season, the washings of which for a few weeks often yield \$100,000, and upwards; while it is by no means uncommon for the less important claims to clean up from a few hundreds to fifteen or twenty thousand. The Live Yankee claim, at Forest City, is reported to have paid over \$3,000,000. The importance of the washings will be better understood by the statement of the fact, that nearly all the gold produced on the coast has been obtained in this way; and even in California, until within a year or two, fully two-thirds is due to the washings, since only comparatively recently has the quartz vein and cement interest obtained a prominence, justly their due, as the main source of supply for permanent workings. The field of hydraulics is very nearly co-extensive with the gold belt, and gives employment, during the rainy season, to a large number of hands. The beds of auriferous gravel vary in thickness, often having a depth of eighty to one hundred feet, and in places as much as two hundred and fifty feet. The body of the deposit is composed of rounded quartz pebbles, pieces of greenstone and other rocks, mixed with sand and clayey matters, and forming a very peculiar species of conglomerate. In places where these gravel beds have been covered up, often to a depth of several hundred feet, the conglomerate has been hardened into a species of cement, the richest of which has been found in what is known as the Blue Lead.

The Blue Lead, and similar deposits, have been found, from time to time, occupying a belt of country two to three miles wide, and extending from Feather River, on the north, to the Tuolumne River, on the south. Sufficient data are not at hand to trace out, with any degree of accuracy, the channels of this preadamite river system. This is part of the plan of the geological survey of the State, which will, in due time, map out the entire network of vein, channel and placers. The task undertaken by Professor Whitney and his assistants is but faintly understood by the general public, and the accuracy and completeness of the work already done is not yet appreciated.

The gravel beds of the southern mining districts appear to have been formed in rivers, whose courses followed the same direction as the present rivers, while those of the northern mines appear to have run at right angles.

The Blue Lead is supposed to run entirely through Nevada County, to Gold Run, in Placer County. It carries a width of from thirty to one hundred feet, and upwards. Cement deposits are found at Forest Hill, in Placer; near Folsom, in Sacramento; near Placerville, in El Dorado; near Mokelumne Hill, in Calaveras, and under Table Mountain, in Tuolumne. The stratum immediately next to the bed-rock is naturally the richest, from four to seven feet of which will pay for crushing under stamps. Many of the cement claims, until recently deemed worked out, have returned gratifying results from crushing. The amount pulverized under each stamp is very large; and in order to prevent clogging up the screens, a portion of the bed-rock is stamped along with the cement. In certain of the hydraulic claims, the upper and poorer

portions of the gravel are washed down by the force of water, leaving the more indurated cement to be treated in a mill.

The report of George Black, M. E., of San Francisco, 1864, gives some computations whereby a better conception may be obtained of the extent and richness of the deep placers. Speaking of the hydraulic diggings between the South and Middle Yuba, he estimates the ground supplied with water by the Middle Yuba Canal Company at five miles in length, three hundred and fifty yards average width, and forty yards average depth. These figures give a grand total of 123,000,000 cubic yards; of this amount, only eight per cent. was worked out in twelve years, the average yield of which, as saved, was thirty to forty-five cents per cubic yard: hence, this mass of auriferous earth would yield over \$38,000,000. But the total area of the gravel deposits worked on the ridge is estimated to be equal to fifteen square miles, which, assuming a like average width and thickness, would contain, at thirty cents per cubic yard, the enormous sum of nearly \$550,000,000. Mr. Black makes some interesting estimates of the cost of manipulating one cubic yard of auriferous earth; assuming that the wages of the miners are four dollars per day, which sum, for the purposes of comparison, serves as well as the lower rates of the present time: with the ordinary pan, \$20.00; with the rocker, \$5.00; with the long-tom, \$1.00; and by hydraulics, twenty cents.

The chief expense attending this species of mining, after the deposit has once been reached, consists in the sums paid for water. Successful claims consume, on the average, from twenty to thirty per cent. of the gross yield, for running expenses. The fascination in this species of mining is kept up through long years of doubt and suspense, by the hopes of striking, sooner or later, some rich spots in the channel. Undertakings of this character, owing to the sinuosities in the river's bed, or breaks in its course, or miscalculations, often terminate unfortunately: so that this species of mining cannot arrogate to itself any peculiar immunity from the risks usually attending underground explorations.

A class of gold-bearing rock (which may be said to form a connecting link between placer and vein mining) has lately attained considerable prominence. In the County of Placer, some five miles from Lincoln, there crops out a deposit of soft and decomposed matter, some two hundred feet broad, and eight hundred feet long. At the time of the copper excitement, a large number of hills, somewhat similar in external characteristics, were located, and worked for copper, generally without finding that metal in remunerative quantities. The surface rock bears considerable resemblance to the gozzan of the copper veins. After the original holders had explored the hill for copper to no purpose, it fell into the hands of Mr. Harpending, who, observing a marked similarity between this deposit and others in Mexico, known to be prolific in gold, gave up the search after copper, and erected a mill for stamping the ore, after the manner of a quartz vein. The entire mass of the hill, as far as exposed, prospects largely in coarse gold. So soft is the rock, and so large the deposit, that each stamp can doubtless crush several tons. On the line of the copper belt, we hear of the discovery of similar masses of decomposed rocky matters, in Yuba, Placer, and Calaveras counties.

QUARTZ VEINS.

The injected or infiltrated quartz vein system forms the basis from whence were derived all the other deposits of gold bearing detritus. As such, they offer a permanent field of remunerative enterprise; a better acquaintance with which, on the part of the entire community, will serve only to excite a still greater interest in their exploitations. Most fortunately for California, speculative mining has hardly obtained a foothold within her borders; and her people, quick to learn from the harsh experiences of the past, have begun to turn a more critical glance at the mineral resources within her limits, and to regard as a vital element in mining ventures an estimate of minimum yield and maximum cost, and from the comparison to deduce the margin for profit.

of counties extending from Fresno on the south to Shasta on the north, and following the line of the foot-hills on the western slopes of the Sierras. New districts are being opened and worked in the northern and southern portions of the State. The mines of Kern County, of which the town of Havilah is the county seat, have been attracting considerable attention, under the name of the Clear Creek mining district. This stream is a tributary to Kern river—coming in from the south. The mines of Clear Creek proper are included in a strip of country one mile wide and about four miles long. They are situated on the eastern side of the slope lying west of Havilah, and within a distance of three miles of the town. The country rock is chiefly granite, which near the surface has been much disintegrated by the action of the elements, and hence permits an easy extraction and crushing until the permanent water level is reached; at which point the rock becomes harder and more difficult to manipulate. Some 500 to 800 locations have been made; but not more than a dozen claims are reported as being actively and remuneratively at work. There are several other districts in the county, owners in which feel sanguine of good results so soon as the quickening hand of capital shall be stretched forth to assist in their exploitation.

Hence, northwardly on the great quartz belt, the first important mining region is in the county of Mariposa. A quartz mill was constructed in this county as early as 1850, and the year following the first mill was built at Grass Valley, Nevada County. The southern mines, notwithstanding that they were started earlier than the northern mines, have in the last few years been steadily outstripped by the latter. Recent developments in the Josephine mine, on the Mariposa estate, and the activity displayed round the various mining centers of Tuolumne County, give promise of a brighter future for the lower half of the mining field. The great mother vein of California commences in Mariposa, follows more or less nearly the general trend of the Sierras, and finally passes out of the State at its northern limit. It is distinctly traceable, by its outcrop, for a distance of nearly 100 miles from Mariposa into El Dorado County; being thus the longest quartz vein of which we have any record. Northwardly, in the counties of Nevada, Sierra and Plumas, the quartz belt appears to approach a more nearly north and south direction. The course of the quartz vein is by no means to be followed over every mile of the spaces between its points of outcrop. Nor are the productive mines confined to the line of the mother vein itself; but the parallel formations often carry valuable lodes. The country rock is mostly slate, to whose dip and direction the quartz veins are generally conformable; although they sometimes run at right angles to the stratification. Some of the best mines have been found in greenstone, granite and metamorphic sandstone, and even in limestone; so that the country rock cannot be taken as conclusive evidence either for or against the probability of persistence in depth and richness. In size the lodes vary from a few inches to forty feet and upwards, with a likewise varying yield; although, as a rule, the percentage of gold, relatively to the mass, is greater in the small than in the large veins. The distribution of the pay portion is by no means uniform; nor is the entire vein mass worthy, under present conditions, of being passed through the mill. The best mines of Europe seldom extract, even for the purposes of concentration, more than one-third the matter contained between their walls; and the valuable ore here, as elsewhere, is distributed in shoots, chimneys, kidneys, or cuneiform masses, often having a very marked and persistent dip and direction: and it is upon the extent and richness of these zones of ore in the vein that the value of a quartz mine chiefly depends. An acquaintance with the true character of ore bearing deposits can be of no disadvantage to, and will advance rather than retard, legitimate mining investments. Nor are the best mines confined to a northerly and southerly direction; indeed, some of the best mines in the township of Grass Valley, which locality is at present the main focus of profitable vein mining, have an east and west course. It will be impossible in the limits of a single paper to treat at length of all the localities of mining; the centers only can be touched upon, and these, commencing on the south, may be enumerated as follows: The

Mariposa estate, Hite's Cove and Coulterville, in Mariposa County; thence north, in Tuolumne County, at Soulsbyville, Jamestown and Sonora; in Calaveras, at Carson Hill, Angel's Camp, San Andreas, West Point and Mokelumne Hill; in Amador, at Jackson, Sutter and Amador; in El Dorado, near Placerville; in Placer, near Auburn; in Nevada, at Grass Valley, Nevada City and Meadow Lake; in Sierra, near Downieville; in Plumas, at Indian Valley, etc. New locations are being made continually throughout the gold belt; while around the centers of greatest past yield an ever increasing enthusiasm has been called into being. For example, from the 1st of January to the 8th of October, of the present year, 10,351 claims, averaging 100 feet each, were recorded in Nevada County alone; and that, too, in a region where quartz mining has been profitably carried on for many years.

The most interesting mine in the State is, for many reasons, the Eureka, of Amador County; which, with the adjoining mine, the Badger, is the property of Mr. A. Hayward. This mine is located on the great mother vein, at the point of junction of the slates and greenstone, and is therefore of the nature of a contact vein; that it is a true fissure vein as well, is not negated by the fact that the crevice was formed between two rocks of different character: for, other things being equal, that is precisely the point at which we should expect the occurrence of a fissure. The lode carries a varying width up to 26 feet in the Eureka, and 40 feet in the Badger. The upper workings did not pay very largely; the average yield, at 600 feet, as stated by the Geological Survey, being a trifle over \$10 per ton. In spite, however, of all drawbacks, its present owner battled persistently until the mine now occupies as favorable a position as any in the State. At a depth of 1,250 feet, the vein is large and carries a very high percentage of free gold. The gross yield from this mine has doubtless been very great; but the owner has not, as far as known, published any authoritative statement as to average yield or gross returns. That the mine has improved in depth, is evident to the most superficial observer; and the present average yield is probably from \$20 to \$30 per ton. This mine is remarkable as being the deepest gold mine in California, and probably in the world; and, as proving that the gold mines of this State, at least, are persistent in depth, it merits detailed description and observation. The old time theory, that gold mines would not contain pay ore at greater depths than 250 feet from the surface, has been most emphatically disproved by dozens of mines on our quartz belt; and, as the facts now show, we may anticipate centuries of profitable returns from this source. The pay chimney in the Eureka and Badger, which for the purposes of description may be taken as one mine, does not exceed 600 feet, including the barren zone between them. The expenses of mining are very materially diminished, owing to the very slight flow of water into the shaft: this is due to the fact that the eastern wall is formed of the more compact rock, which is impermeable by the waters of the High Sierra. The western wall is composed of crumbled quartz, and fatty, black and decomposed slates, called by the miners "the gouge." This gouge contains iron pyrites and some free gold—not in sufficient quantities to be workable. Owing to the pressure from above, the soft matter of the western wall is gradually creeping inwards, and will ultimately fill up the spaces from whence the quartz was stoped. The vein is nearly vertical; sufficient ore is raised to supply two mills aggregating 56 stamps: the one, of 40 stamps, driven by water a part of the year, and by steam when the supply of water runs short; and the other, of 16 stamps, driven by water alone. The amalgamation is performed inside the batteries, from whence the pulp passes over shaking tables lined with copper plates. The percentage of sulphurets in the ore is small, and no especial pains is taken to save them.

Each one of the mining counties has had mines which have produced very largely, but the counties, in the order of prominence, are, Nevada, Amador, Tuolumne, Sierra, and Plumas. The county of Mariposa has been, of late, a point of diminished interest, owing to the ill-success of some of the mines on the Mariposa estate. Recent developments, and better methods of working, give hopes of improvement. The Mariposa Mine, an east and west lode in the lower portion of the grant, has had a

number of rich pockets, from one of which a yield of \$75,000 is reported. Another, the Princeton, near the center, has yielded between two and three millions; and at the north, the Pine Tree and Josephine have aggregated a very large sum. The mines of this county are by no means confined to the limits of the grant; and the popular belief that such is the case, has, doubtless, exerted a depressing influence on the mines and mining interests of that section.

A few of the more prominent mines northwards, are the Raw Hide, Soulsby, App, Golden Rule, etc., of Tuolumne; the Carson Hill mines, and those of Angel's Camp, in Calaveras—the former of which are celebrated for their once fabulously rich pockets; the Hayward, Bigelow, Oneida, Keystone, Seaton, etc., of Amador; the Sierra Buttes, in Sierra County; the Indian Valley mines, of Plumas; the Placerville and Georgetown mines, of El Dorado. At the Woodside mine, near the last mentioned town, there is reported the discovery of a mass of gold weighing one hundred pounds and upwards; and last and most prominent, the Nevada County mines at Grass Valley and Nevada City.

The average width of the veins of Nevada County is probably less than that of the lodes in the other quartz mining counties, but they fully make up for their diminished size by an enlarged average yield. The country rock is chiefly hard and compact greenstone and granite, which, combined with the narrowness of the veins, increases the expense of extraction over the large veins in the softer slates. The mine which has of late attracted the most attention in Nevada, is the Eureka of Grass Valley. This mine is in greenstone; and is interesting not only by reason of its high yield, but also, being an east and west vein, as disproving the theory that the best ore deposits are found in lodes whose course approaches, more or less nearly, the magnetic meridian. The Eureka is located about one and a half miles northeast of the town of Grass Valley; it has attained a depth of somewhat over three hundred feet, and has drifts of about eight hundred feet. The dip is nearly vertical. It has two engines: the one for hoisting ore, and the other for pumping. The mill has twenty-four stamps. Amalgamation in the battery is not practiced at this mill; but, instead, the pulp from the stamps passes over blankets, the washings from which are treated in Atwood's Amalgamators. These consist of covered boxes, in the bottoms of which two semi-cylindrical cavities have been scooped out and partially filled with quicksilver; a stream of water washes the blanket concentrations, little by little, into the amalgamators, where they are kept in motion by the iron spikes of a roller, the points of which dip slightly into the quicksilver. There is a large per centage of sulphurets in this vein, which are reduced by the chlorination process. They are valued at from \$200 to \$300 per ton. This mine was sold towards the end of 1865 for the sum of \$400,000 in gold. During the last year, ending September 30th, 1866, there were extracted from the mine 11,375½ tons of ore, averaging \$47.15 per ton, and yielding in the aggregate \$526,431.41 — \$368,042.18 of which was profit. The report of the Assessor, for the year 1866, giving the product of the year 1865, gives some very interesting facts in regard to this county. He places the number of mines, both quartz and cement, at one hundred and sixteen, the greater portion of which are, as yet, merely prospective. Of the seventy-one mills, fifty-one are devoted to crushing quartz, and twenty to cement. The yield of nineteen mines fully reported, of which the Eureka above mentioned is one, was \$2,227,000, giving an annual average per mill of \$111,947 from quartz alone. From twenty-three mills the amount crushed is reported at 70,760 tons, being an average of 3,076 tons to each mill.

The most successful mining, taken as a whole, must be credited to the county of Nevada, and no county in the State has, within the past year, attracted so large a share of attention. Its total yield in gold has not been, by the most moderate estimate, less than from \$25,000,000 to \$30,000,000. The mines of Massachusetts Hill, Gold Hill, New York Hill, and Allison Ranch, have yielded each from two and a half to five millions of dollars, while many others have yielded very high returns of interest on the amount of money invested. It must not be supposed that all the largely paying mines have been confined to this region in the northern tier of quartz counties.

Amongst others, the Sierra Buttes of Sierra County, having three large veins, and twenty-four stamps, is reported to have paid to its owners, for the year 1865, the sum of \$122,000; and the Crescent, of Indian Valley, Plumas County, is reported to have yielded over \$100,000.

COSTS OF MINING AND MILLING.

These two items of expense are necessarily variable, but are very materially under the control of a prudent and sagacious management. The greater or less cost of mining depends upon the nature and hardness of the rock; whether the inclosing walls are compact or stratified, and whether there be a "gouge" or not; the size of the vein is to be considered; the depth of the workings, and the presence or absence of large quantities of water. The cost of milling is subject to less variation, and is determined by the proximity or distance of the mill from the mine and the power used, whether steam or water, the latter being by far the cheaper; and lastly, whether small or large amounts of rock be crushed at once.

The narrow veins of Grass Valley, some of the richest of which have been from twelve to thirty inches thick, necessarily cost a much higher sum to mine than such large veins, as the Hayward, and the Sierra Buttes; mines of the former class often costing from \$13 to \$26 per ton for mining and milling, while the latter, crushing very large amounts, often do not cost over \$5 per ton. The larger deposits, similar to the Harpending of Placer County, can probably be quarried and milled at an expense not exceeding \$1.25 per ton. It will thus be seen that local peculiarities, proximity to navigable streams, or railroads, affect not only the first cost of mills and hoisting works, but have also a considerable influence in increasing or diminishing the daily running expenses. Under ordinary average conditions, however, a yield of \$10 per ton, in free gold, will, at present prices of labor, materials, and food, leave a margin for fair profits; and under favorable conditions, viz: water power, large vein, proximity to lines of regular communication, a like yield offers a certainty of a very large interest on the money necessary for mine and reduction works.

The number of stamps throughout the mining counties, as reported by the different assessors, reaches to about 4,000. Unfortunately, it is not stated what number have been running continuously; and hence, this must be a matter of conjecture. Assuming, however, that of this number not more than 2,500 have been in continuous operation three hundred days in the past year; and estimating the crushing capacity of each stamp at an average of one ton in every twenty-four hours, we have a grand total of 750,000 tons of quartz, cement, etc., crushed in one year.

Placing, now, the average yield for the whole State at only \$15 per ton, and we have a total product from the stamps of \$11,250,000. The average yield of some of the narrow veins of Grass Valley far exceeds this sum; but the paying mines of the entire county will probably not exceed an average of \$30 per ton. The larger veins in other counties will warrant our putting the average for the whole State at \$15. Under average conditions, this sum leaves a clear profit of cent per cent, and where everything is favorable, double that amount. Individual mines often exceed this rate of profit; but it is not from exceptionally favorable instances that we should estimate the general well being of this industry.

According to the "Mercantile Gazette," the receipts for the first nine months of the year 1866 were as follows:

From California, northern mines.....	\$18,711,783
From California, southern mines.....	3,418,436
From State of Nevada.....	11,063,218
From Coastwise ports, Oregon, etc.....	4,416,010
From British Columbia.....	2,031,801
Total.....	\$39,641,248

Of this total, \$33,499,432 was bullion, from the gold regions of California and from the silver districts of the State of Nevada; if to this sum we add ten per cent. for

the amount brought by private hands, the greater part of which should be credited to California—since, by reason of its bulk, but little silver finds its way to San Francisco outside the regular channels—we shall have a total for California and Nevada of \$36,849,375, for the first nine months of 1866. The total receipts from all sources during the year 1866, amount to \$52,691,653.

The revival of the quartz interest in California, stimulated to greater energy by the recent brilliant success of so many mines on the Gold Belt, bids fair to cause the gold product from quartz to rival that produced from the washings.

SILVER.

The silver interests of the State of California have, as yet, attracted but little attention. The silver product of the Coast must be mainly credited to the State of Nevada—whose famous "Comstock" lode has already taken rank as one of the great silver bearers of the world.

Unlike the ores of Nevada, the greater part of the silver mines of California contain the precious metal in such complicated combinations as requires the aid of smelting for its extraction.

Amongst other varieties, we may enumerate Antimonial Silver, Ruby Silver, Argentiferous and Auriferous Galenas, Copper Glance and Fahlerz. Under the Mexican régime a small quantity of silver was extracted from a mine at a place called Alisal, in Monterey County, and made into plate; some pieces of which are still in the country. This is the only instance, as far as can be learned, of the occurrence of silver in the Coast Range. Along the western slopes of the Sierras, silver ore is found in small quantities on the line of the Gold Belt. Amongst other places, native silver may be seen in the Harpending claim, in Placer County; and silver ore has been found near Ophirville, in the same county, in the Columbus District of Tuolumne County, and in the Excelsior District of Nevada County, where the galena is auriferous as well as argentiferous.

The High Sierra and its eastern slopes are the only localities where we may look for the occurrence of silver ores in appreciable quantities. Some tons of valuable silver ores have been received from Shasta County. Traces of silver are found in Plumas County; and then again south in Alpine County, in the vicinity of the town of Monitor; thence passing along the eastern flanks of the Sierras, southwards, at various places in the counties of Mono and Inyo, including the mines of Owen's River; and again in the western portion of San Bernardino County, where the Slate Range silver mines are located. Excepting a shipment of \$6,000 from a single claim in Alpine County, no considerable amount of bullion is reported from the silver mines of the State of California.

Furnaces for reducing the silver from its ores have been constructed in two or three localities, with only measurable success. The rebellious nature of the ores, the distance from the lines of easy communication, combined with the prevailing inexperience as to the proper methods of treatment, have hitherto very materially retarded the development of this interest.

QUICKSILVER.

The occurrence of the gold and silver of the Coast, mainly in such combinations as admit of reduction by means of amalgamation, rendered necessary a large supply of quicksilver. The production of the old world, derived chiefly from the old Almaden mine in Spain, and the Idria mines of Austria, was supplemented by the discovery of very extensive deposits of Cinnabar in the Coast Ranges of California. The supply from these sources has sufficed not only for all mining purposes at home, but also largely for export.

The ore of quicksilver is mostly in the form of a sulphuret; the method of its occurrence is not, properly speaking, in regular veins, but in irregular masses in the form of bunches, stringers, etc., and occupying a certain zone of impregnation. Traces of Cinnabar have been found in nearly all the counties of the Coast Range, from

Klamath, on the north, to Santa Barbara, on the south. It occurs, likewise, at various places in the foot-hills of the Sierras: for example, in Nevada County, near Grass Valley; in Ione Valley, Amador County; and most curiously in connection with auriferous quartz in a mine on the north bank of the Merced River, near Horse-shoe Bend, in Mariposa County. The cinnabar in this locality is found forming a thin seam on the foot-wall of the vein. The only mines of this metal of economical importance are confined to the Coast Ranges. Of these, the most important is the New Almaden in Santa Clara County, which has given employment to as many as thirteen hundred operatives at once. From this mine has been extracted the major portion of all the quicksilver produced on this Coast. The ore is found in a zone of impregnation, whose general course is northwest and southeast, and which extends some five miles from the main workings of the New Almaden, following the direction of the inclosing strata. Northwardly from the Mine Hill are the two mines Enriqueta and Guadalupe—the product from both of which has by no means approached that from New Almaden. The grand deposit of ore was embraced within the comparatively limited space of some forty yards square, and extending downwards with a dip towards the north. The bunches and masses of ore found within this limit were of irregular form and size, and irregularly distributed.

Next, in importance, we may cite the New Idria mine, situated on the western border of Fresno County—the metal from which must all be hauled to San José, a distance of one hundred and thirty miles; and the Redington Lake Company, of Lake County. Amongst the minor localities, may be mentioned the deposits on Mt. Diablo of Contra Costa, and those of Napa County.

The quicksilver is extracted from the cinnabar sometimes in retorts, which are charged with ore mixed with reducing and desulphurizing agents; the volatilized metal thus set free from its combinations being caught in appropriate condensing apparatus; or generally, in large furnaces, where the flame and heated air together effect the chemical disintegration of the cinnabar; while the products of the combustion and the volatilized metal are passed through condensation chambers, and thence through long canals, in order to allow of as thorough a deposition of the metal as possible. When we reflect that mercury is slightly volatile at ordinary temperatures, it will be readily understood that all the metal contained in the ore is saved with great difficulty.

The total production of quicksilver, the greater portion of which must be credited to New Almaden, amounted, up to January 1866, to 419,077 flasks; each flask contains 76½ pounds of metal, and, hence, we have 32,059,390 pounds, equal to 16,029 tons; in value from sixteen to eighteen millions of dollars. The Redington Lake Company is reported to have produced a total of 6,755 flasks since 1862. In May last, large contracts were made for all the quicksilver producible by the various mines of the coast; and the production for the year 1866 has not been made public. The "Mercantile Gazette" states the amount shipped through the Custom House, during that period, to have been 30,287 flasks.

COPPER.

The great copper belt of the State occupies a strip of country running along the western limits of the foot-hills, from the county of Fresno on the south, to Plumas on the north. It carries a varying width up to ten miles, and is traceable by the gozzan or ferruginous outcrop, at intervals, throughout its entire length.

In the far northern coast counties there occurs a second copper bearing region extending from Klamath County into and through Del Norte County, and having a width of about four miles. Elsewhere in the Coast Ranges, traces of copper have been found in Colusa, Lake, Contra Costa at Monte Diablo, Marin, and Los Angeles counties; but nowhere, as yet, in paying quantities. In the Sierras and their foot-hills, we find copper ore in Plumas County, where smelting has been attempted; and mines of greater or less promise in Sierra, Nevada, El Dorado, and Amador counties. Likewise in the Chowchilla region, in the counties of Mariposa and Fresno. The

most important mines, however, are to be found in Calaveras, at the towns of Copperopolis and Campo Seco.

For many years after the settlement of the country, the nomadic prospecting population gave no attention to copper indications—the belief prevailing that only the precious metals could be mined remuneratively; and hence it was that the very valuable deposits of the Union and Keystone claims remained so long untouched. In the Summer of 1860, Mr. W. K. Reed located what has since proved to be one of the most extensive copper lodes of the world. So rich were the developments in this claim, that a furore of prospecting was inaugurated, which, in the following year, brought to light very many localities where traces of copper may be found, but nowhere a deposit comparable to that of the Union. Of the three hundred to four hundred locations made in the county, it is improbable that more than a dozen have paid expenses and declared dividends.

The copper ores of California consist, in the main, of the yellow sulphuret or chalcopryrite; this is found of various degrees of purity, being contaminated with a greater or less per centage of mundic (iron pyrites). Near the surface may be found, in different parts of the State, copper glance, red and black oxides, green and blue carbonates, and silicates. These, however, give place to the yellow ores, as soon as a sufficient depth has been reached to shut off the decomposing action of the atmosphere. Ores yielding less than twelve per cent. of copper cannot, under present conditions, be shipped with profit; and, in order to obviate the transporting of large amounts of useless gangue, concentration both by fire and water has been inaugurated.

The fire process has been moderately successful, although the chief object of the smelters seems to have been a search after some refractory furnace lining capable of withstanding a molten mass either basic or acid, instead of endeavoring to form a slag of such composition as shall have but a slight tendency to eat out the furnace material. The system of concentration by water, with shaking tables, round buddles and jigs, does not seem as yet to have met with any degree of success.

A few lines of description of the Union and Keystone mines of Copperopolis may not be uninteresting. These mines are situated in the county of Calaveras, some thirty-eight miles east of the city of Stockton. Both claims were located, at the same time, in the year 1860; the former consists of 1,950 feet, and the latter of 3,300 feet. The general direction of the vein is northwest and southeast, with a slight dip to the east. The country rock is chloritic slate and serpentine. The Union has been opened by a shaft five hundred feet deep, which discloses a mass of pay ore varying in width, in the different levels, from eight to forty feet. At the northern end of the claim the ore divides into two portions, and continues thus into the Keystone.

The Keystone has a shaft some three hundred and sixty feet in depth; the ore of the western vein contains but little copper as disclosed from the lower shaft, while the eastern lode carries a valuable pay chimney from one to six feet wide. In the upper shaft the conditions are reversed, the western vein being the richer.

There are several other claims of prominence in the county, amongst which may be enumerated the Campo Seco, in the neighborhood of which smelting works have been erected—the Napoleon, Empire, and Table Mountain—from each of which shipments have been made.

The export of copper ore from the town of Copperopolis amounted, in 1863, to 5,900 tons; and had increased, for 1864, to 14,300 tons. The total amount shipped from the Union mine, up to June 1st, 1866, was 46,373 tons; and from the Keystone, up to the same date, 5,163 tons.

From Campo Seco there were shipped, in 1865, some 950 tons. Some few tons of black copper, regulus, and ore have been shipped from the Chowchilla mines, in Mariposa and Fresno counties.

The value of the copper ore received in San Francisco for shipment to the East during the year ending December 31st, 1866, was \$1,800,000. Amount shipped in 1865 was 25,000 tons, valued at \$2,000,000; in 1864, 13,300 tons, valued at \$1,094,600, and in 1863, 5,900 tons, valued at \$512,000.

COAL.

The coal heretofore found within the limits of the State, is of the variety known to geologists under the name of Lignite, or recent coal, as distinguished from the more compact masses of carbon found in the formations called carboniferous par excellence. Whether or no the harder varieties of coal will yet be found, remains to be elucidated. The opinion of certain geologists, however, seems to be meeting with favor, that coals approaching more or less nearly the characteristics of those of the true carboniferous era, may and have been found, at great depths, at those points where the coal measures have been tilted up at a high angle, and where the lower portions of the beds have been exposed to the greater pressure.

That the formation of the coals is due to the aggregation of woody fibers in the deltas of former rivers, and in the basins of former lakes, does not admit of any doubt; and that new coal beds are now forming in various parts of the world, is equally true.

Subsequent to this deposition, and as a consequence of the changes in the superficial configuration of the earth, great masses of sandstone, earth, etc., have been superimposed, and, from pressure and time, a thorough carbonization of the woody fiber has taken place. Accepting this theory of formation as true, it is preferable to use the term bed instead of vein; without reference to the fact that the coal measures are found tilted up at all possible angles.

The coal beds of California are confined chiefly to the cretaceous formations of the Coast Ranges, and find their best exemplification on Monte Diablo, in Contra Costa. Traces of coal are reported at various points near the coast, from Del Norte to Los Angeles; in Humboldt, within three miles of the town of Arcata; in Colusa, Monterey, etc. Lately, while excavating to lay the foundations of some buildings on Mare Island, a few very thin seams of coal were discovered. In the hydraulic diggings of the foot-hills of the Sierras, in Shasta, Nevada, and Amador counties, we find small bodies of Lignite and pieces of silicified wood.

On Dry Creek also, seven miles from Folsom, there is reported a small deposit of coal. The past conformation of certain portions of the county of Contra Costa offered the conditions most favorable to the deposition of large and workable beds of coal. We find traces of this basin extending southeastwardly as far as Corral Hollow, in San Joaquin County, and perhaps the few seams of coal southwest of Manly's Ferry may mark its continuance into the foot-hills in that direction. No commercial importance, as yet, attaches to any of the beds outside the Mount Diablo region. The mines at this point, the most important of which are the Black Diamond, Union, Eureka, Pittsburg, and Manhattan, were discovered on the 19th of December, 1859, by a Mr. Frank Somers. The beds have an average thickness of about three and one-half feet. The mines are distant from the point of shipment, on the San Joaquin River, about five miles; they give employment, directly and indirectly, to over seven hundred operatives. The first attempts at burning the coal from Mount Diablo were unsuccessful, but an alteration in the construction of the furnaces demonstrated its usefulness for raising steam, until, at the present time, it is used for hundreds of stationary engines, and for the furnaces of the steamers which navigate the inland waters of the State.

Four years after the discovery by Somers the coal product of Mount Diablo had reached, for the year 1863, a total of 37,453 tons; the amount raised has gone on steadily increasing until we have for the present year a product of 80,000 tons. With the increase in manufacturing, and greater extension of the means of easy transportation, the yield of the Mount Diablo mines will, doubtless, be much enlarged—since the present rate of production by no means greatly taxes their producing capacity.

and formed at those points where the bituminous shales and sandstones, tilted up at a high angle, crop out upon the surface. The oil is, doubtless, brought upwards to the surface by capillary attraction, or hydrostatic pressure, and on being exposed to the air the lighter hydrocarbons become volatilized, leaving behind a viscous residuum, which gradually hardens into asphaltum. This substance, under the name of "brea," was known to the inhabitants of California long before the advent of the Americans, and was used by them to form a water-tight covering to their houses. They were accustomed to form a layer of broken bits of "brea" over the usual thatch, where, exposed to the rays of the sun, it soon ran together and formed a homogeneous stratum. Asphaltum is found in greater or less abundance for a long distance on and near the coast at La Brea, near Gilroy in Santa Clara; in Monterey, San Luis Obispo, Santa Barbara, and Los Angeles counties. The largest deposit, however, is to be seen in the county of Santa Barbara, about three leagues west of the town of the same name, and situated directly on the coast. The "brea" is found in the greatest abundance at a place called La Goleta, adjoining the Ranchos de la Patera and de Los Dos Pueblos. Thousands of tons are lying on the sea beach, and for a distance of two miles large masses are seen on the face of the cliffs at heights varying from seventy-five to one hundred feet above the ocean. The method of its occurrence is in diagonal veins at the upturned extremities of the bituminous shales. The masses of "brea" formed at these points project outwards, and finally through the washing away of the earthy strata beneath them they roll downwards to the water. There is found, occurring in thin strata, and in no great abundance, a variety of asphaltum very materially differing in appearance and structure from that used for paving and roofing; it is brittle, jet black, highly lustrous, and susceptible of being converted into a very superior varnish. Large deposits of "brea" are found in Los Angeles County, on some of the Ranchos of Don Abel Stearns; on Las Bolsas, La Habra, and some others. On the Rancho of Dos Pueblos the "brea" may be found by digging a few feet below the surface, at points where its presence is indicated by exudations of tarry matter. The chief source of the supply of asphaltum used in California for paving and roofing, is the Rancho de la Patera. The annual consumption amounts to about 2,000 tons, valued at \$20 per ton.

PETROLEUM.

Traces of petroleum, or rock oil, are to be found in many places in the coast range, from Humboldt County on the north, very nearly, to the southern limit of the State. The bituminous shales and sandstones are seen in San Mateo County; near Santa Cruz, in Santa Cruz County; at Gilroy, in Santa Clara County; and "indications" of oil have been reported in Lake, Colusa, and Napa counties; and near San Pablo and Antioch, in Contra Costa; likewise in Los Angeles and San Bernardino. The only localities from which any considerable quantities have been shipped are the Hayward & Coleman, Charles Stott, and the Stanford Bros. works, in Santa Barbara Co.; the Union Mattole well, of Humboldt County; and the Buena Vista Company's works, near Buena Vista Lake, Kern County. The production from these localities has been, according to the "Mercantile Gazette," as follows: From the Hayward Petroleum Company, from October 8th, 1865, to October 8th, 1866, 2,569 barrels; from the Stanford Oil Works, from September 4th, 1865, to October 4th, 1866, 1,187 barrels—making in all 3,756 barrels. The receipts from the Union Mattole and Buena Vista, added to small amounts from minor localities, will bring the total production since mining for oil was inaugurated, up to about 4,000 barrels. The flow of crude oil from the oil creek, Santa Barbara County, is from five to six barrels per day.

Wells have been bored at various points where the surface indications would seem to warrant the probability of finding flowing wells, but hitherto without any marked success. A number of wells have been sunk to very considerable depths; the deepest of which is the Davis well, in Humboldt County, reported to be down over 1800 feet. From many of the wells small quantities of oil have been pumped. Jets of gas, salt water, and other indications, deemed reliable in the East, have, as yet, failed to bring

to light a flowing well. The upturned position of the shales, allowing thus the oil to exude and evaporate, may perhaps be responsible for the phenomena as exhibited in the oil districts of this State. The superintendent of the Hayward Company being convinced of the abundance of the oil in the shales and sandstones, was the first to adopt the plan of running into the hills and collecting in the soles of the tunnels the exudations from the oil repositories; and the result has shown the soundness of his method of procedure. The crude oil thus collected must be submitted to a preliminary purification before it can be used for the purposes of illuminating or lubricating. For this purpose refining works have been erected in San Francisco, and in some localities at the wells. Whether the rock oils of this coast be identically similar in chemical composition to the hydrocarbons at the East is a very interesting problem for scientific investigation, but is a subject of very little moment in the popular estimation.

BORAX.*

The borax of commerce, or chemically speaking, the bi-borate of soda, has been, heretofore, chiefly manufactured from a combination of the boracic acid waters of the springs of Tuscany with common soda. This salt is very extensively used for glazing pottery—upwards of 11,000 tons being annually consumed for this purpose in England alone; also, as a flux for assaying, for welding, and for the formation of the finer glasses and enamels.

The presence of this substance in California was first detected by Dr. J. A. Veatch, as early as 1856, but it was not until 1864 that systematic efforts for its collection were undertaken. The locality of its occurrence is in Lake County, about sixty miles N. W. of Napa City. There is one other small lake in the county, which contains traces of boracic acid, and likewise the boiling springs on the shores of Clear Lake. The Borax Lake, so called, is on the property of the Borax Company; it is elliptical in form, about one mile long by one half a mile wide.

The United States Survey reports the superficial area of the lake at two hundred and nineteen acres at the latter part of the dry season. The accumulations of the winter's rains, however, enlarge its area to some four hundred acres; of which space some three hundred may be said to be more or less productive of borax. The average depth of the lake is not more than two and a half feet. The waters, surcharged with boracic acid and soda, and becoming concentrated by evaporation, deposit the salt in monoclinic crystals in the mud of the bottom.

The stratum immediately below the water to a depth of some six feet is soft and prolific in fine crystals; below this succeeds a zone of stiff blue mud, wherein are found the large sized crystals. The method of extraction consists in sinking small coffer dams into the muddy bottom, exhausting the water, washing out the finer crystals in a manner similar to the process of panning out placer gold; and picking out the larger masses by hand. As a result of this rude process, the company have been producing an average of two tons per day.

Repeated analyses of air dried samples of mud taken from the bottom at various points, gave eleven and nine-tenths to eighteen and seven-tenths per cent. crystallized borax; and there was obtained by actual lixiviation, fifteen per cent. of borax, twenty eight and a half per cent. of carbonate of soda, and eight and one-fourth per cent. of common salt.

Admonished by this result, the company determined to erect works for extracting the microscopic crystals by lixiviation; these, it is anticipated, will be in active operation by the spring of the ensuing year.

With a view to arrive at the depth of the borax impregnation, an artesian boring was put down a distance of sixty feet; the mud taken from the bottom yielded three and a half per cent. of borax. To the better understanding of the vast amount of borax in the mud of the lake, we may make the following estimates; assuming that the productive ground embraces no more than two hundred acres, with an average

depth of only six feet, we have, at 43,560 square feet to the acre, a body of mud equal to 5,227,200 cubic feet; allowing twenty cubic feet to the ton, we have 2,618,600 tons of air dried mud; if now we estimate the yield of borax at ten per cent. instead of fifteen per cent. as per working analysis, we have a mass in sight containing at least 261,860 tons of the biborate of soda (borax) and a very much larger amount of the carbonate. Some eighteen months since, there was reported a discovery in the southern part of the State, of a substance resembling the borate of lime found in the vicinity of Iquique, Peru, which an analysis, however, proved to contain no boracic acid.

The causes which produced the crystals of borax, being doubtless still in operation, the supply from Imperial County may be deemed inexhaustible.

SULPHUR.

This metalloid is found in various places in the State; chiefly in the counties of the Coast Ranges. Its presence is reported in Klamath, Lake and Colusa; in Santa Barbara, near the Mission San Buena Ventura, eight and a half miles from the Ocean; also, in Los Angeles.

Works for purifying the crude sulphur by sublimation have been erected upon the grounds of the Borax Company, with a capacity per day of eight to ten tons of the refined article.

UNDEVELOPED RESOURCES.

The State of California is rich in minerals, other than those above enumerated, and whose development is merely a matter of time; amongst these we may enumerate the following:

TIN.

The ores of this metal are reported in the county of Los Angeles, on the Rancho Temescal, claimed by Don Abel Stearns. The mines are located thirty miles southwest of the town of San Bernardino. The tract of land whereon the ore has been found contains about five square leagues, and is bounded on the north and northwest by the Rancho La Sierra and the Santiago Mountains, on the west by the Santa Ana Plains, and on the south by the Rancho La Laguna. The district contains some five hundred different claims, on one of which a shaft has been sunk, from which, as reported, seventy-five tons of ore have been extracted. The mines are now idle, on account of water and disputed title.

IRON.

Deposits of iron ores, hæmatites, and magnetic oxides are reported at various points, but nowhere in the State have any efforts been made to undertake the erection of smelting works. Iron ores are found in Lake County, ten miles from the lower lake; in Santa Clara, near Gilroy; in Butte, extending from the southern boundary of Plumas to a point on the south side of the Feather River; in Calaveras County, to the north of Murphy's; and near Auburn, in Placer County.

Of the minor minerals we may mention:

Chromic Iron, used for preparing green and yellow pigments, and for chromates of potash and soda, occurs in Serpentine, near the Crimea House, Tuolumne, and in Monterey and Santa Clara.

Manganese, of excellent quality, at Red Rock, in San Pablo Bay, and on the Peninsula of San Francisco.

Graphite, or *Plumbago*, is found in large quantities in Los Angeles, within eight miles of the ocean; in Mariposa, Tuolumne, and Calaveras.

Gypsum, in large masses, occurs in several of the coast counties, Santa Cruz, Los Angeles, and San Diego.

Cobalt and Nickel, in small quantities, are reported near Dutch Flat.

Fire Clays are found in the coal measures of Mt. Diablo, and discoveries of *Kaolins* are reported in Mendocino and Napa.

Platinum, and its associate metals, are known to exist, and two or three small diamonds have been discovered.

CONCLUSION.

A State which numbers amongst her productions an annual yield of \$25,000,000, and upwards, in gold; nearly 50,000 flasks of quicksilver; between eighty and ninety thousand tons of coal; twenty-five to thirty thousand tons of copper ore; six hundred tons of borax, and two thousand five hundred tons of sulphur, with capacity for great expansion—to say nothing of the production of asphaltum, petroleum, clays, etc.—needs no rhetoric to embellish the brilliant array of her mineral resources. They speak the irrefragable logic of facts, and bear living witness, not only to the wealth of her prolific bosom, but also to the energy and enterprise of her population.

From 1848 to 1866, a period of only eighteen years, there has been a gratifying increase in the products of the stable mineral industries. The year 1853 saw the greatest yield from the superficial placers, which are now, in the older counties, pretty thoroughly exhausted. Naturally, there is required a longer time to build up the machinery, sink the shafts, and prepare the quartz mines for a production comparable to that of the placers. But, once constructed and set to work with becoming energy, skill, and prudence, a permanent annual yield of \$25,000,000 from this source profits the State far more than the fitful yield of far greater sums from repositories which must inevitably very soon become dried up.

That mining investments, under proper supervision as to location of mine, management, etc., are not to be considered a precarious source of revenue, let us examine the results obtained from a careful calculation of the profits from legitimate mining enterprises, as compared with those derived from railways, canals, water works, navigation, gas, dock, and land companies, held in the City of London.* It was found that the average annual returns from the latter class of investments were three and seven-eighths per cent. on the average selling price, while the three hundred and fifty mines in the Mining Share List, including copper, lead, and tin, divided annually thirteen and one-half per cent., thus showing that sound mining adventures pay, on the average, more than three times as much as is derived from all other species of investments.

However gratifying may be the exhibit of the mineral productions of the State in the past, it is to be looked upon only as an earnest for the future. With denser population, cheaper labor, more secure title, and extension of the means of easy communication, we may confidently anticipate a still better, because safer, field of enterprise for capital, and a vigorous and healthful development of all our resources.

QUARTZ MILLS.

The number of quartz mills in operation in this State in April, 1857, was one hundred and thirty-eight, with an aggregate of fifteen hundred and twenty-one stamps; the cost of erection of which was one million seven hundred and sixty-three thousand dollars. The number in operation, November, 1858, was two hundred and seventy-nine, with an average of two thousand six hundred and ten stamps; the cost of erection of which was three million two hundred and seventy thousand dollars. The number in operation, January 1st, 1867, is four hundred and eleven, of which two hundred and seven are propelled by steam, one hundred and eighty-six by water, and eighteen by steam and water. The cost of machinery is estimated at five million nine hundred thousand dollars. In addition to the stamps here enumerated, there are employed four hundred and nineteen arastras, of which three hundred and fifty are connected with different quartz mills, and the remainder are employed in different sections of the quartz region. Included in this estimate are thirty-five cement mills, viz: in El Dorado County, six; in Nevada County, twenty; and in Placer County, nine—which are distinguished in the table by an asterisk. (*)

In Nevada County there are 116 mines being worked at the present time. Many of them have not yet been thoroughly opened, and quite a number have no other machinery than hoisting works. There are 55 quartz and 20 cement mills, making a total of 75 mills in the county. Two of the mills are dry crushers, and the remaining 69 have 738 stamps. The mines have, for mills and hoisting works, 99 steam engines, and 36 mines the whole or a part of the machinery is run by water power. Fifty-seven companies report the number of men employed. In that number of claims 1,737 men are engaged. The Superintendents of 32 mills report the total amount crushed during the year. This number of quartz mills have crushed, in the aggregate, 85,800 tons of rock, averaging 2,681½ tons to the mill for the year. The aggregate yield of the 18 mines, of which the total yield is reported, is \$2,187,300 for the year. This is from quartz alone, as none of the cement mines or gravel claims are reported. The average yearly yield of the mills reported is about \$120,000 each. The largest yield is from the Eureka, of Grass Valley, which crushed 11,460 tons, yielding nearly \$600,000. The next largest yield is from the Allison Ranch Mine; 7,600 tons of rock were crushed, producing an aggregate of \$328,000.—*Assessor's Report, 1866.*

CANALS AND WATER DITCHES.

There are five thousand three hundred and twenty-eight miles of artificial water courses, for mining purposes, constructed in this State, at a cost of fifteen million five hundred and seventy-five thousand four hundred dollars. In addition to the length here stated, there are numerous subsidiary branches, the aggregate length of which is estimated at over eight hundred miles, and several hundred miles of new ditches in the course of construction.

In addition to those enumerated in the above, there are numerous enterprises organized to furnish water for municipal and agricultural purposes. Twenty-seven cities and towns in the interior are thus supplied, and the capital employed amounts to several millions of dollars. The Spring Valley Water Works, of San Francisco, is an extensive and costly undertaking, with a capital of \$6,000,000. The County of Los Angeles has nearly three hundred miles of ditches, and extensive works for the supply of water have been completed in San Bernardino, Yolo, and several other agricultural counties of the State.

* The Eureka Water Company own the ditches in Nevada County between the Middle and South Yuba Rivers, except the Nevada or Shady Creek Water Company's Ditch. The Excelsior Canal Company, of Yuba County, own the ditches leading from Deer Creek, and a ditch from the South Yuba. The South Yuba Canal Company own nearly all the ditches in Nevada County between the South Yuba and Bear River; also a branch 35 miles in length, running to Dutch Flat, Placer County. The County Assessor, in his returns for 1886, reports the number of ditches 51, with an aggregate length of 850 miles.

MANUFACTURES.

FLOUR—GRIST MILLS.

The number of grist mills in the State is one hundred and forty-eight. The aggregate run of stone, three hundred and twenty-nine. Sixty-two mills are propelled by steam, and eighty-six by water. The aggregate capacity per day of the water mills is five thousand nine hundred and fifty; of the steam, seven thousand nine hundred barrels. Estimating the water mills to be in operation six months of the year, the aggregate capacity of the mills of the State is, three million four hundred and sixty-six thousand three hundred and eighty barrels per annum.

The cost of the erection of the above mills is estimated at two million eight hundred thousand dollars. The assessed value is about one million five hundred thousand dollars.

Of the above mills, eleven are in San Francisco, ten in Santa Clara, and twelve in Sonoma Counties. Sacramento has six mills, with twenty-three run of stone, and an aggregate capacity of 2,190 barrels per day. According to the published statistics, the flour exported during the year 1866 amounted to 324,353 barrels, and of wheat 2,267,933 sacks, a great portion of which went to the Atlantic markets. What a commentary on the prediction made upon the first emigration of the American population, that California never could become an agricultural country, and would be obliged to import her breadstuffs from abroad. Every season the fertile valleys of California teem with millions of acres of grain—a portion of which yields the astonishing product of seventy-five bushels per acre. The wheat crop of last season was unusually large, and the product the heaviest ever raised in the State. The prospect for the coming season is equally flattering; and from the indications, after an abundant supply for home consumption, there will be a large surplus for shipment to other markets abroad. The arrangement recently made, by which large amounts of flour are shipped to the Eastern markets, by the Pacific Mail Company's steamers, and by railroad across the Isthmus of Panama, is an important era in this department of trade; although, owing to the increased freight charges, there is allowed but a narrow margin to shippers, the difference in the time, between this channel and the usual shipment around Cape Horn, is believed to be amply sufficient to make up the deficit.

TABLE OF GRIST MILLS,

With the Location, Name, Run of Stone, the Capacity per Day, Power Used, Cost or Valuation, and Occupant's Name of each.

SAW MILLS.

The erection of saw mills and the manufacture of lumber was one of the earliest and most important enterprises engaged in upon this portion of the Pacific Coast. The demand for materials for building and mining purposes, attendant upon the discovery of gold in California, gave rise to the erection of a large number of saw mills, both in the interior and at various points along the coast in this State, Oregon, and Washington Territory. The vast and inexhaustible forests of the best quality of timber for this purpose were peculiarly favorable to this branch of manufactures. While a large amount of the lumber used in San Francisco is shipped to this port from the region of Humboldt Bay and Mendocino in this State, the greater portion comes from Port Orford, in Oregon, and Puget Sound, in Washington Territory. The cedar lumber from Port Orford is considered the best material for flooring, in use. The amount of domestic lumber imported during the year ending Dec. 31, 1866, as exhibited by the books of the Lumber Dealers' Association is: Pine, 85,000,000 feet; redwood, 55,000,000 feet; laths, 22,000,000; shingles, 25,000,000. Two of the largest planks ever produced in any country were exhibited at the Fair of the San Francisco Mechanics' Institute in September, 1865, and attracted universal attention. They were of the native redwood, entirely free from sap and knots or flaw of any kind, seven feet five inches in width, and twelve feet long. They were sawed at a mill on the Noyo, a river up the coast, in a region abounding with a giant growth of timber. The proprietors of the mill, desirous of attracting attention to the great lumber resources along the northern coast of California, sent an order to a leading New York house for a sash-saw twelve feet long, the largest saw ever made of this description being but ten feet. An article was specially manufactured in Sheffield, England, and shipped here for this purpose. After the close of the exhibition here, one of these mammoth planks was donated to the Smithsonian Institute, at Washington, and the other was reserved for exhibition at the World's Exposition at Paris, in 1867. The number of mills in the State is three hundred and ninety-eight, of which two hundred and eight are propelled by steam, and one hundred and ninety by water. Cost of erection estimated at two and a half million of dollars. Aggregate capacity is about five hundred millions of feet per year. The Surveyor General returns as the product of 25 counties in 1865, 112,046,053 feet.

MANUFACTURES—MISCELLANEOUS.*

There is probably no State in the American Union that is provided by nature with all the varied facilities for carrying on every species of manufacturing, in a greater degree than is the case in California. The rigors of climate, and the extremes of temperature, which prove such a serious drawback to enterprises of this character in the Northern States, are here unknown; and in no portion of this State is there a day when manufacturing operations are interrupted by inclement weather. The water power distributed over the State in localities highly favorable to manufacturing enterprises, is inexhaustible in its extent; and there is no scarcity of fuel, furnishing steam power where it is required. Timber of the best quality, with all the other needed accessories, is abundant. Such are the advantages for carrying on every department of manufactures, that the time is not far distant, when all articles needed for home consumption, all that we eat, drink, or wear, will be produced here; and the immense sums paid for articles imported from abroad, retained in this State to assist in developing its inexhaustible resources. The aids to manufactures afforded by the State have been numerous and liberal; and several of the magnificent premiums offered by the Legislature have been already awarded to the pioneers in the manufacture of staple fabrics among us.

A considerable portion of the labor of the convicts in the California State Prison is let out to contractors at a rate of about thirty-one cents per day. While we do not approve the bringing into competition of the labor of this class with that of the honest citizen, in the emergency of the case, this is an evil which seems unavoidable. Of the number of convicts employed by contract, 150 are engaged on harness and whips, 88 are making shoes, 63 making up woolen goods, 33 at work in the cooper shop, 30 manufacturing blank books, and 20 engaged on wagons and carts.

The low rate at which Chinese labor can be had in California, affords certain manufacturing advantages which are not possessed by any other portion of the country.

*The returns of the Internal Revenue Department referred to in this part of the work are those of the First District, comprising the counties of San Francisco and San Mateo. In the Classified Business Directory, pp. 385 to 568, will be found, arranged under appropriate heads, the different mercantile and mechanical firms on the Pacific Coast.

WOOLEN MANUFACTORIES.—Two manufactories, largely engaged in the production of all kinds of woollen goods, but more especially the staple fabrics, have been in successful operation in San Francisco, for several years past. Through the improvement of the quality of the raw material, by the introduction of the best breeds of fine-wooled sheep into the State, and the use of all the modern improvements in machinery, the articles turned out at the Pioneer and Mission Mills are nowhere surpassed, and the goods manufactured to fill army contracts during the war, bore away the palm on account of the superior quality of the material and fabric. The quantity of goods manufactured at these establishments during the year ending June 30th, 1866, returned to the Internal Revenue Department of this District, amounted to \$899,734.66.

The first manufacture in this important branch on this portion of the Pacific Coast was commenced in 1858, by Messrs. Heyneman, Pick & Co., an enterprising San Francisco mercantile firm. Erecting spacious and suitable buildings for the purpose at Black Point, on the Bay, they imported from abroad all the requisite improved machinery, and engaged competent workmen from Eastern establishments to perform the work. Although the breeds of sheep had not then been improved as they are at present by the introduction of the finer woolled varieties from abroad, the supply of the ordinary stock for the manufacture was abundant. In the fall of 1861, the entire establishment was unfortunately burned, but with characteristic energy, in the course of a few months another building, superior to that destroyed, was fully completed and filled with new machinery from abroad; and under the direction of a joint-stock company, with a capital of \$300,000, resumed operations. This establishment keeps 350 hands constantly employed, runs 18 sets of carding machines, 6,000 spindles, and 72 looms; and manufactures annually into blankets, flannels, tweeds, cassimeres, flannel and tweed overshirts, undershirts and drawers, 1,600,000 pounds of wool. To the Pioneer Mills was awarded the first premium offered by the San Francisco Mechanics' Institute, at their Fair, in September, 1865.

The Mission Woollen Mills were established by the individual exertions of Donald McLennan, an enterprising manufacturer from the East, in connection with Mr. Lazard, the head of a leading mercantile house in San Francisco, in 1861. The location on Folsom street between Fifteenth and Sixteenth streets, in close proximity to Mission Creek and the Bay, is peculiarly adapted to the purpose. The concern has been merged into a joint stock corporation with a capital of \$500,000, of which Mr. McLennan, the original projector of the enterprise, is the President, and who superintends the operations of the manufactory in person. The goods manufactured at the Mission Mills, consisting mainly of blankets, heavy army and navy and other cloths and flannels, bear a high reputation both at home and abroad; fairly competing with the best foreign fabrics. In order that California manufactures may be properly represented at the World's Fair at Paris, the enterprising proprietors of these mills have forwarded for exhibition specimens of the various styles of goods manufactured by them.

A company, with a capital of \$50,000, was incorporated in June, 1866, for the purpose of erecting a woollen manufactory at Marysville, the work upon which is going on. Similar enterprises are in contemplation in Santa Cruz, Copperopolis, and at Folsom, where an inexhaustible water power affords the best facilities for every kind of manufacturing.

KNIT WOOLEN GOODS.—Extensive works for the manufacture of all kinds of knit goods, have recently been completed and put in operation by the Pacific Woollen Mill Company, on the corner of Folsom and

Eagle streets, San Francisco. The main building is 112 by 52 feet, and three and a half stories in height, with an engine and boiler house, dry-house, and dye-house, and dwellings for operatives attached. The machinery, which is of the most approved patterns, both foreign and American, consists of seven sets of cards, six mules of 400 spindles each, of English make, and thirty stocking looms—the greater portion of which are of American manufacture, Aitken's Patent—with a few of Lamb's machines from England. The machinery is driven by a high-pressure engine of 100-horse power, the fly-wheel of which, 16½ feet in diameter, weighs about 20 tons. The erection and entire arrangement of this establishment has been under the charge of Mr. James Roberts, for many years Superintendent at the Mission Woollen Mills. The capital stock of this company is \$500,000. George F. Bragg is the agent.

Another establishment of a similar character was put in operation on the corner of Turk and Pierce streets, by Messrs. Sharp and Goldstein, in August, 1866. In addition to the carding and spinning apparatus in use, the machinery includes a number of Aitken's Patent knitting machines. Every variety of knit goods, including men's, women's and children's underclothing, for which there is ample demand in this market, are manufactured at this establishment.

COTTON MANUFACTORY.—The articles of incorporation for the erection of the first cotton manufactory in California, were filed in the office of the Clerk of San Francisco County, in August, 1865, under the style of the Oakland Cotton Manufacturing Company—Wm. H. Rector & Son, the present managers, being the principal stockholders—with a cash capital of \$100,000. Shortly after, a brick building 90 by 45 feet, and two stories high, was completed, and fitted up with the requisite machinery for the manufacture of cotton goods. This mill, which is eligibly located near Oakland, Alameda County, contains thirty two looms, propelled by a steam engine of 40-horse power. The concern gives constant employment to about thirty operatives. The company have erected three commodious brick buildings contiguous to the mill, for the accommodation of the employes. When first put in operation, the supplies of the raw material worked up, were principally drawn from the East, with a portion from Mexico; but the culture of cotton in the southern portion of California, having been fully demonstrated to be a decided success, the premium of \$3,000, offered by the State for the first and best cotton plantation having been awarded two years since to Matthew Keller, of Los Angeles, and a large crop having been raised last season, there is no doubt but that a sufficient supply will soon be afforded at home. This establishment manufactures 30,000 yards of shirting per month. The product during the year 1866 amounted to 100,000 yards of shirting and 50,000 of brown sheeting.

COTTON WADDING.—Mills for the manufacture of cotton wadding, batting, etc., combining all the later improvements in this department, including recent patents, were erected by I. C. Mayer & Son, the present proprietors, on the south side of Turk street, between Scott and Pierce streets, San Francisco. Wadding is made single or double glazed, and of any desired weight, to suit the requirements of the market; and batting can also be furnished to order, either for the use of tailors and other manufacturers, or for surgical purposes. About twenty-five bales, or 1,000 pounds of wadding, and the same of batting, can be produced each day. All the machinery in use was ordered in the East, and the workmen, about thirty in number, who are engaged for a term of years and reside on the premises, are also from some of the leading Eastern manufac-

tories. The

ories. The office of these mills is at No. 224 Sansom, over the Bank of British Columbia. Messrs. Rosenbaum & Friedman, Nos. 22 and 24 Battery street, are the Agents.

SILK.—During the past year an important branch of manufactures has been commenced, which is destined to assume a considerable degree of importance in our State. Mr. L. Prevost, a well-known horticulturist at San José, having imported, direct from China, a quantity of eggs of the silk-worm, raised from the same, during the summer of 1866, a large amount of cocoons. Other parties also engaged in the enterprise, the soil and climate of this State being peculiarly adapted to the growth of the mulberry and the successful rearing of silk-worms. From the product of this enterprise, Messrs. Newman & Myers, of San Francisco, succeeded in manufacturing a considerable amount of elegant silk dress goods of various styles, as well as varieties of sewing silk. The articles produced will fully compare, in point of fineness, evenness, and firmness of texture, with the best specimens imported from China and Japan, or those produced by the looms of Lyons. Specimens of this manufacture, exhibited at the California State Fair, in September, 1866, were awarded a handsome premium. An extensive manufactory is in the course of erection at San José—machinery of every requisite quality, embodying all the recent improvements in this department, has been procured—and every preparation made to carry on the business to its fullest extent.

CLOTHING.—The amount of clothing returned to the Internal Revenue Office of this District, during the year ending June 30th, 1866, was considerably over a million of dollars. When it is considered that this manufacture depends almost entirely upon the woolen mills of California and Oregon for the stock worked up, the magnitude of this interest must be apparent. With many other manufactures here, the making up of clothing has increased to an unprecedented extent within a few years. Like other manufactures, too, of a similar nature, the business is divided up among a large number engaged in it. The Pioneer Clothing Factory, S. Reinsteim, proprietor, is located on the corner of Commercial and Battery streets, is most extensively engaged in this business; this concern giving constant employment to 150 hands, and manufacturing to the extent of \$20,000 per month. Messrs. Weidenreid & Lehman, located on Sansom street, between Sacramento and Commercial, were among the first to commence this manufacture to any extent, having been engaged in the business for the past five years. In addition to other articles of clothing, they are extensively engaged in the manufacture of white and flannel shirts and drawers. The substantial manner in which their goods are made, with their superior finish, give them a decided preference over similar articles manufactured in the Eastern cities. The California Clothing Company, also, do an extensive business at their manufactory on Pine street near Battery, giving regular employment to over one hundred persons.

BOOTS AND SHOES.—The return made in this department to the Assessor of Internal Revenue during the year ending June 30th, 1866, which amounts to near half a million of dollars, is the fullest proof of the fact that no branch of domestic manufactures has increased with greater rapidity than that of boots and shoes. This is an enterprise that has sprung up almost entirely within a comparatively few years past, the greater portion of all the articles in this line in use here being imported from abroad. The increase of tanneries, and manufactures of leather producing a better article than can be procured elsewhere, and the high prices demanded abroad, set our home manufacturers to work; and with their improved facilities,

better stock, and superior quality of work, they are able to compete successfully with manufacturers abroad. The most extensive concern engaged in this business is that of Messrs. Wolf & Co., who, a short time since, completed, for this purpose, a building on Folsom, between Eighteenth and Nineteenth streets, 40 by 80 feet, and 3½ stories high, with a tannery attached, covering an area of 150 by 245 feet; steam power is used, and one hundred and twenty-five hands are employed. The stock used is all produced in California. The manufactory of Wentworth, Hobart & Co., at No. 210 Pine street, affords another evidence of the rapid increase of this business. The proprietors commenced, about two years since, with but three workmen; now they employ not less than a hundred, with all the latest appliances of machinery, turning out something like a thousand pairs of boots and shoes per week; about five thousand sides of sole and skins of upper leather are worked up each month. Messrs. Hein & Bray, on Battery street, are also extensively engaged in this manufacture, employing about seventy-five hands, and turning out about seventy-eight pairs of men's and boys' kip and calf boots per day, besides a large number of pairs of pegged shoes. The sole leather used by them is from the Santa Cruz tanneries, and the work produced is of a superior character. Another manufactory has been established on the corner of California and Sansom streets, by C. A. Morrill & Co., a firm formerly engaged in the business in the East, who propose to enter largely into this manufacture.

To George K. Porter, who has been for many years an owner in one of the principal tanneries of Santa Cruz County, is accorded the credit of being the pioneer in this important branch of manufactures, which he entered into for the purpose of working up the products of the tannery in which he is interested. In connection with some outside assistance, he has a contract with the State for the labor of thirty or forty convicts in the State Prison, who are employed in the manufacture of the coarser quality of boots and shoes.

SHIRTS.—During the past year the manufacture of shirts on an extensive scale was commenced at 611 Sacramento street, San Francisco, by G. F. Falkenstein & Co.; and the enterprise has succeeded so well, there being such a steady demand for the domestic manufacture, that others have followed. Most of the large clothing manufacturers include this in their business. The concern named keeps 75 to 100 persons constantly employed, a room 35 by 80 feet being devoted to the business. The front is occupied for the manufacture of the best qualities of linen and cotton shirts, 35 girls, each provided with a sewing machine, being engaged in the work. In the rear end, the same number of Chinamen are employed, each with a sewing machine, at work upon hickory shirts, and the heavy and coarser styles of goods in use. The concern turns out from 40 to 50 dozen of hickory, and from 20 to 30 dozen of linen and cotton shirts each day. M. L. Haas & Co., and Esberg & Co., are also engaged in this manufacture.

BLANK BOOKS.—Wm. B. Cooke & Co., the enterprising law stationers of San Francisco, having arranged with Taylor & Co., of the Pioneer Mills, for a uniform and sufficient quantity of paper, have commenced the manufacture of all kinds of blank books. They have contracted for the labor of fifty of the convicts at the State Prison, where they have put up the requisite apparatus and ruling machinery for the purpose, the whole being under the direction of Alexander Buswell, who has had a long and extensive experience in this department. In addition to blank books and paper ruling of every description, an extensive bookbinding will be connected with the concern.

PAPER.—Owing to the increased demand for printing paper upon this coast, and the high prices of stock at the mills in the Atlantic States, the manufacture of this article here is every day assuming a greater degree of importance; and, notwithstanding the capacity of the two mills that have been in successful operation in this State for a number of years past, they are unable to supply the demand. The abundant water power which exists throughout this region, and the purity of its crystal streams, afford every facility for the successful prosecution of this branch of manufactures. The total value of the stock produced at these mills, during the year 1866, amounted to \$172,801. The first of these, the Pioneer Mill, erected ten years since, at Taylorsville, Marin County, by S. P. Taylor & Co., produced during the year 1866: of book and map paper, 1,410 reams; news, 3,338; assorted colors, 538; Manila wrapping, 7,082. The paper used for the State Printing during the last session of the Legislature was produced at this establishment; and the greater portion of the paper used in the map-publishing business of this coast comes from the same quarter. The San Lorenzo Mills, on San Lorenzo Creek, Santa Cruz County, owned by Messrs. Harrison, Sims & Smith, which have been in successful operation for the past six years, manufactured, during the year 1866: 6,717 reams of news, and 31,000 of straw paper. The quantity of material worked up in both establishments, during the same time, was 500 tons of cotton rope, 600 of straw, and 100 of waste rope.

POWDER.—The immense quantity of powder used in blasting in the mining and other operations on this early created a demand for the article. No attempts were, however, made at its manufacture until, when the California Powder Works Company was organized, with a capital stock of \$100,000, which has since been increased to \$300,000. The first powder made was in May, 1864, since which time the mills have been in successful operation. The works are located in Santa Cruz County, on San Lorenzo Creek, which stream affords abundant water power for all the operations of the concern. The machinery is of the most approved styles, and is in no respect surpassed by that of any similar establishment in the United States. It includes five sets of wheels and two double presses, with a capacity of manufacturing six hundred kegs per day. The sulphur used has hitherto been imported from Europe; but as immense bodies of the crude article exist in various portions of the State, and refining works have been put in operation by the California Borax Company, at Clear Lake, and also in Colusa County, where crude sulphur is abundant, there no longer exists an excuse for importing this material from abroad. The nitrate of soda, which is essential in the manufacture of blasting powder—although refined saltpetre is sometimes substituted in its stead for sporting powder—is imported from Peru, where it exists in abundance. Large quantities of the willow and alder growing in the vicinity, the charcoal used is manufactured on the ground. For the purposes of security, the works are distributed at considerable distance from each other, over an area of one hundred acres, and such precaution is taken to render an accident almost an impossibility. During the year 1865 these works produced over 40,000 kegs of blasting and 300 kegs of sporting powder; and during the year 1866 double that amount of blasting, and over 5,000 kegs of sporting powder, all of which meets with a ready market. The only other manufactory of this character in California is that of the Pacific Powder Mill Company, located on Tokeluma Creek, near San Rafael, in Marin County. This company was organized in April, 1864, with a capital stock of \$30,000, which was afterwards increased to \$60,000. The machinery, which is of a capacity sufficient to produce about two hundred kegs of pow-

der per day, is distributed in a number of buildings located at a distance from each other, over an area of 500 acres. Both water and steam power is used. The company import their nitrate of soda from Peru, but have adopted the refined sulphur manufactured by the California Borax Company, which is found to fully answer the purpose. Innumerable accidents, resulting in the loss of life and limb, to the large number of people engaged in blasting in the mines, from the defective quality of fuse imported from abroad, the want of a home manufactory of this indispensable article has been felt here for a long time; and although the merits of the subject have been fully canvassed, nothing permanent has as yet been done in the matter.

GLASS.—Although the manufacture of glass during the year 1866 amounted to but little over \$80,000, its importance should not be underrated. The quantity, owing to the constant and rapidly-increasing demand growing out of the extended wine products, druggists' and manufacturers' wares of various kinds, mineral waters, mustard, pickles, and similar manufactures, falls far short of the demand. The first manufactory of glass in San Francisco was by the Pacific Glass Company, which was incorporated in 1862, who erected a large building on a tract of ten acres, purchased for the purpose, on the Potrero, and contiguous to the Bay. Glass blowing was commenced here on the 16th of June, 1863, since which time the work has been steadily continued. From forty to fifty hands are employed, and every variety of glassware demanded by the increasing manufactures of the country, are produced. These works are at present conducted by Messrs. Saulsbury, Kirk, and Mordecai. The San Francisco Glass Works, owned by Messrs. Newman and Brannan, located on Townsend street, between Third and Fourth, have been in successful operation for two years past. They employ forty hands, and turn out lamp chimneys, bottles, jars, and druggists' ware to the amount of \$1500 each week. This establishment is prepared to furnish retorts needed in chemical laboratories of any capacity, up to twenty-five gallons; and during the past season manufactured for the chemical works of Judson & Co. twelve twenty-gallon retorts, to be used in the manufactory of acids for the San Francisco United States Mint, as well as twenty-four sixteen-gallon retorts, and a large number of glass syphons for the chemical laboratory of B. B. Thayer and Co., of this city. The white sand used for the finer quality of glass made at these establishments is found in large quantities in Monterey County; the next quality comes from Oakland, across the Bay; whilst that for the common or ordinary quality is found in immense quantities in the hills of San Francisco.

CORDAGE.—The only establishment in this department is the Pacific Cordage Manufactory, located at the Potrero, and owned by Messrs. Tubbs & Co. It was established in 1856, since which time it has been in successful operation, there being a constant demand for the articles produced. The rope walk is fifteen hundred feet in length, and the building, comprising the spinning department, is one hundred feet long by forty in width. Fifty hands are kept constantly employed, and over 2,000,000 lbs. of cordage were manufactured during the past year. The stock worked up is imported from Manila direct.

MATCHES.—Although the manufacture of friction matches was only commenced in this city six years since, it has steadily increased, until the domestic article has almost wholly monopolized the market—the article produced here being a superior as well as cheaper article than the imported. This article requiring to be stamped direct, we have no means of arriving at the exact quantity produced during the

past year.

LEATHER.—The amount of leather returned to the Assessor of Internal Revenue during the year ending June 30, 1866, fell but little short of \$250,000. Owing to the abundance of stock, and the high prices abroad, a greater degree of attention is bestowed upon home manufactures. It is found that the shipping of hides to the Eastern markets—although previous to the discovery of gold in California this traffic constituted the main trade of this portion of the Pacific—to have the same returned at a vastly increased rate in the form of manufactured leather, was neither a wise nor profitable policy. The number of tanneries in California has rapidly increased during the past few years, until so far from being dependent upon Eastern manufacturers for this article, large quantities of the best quality of sole leather are shipped to the Atlantic States *via* the Isthmus of Panama by each outgoing steamer. These shipments amount to about 2,000 sides per month, with a prospect of increasing rather than diminishing. The principal qualities of leather produced here are sole, kip, harness, belting, and hose, although the attention of those engaged in this manufacture is being turned to the production of calfskins and moroccos. Owing to the large size, heavy and firm character of the hides of the cattle slaughtered here, the sole leather manufactured is superior to that produced in the tanneries of the Eastern States. The bark of the peculiar species of oak found along the coast from Monterey Bay to Mendocino, noted for its excess of tannin, is peculiarly adapted to this purpose; and many of these ancient denizens of the soil have been stripped bare to serve this important end. To such an extent has this been carried in some instances that even the ancient oak upon which the venerated Padre Juniper, Cerro and his followers commemorated the landing of the first white men upon these shores at the Bay of Monterey, by cutting a large cross deep into the trunk, has been entirely denuded of its bark by some vandal, whose bump of reverence for the past had been similarly ruzed down by the utilitarian spirit of the present. The largest tanneries in the State, on account of the peculiar advantages afforded by that region, are located in Santa Cruz County; although numerous others, various in extent, are more or less scattered over the State and throughout this portion of the coast. The number of tanneries in this State is nearly forty, of which twelve are in San Francisco.

SADDLERY AND HARNESS.—The quantity of leather worked up in this form in the city of San Francisco, during the year, according to the showing of the Revenue Assessor's books, amounts to \$111,000. The quality is mostly of the heavier and substantial character of articles in this department, although the carriage harness and finer class of manufactures in this line are not surpassed by any imported from the East. The leather produced here being of a heavier and more substantial nature than that imported from abroad, is better adapted for ordinary use and requirements of the large number of teamsters extensively engaged in the transportation of goods over rough mountain roads to distant mining regions—a business requiring the most substantial and durable articles of harness that can be produced. The heaviest manufacturers in this branch in San Francisco are Messrs. Main & Winchester, pioneers in the business, who early established themselves here and opened an extensive trade at various points. Mead and Co., J. C. Johnson & Co. are also extensively engaged in the business.

TYPE FOUNDRY.—Although the business of manufacturing type, stereotyping, and electrotyping has been carried on in San Francisco on a limited scale for a number of years past, yet it is only recently that the manufacture of full fonts of type of every variety, embracing every style of plain and ornamental letters, has been commenced. Messrs. Faulkner & Sons, having imported all the necessary machinery, and engaged the most skillful workmen in this department, and beginning work in November last, have already produced a sufficient supply of all sorts in this line to meet the demand, including full sets of type for a number of the newspapers of this Coast.

FURNITURE.—A reference to the returns made to the Federal Assessor of the Internal Revenue Department shows the amount of Furniture manufactured in the city of San Francisco for the fiscal year to be \$1,039,370. When it is considered that for a long time even the most common articles of household furniture in use here, were manufactured and imported from abroad; and also, that although this portion of the Pacific produces many beautiful woods, yet the greater portion of the material worked is produced elsewhere, the magnitude of this manufacture seems really wonderful. Within a comparatively short time a number of extensive manufactories have been erected, in which all the recent and improved machinery has been introduced, where every variety of articles in this department, suited to the wants of this community, are turned out in large quantities. Of the numerous parties engaged in this business, the most extensive establishments are those of Messrs. Goodwin & Co., J. Peirce, N. P. Cole & Co., and W. G. Weir, who has recently erected a large building for this purpose in Hayes Valley. Some highly polished and beautiful specimens of laurel and other native California woods were sent to the World's Fair at Paris by Mr. J. D. Boyd, furniture manufacturer, No. 412 Pine street. Messrs. Field & Co., 407 Mission street, are extensively engaged in the manufacture of bedsteads, tables, etc.; and Messrs. Jacob Schreiber and J. F. & H. H. Schafer daily produce for their large and increasing trade a considerable amount of beds and bedding.

MATTING.—The manufacture of Manila Matting was commenced in San Francisco in May, 1866, by D. Jordan & Co. This experiment, which was commenced on a small scale, has been found to succeed so well that the product has almost driven the imported article from this market; in fact, since its going into operation, the price of matting has been reduced twenty per cent. The manufactory, which is located at No. 620 Ellis street, contains six matting looms, two skeleton mat machines, and one mat loom, and produces nine hundred yards of matting, with eighteen or twenty dozen mats per week. The material used, termed "coiet yarn," spun from the fiber of the outside husk of the coconut tree, is imported direct from Manila. As the raw material exists in large quantities much nearer this coast, it is the intention of the proprietors to put up the requisite machinery for spinning the article. They also intend, during the coming season, increasing their looms to thirty in number, and are about erecting a dye-house; so that in a short time all the various operations connected with the business will be conducted directly on the spot.

BROOMS.—There are fourteen manufactories of Brooms in California, ten of which are located in San Francisco. The material worked up is of California production; the growth of broom corn being heavy, the brush is of a quality much superior to the imported article, which has been entirely driven from the market. The broom corn used commands a price ranging from \$50 to \$75 per ton, and the manufactured brooms from \$3 to \$6 per dozen.

BILLIARD TABLES.—There are three manufactures of Billiard Tables in San Francisco: that of Mathew E. Hughes, on Montgomery street, who manufactures from seventy-five to one hundred tables a year, and who has made since commencing business 2,500 tables. Every portion of these tables is manufactured here, except the cushions—Phelan's Patent—which are made in New York. Jacot Strable & Co., the pioneers in this department, commenced the manufacture of tables in 1851, since which time they have turned out 2,005 tables, one of which, exhibited at the first Mechanics' Fair, held in San Francisco in 1855, took the premium, and afterwards sold for \$1,150. In the years 1857-8, the business of this firm amounted to \$100,000 per year. A large number of the tables in private establishments were manufactured by them. They make from fifty to seventy-five tables each year. The remaining manufactory, that of P. Liesenfeld on Battery street, turns out about twenty-five tables per annum, and has, during the eleven years he has been engaged in the business, produced three hundred tables. Many of the native woods of this region, California rosewood, curled maple, and other varieties, are employed in this manufacture. (Since the foregoing was written, Messrs. Hughes and Strable have formed a copartnership, and have removed their manufactory to 567 Market street.)

WOODEN WARE.—One of the most extensive establishments for the manufacture of wooden-ware on this coast is that of Messrs. Elam & Howes, which is located on the corner of Main and Mission streets, San Francisco. The building is of brick, sixty by sixty feet, and three stories high, and fitted up with all the requisite machinery driven by steam-power, for the manufacture of pails, tubs, and every variety of wooden-ware in use. Thirty men are kept constantly employed, and all the material used, pine and cedar—about 100 cords of which are worked up each month—is of California and Oregon growth. This manufactory turns out regularly every day 25 dozen pails, 50 nests of tubs, 10 dozen washboards, 150 powder kegs, besides other minor articles, sufficient to supply the market of this region. Messrs. Ames & Dallam are also engaged in the same business, and employ a large number of persons.

SHOW CASES.—There are several manufactories of show cases of the various sizes suited for the trade in San Francisco; that of Teubner & Hoffman, corner of California and Kearny, is largely engaged in the business.

PIANOS.—There is but one manufactory of pianos on this Coast, that of Jacob Zech, Ninth street, between Howard and Folsom. During the ten years in which Mr. Zech has been engaged in the business he has manufactured four hundred and eighty instruments, of superior tone and finish. Many of the native woods of this region, ash, laurel and other varieties, are used in their manufacture. Mr. J. Mayer is engaged in the manufacture of church organs, and has produced several excellent instruments, of great power and sweetness of tone.

MIRRORS.—The silvering of glass and the manufacture of mirrors was first commenced in San Francisco in 1863 by Messrs. Cameron, Whittier & Co. The action of the sea air, and damp attendant upon the shipment from Europe and the Atlantic States, had the effect of corroding the amalgam and dimming the luster; this materially depreciated the value of the imported articles, and rendered such manufacture an absolute necessity. This firm commenced with only one workman and one silvering table, but the demand caused by the superiority of the article produced has steadily increased until they

have now in use three silvering and two polishing tables, by which they are enabled to silver the largest sized plate glass in use—the largest table being capable of coating glass 96 by 144 inches. The finest quality of plate glass used in this manufacture is procured from France, Germany and Belgium. Old and damaged mirrors can be re-silvered at this establishment at a comparatively slight cost.

BRUSHES.—The first manufactory of brushes was that of Messrs. P. B. Comins & Co., who commenced business at 417 Mission street, San Francisco, June, 1866. Although these enterprising manufacturers had numerous difficulties to contend with at the start they have surmounted every obstacle, and their business is now on a permanent basis, and steadily increasing. They are constantly at work making nearly every variety of brushes in use. The greater portion of the materials used are produced here. In addition to the ordinary material of bristles, which enters largely into this manufacture—the *Anole* or soap root, a native Californian plant, which exists in large quantities in every portion of the State, has been substituted with success.

GOLD AND SILVER WARE AND JEWELRY.—The manufacture of gold and silver ware, and all the finer articles of jewelry, is carried on to a large extent in San Francisco—which affords one of the best markets of the same extent in the world for this character of goods. For beauty and artistic merit of design, elegance of workmanship and elaborate finish, in this department San Francisco may deservedly claim the palm—her productions in this line having a wide reputation in the Atlantic and European cities. When it is known that many of the best artists from abroad were attracted hither by the golden harvest, this is not to be wondered at. Many of the designs for the plate and jewelry manufactured here are alike original and unique, most of them embodying emblems and features of a prominent local character. The richest and most elegant Gold Service ever gotten up in the United States was manufactured by J. W. Tucker, at San Francisco. This service, which was made to the order of the citizens here, and presented to Cornelius K. Garrison, upon the occasion of his retirement from the Mayorship, in 1854, consists of a large 22-inch salver, highly embossed and elaborately engraved with scenes and emblems, characteristic of the Golden State, coffee and tea urns, etc., comprising fifty pieces in all. The cost of the entire set was over \$50,000. It was the intention of the owner to have exhibited this magnificent specimen of Californian production at the World's Fair, in London, in 1856, but from some cause this was not done. It is to be hoped that it will be sent to the coming Exposition in Paris, to show to the world what our State can produce in this department. Elegant presentation services of silver have been at various times manufactured by Messrs. J. W. Tucker, Shreve & Co. and Barrett and Sherwood. There is also considerable diamond setting done by the San Francisco jewelers and lapidaries, and the elegant gold quartz jewelry, which originated here, has become universally popular.

SUGAR REFINERIES.—The only sugar refineries on the Pacific Coast are three in number, and located in the city of San Francisco. Their operations are very extensive; this important branch of manufacture being increased during the past year by the erection of an extensive establishment, and a considerable increase in the operations of those previously in existence. The first and longest established of these is that of the San Francisco and Pacific Sugar Company, the extensive buildings of which are located on the corner of Harrison and Eighth streets. This establishment is of a sufficient capacity to refine

1,500 tons of during that crushed, and business done 1866 amounted to \$400,000. Bay Sugar immediately Battery street, sive, and is a sugar per day. 1,500 tons of raw sugar each month, and turns out during that time 7,000 barrels of white sugar, 4,000 crushed, and 50,000 gallons of golden syrup. The business done at this establishment during the year 1866 amounted to \$2,008,213.

BAY SUGAR REFINERY.—This refinery is located immediately on the Bay, at the corner of Union and Battery streets. The machinery employed is extensive, and is capable of refining about 50,000 lbs. of sugar per day.

CALIFORNIA SUGAR REFINERY.—An extensive refining establishment erected on the corner of Brannan and Eighth streets by Messrs. Spreckels & Mangels, with a capacity of working about 100 barrels of sugar each day, has been in full and successful operation for some months past. The amount produced the few months it has been in operation was \$353,632. The raw material consumed is mostly imported from China, Central America, and the Sandwich Islands, in which latter country the cultivation of sugar is largely on the increase. The amount produced in these establishments during the year ending June 30, 1866, as shown by the exhibits of the Internal Revenue Department, reaches within a fraction of four millions of dollars, a sum more than double that of any single branch of manufactures.

MACARONI AND PASTE.—This manufacture was commenced at San Francisco in the year 1856, by Messrs. Brignardello Macchiavello & Co., who have been constantly extending their operations since that time, in order to supply the increased demand; the superiority of the articles they produce, having driven all others from the market. They manufactured at their establishment, on Sanson street between Jackson and Pacific, during the year 1866, about 20,000 boxes of macaroni, using for this purpose 10,000 sacks of macaroni wheat, of California growth, and over 600 barrels of flour.

YEAST POWDERS.—In the early days of the gold excitement in California, when thousands of men but little versed in the mysteries of the culinary art, rushed to the mountains in search of the precious metals, yeast-powders, or self-rising flour, were indispensable articles in the miner's outfit. The demand for the former was extensive and steady; and although civilizing influences have done away with the rude appliances of early times, the demand for the article still continues to a considerable extent. Donolly & Co., No. 121 Front street, San Francisco, manufactured last year, 3,000 gross of yeast-powders, and packed 50,000 pounds of saleratus, and the same amount of bicarbonate of soda, with 400 cases cream of tartar, containing about 300 pounds to the case.

MUSTARD.—The manufacture of ground mustard has been carried on to a considerable extent in San Francisco for several years past. The article used has been the native, or wild mustard, the growth of which was so prolific—the stalks attaining such a gigantic size in the fertile valleys of California as to baffle the efforts of the early cultivators of the soil to root it out and make room for other crops. What proved to be a pest, was made a source of profit, the seed saved by the separators in threshing grain, commanding a ready price, at from two to four cents per pound. The seed is of the black variety, and in point of strength and pungency, is superior, both for the table and medicinal purposes, to the article imported from abroad.

DISTILLATION OF SPIRITS.—The quantity of distilled spirits returned in this District during the year 1866, amounted to 42,151 gallons. The materials used are barley, wheat, Indian corn, rice, and in the event of a scarcity of grain in the market, quantities of molasses, imported from the Sandwich

Islands, have been substituted to advantage. A large number of small distilleries have been in operation during the past year, but the product has been mainly drawn from the two leading establishments, of a capacity inferior to but few if any similar concerns of this character in the United States. The first of these, that of J. Dows & Co., located on Mission Creek between Brannan and Folsom streets, has been in successful operation for more than ten years past. The consumption of grain each month amounts to over 1,000,000 of pounds, and the amount of whiskey produced during the same time is about 75,000 gallons. About three hundred tons of coal from the Monte Diablo mines, are consumed each month. A column still is in use for the manufacture of high proof spirits and alcohol, which is capable of producing from five to six hundred gallons daily. The establishment is also provided with an extensive rectifying apparatus, the greater portion of the product being made into pure spirits. The other leading manufactory in this line, is the Pacific Distillery of Messrs. Scott and Pierce.

CIGARS.—The fact, that the books of the U. S. Inspector in this department, and those of the Assessor of Internal Revenue, show that there were manufactured, in San Francisco, during the year 1866, cigars to the amount of over a million of dollars, is a fair criterion of the importance of a business that a few years since was comparatively unknown here. There are near one hundred firms engaged in the business; about one-half of this number being composed of Chinese, the remaining half consisting of Frenchmen, Germans, and other Europeans, who employ Chinese labor to a large extent. As the best evidence of rapid increase of this business, the taxes upon cigars, made here in the year 1864, amounted to less than two thousand dollars, while, in the year ending September 30, 1866, this tax amounted to over a quarter of a million. Although the experiment of raising tobacco has been tried in California with success—the premium of \$300 offered by the State a few years since for the first one hundred bales having been taken by a citizen of Sacramento County—so limited has been its cultivation, that the greater portion of the article used in this manufacture here comes from Ohio, Illinois, Missouri and other Western States. The cigars made here are attaining a wide reputation abroad, it is not improbable that parties producing the material may consume tobacco of their own raising shipped to the Pacific coast and returned to them in a manufactured form, constituting another extraordinary instance of the numerous strange anomalies of trade. So great is the demand for cigar boxes, caused by this extensive manufacture, that several firms are engaged in their manufacture, importing the material used—red cedar—from abroad for the purpose. Among the numerous manufacturers in this line, the heaviest returns are made by the following: Max Armbrust, John Clawson, F. Locan, Fruchtmicht & Co., Vogelsdorf & Co., R. Mayrlich, E. Goslinsky, Heardink & Co., R. C. Geilson, J. Morris, Benjamin Yom, Long Sing & Co., Kee & Ah Chun, Gee Gon. The amount of tobacco manufactured in other forms, is compared with the cigar trade, but a small item, the sum exhibited by the Internal Revenue returns for the year being but \$66,000.

RESERVED FRUITS, VEGETABLES, AND DRIED FRUITS.—This is an important department in California manufactures. In the first settlement of the State, and for a long time after, all articles of canned fruits and vegetables were imported from abroad; now, not only is a sufficient quantity of a superior article put up here to supply the home demand, but shipments abroad are made to a considerable extent. Cutting & Co., No. 202 Front street, who are most largely engaged in the business, have a capital of

\$150,000 invested, and at certain seasons employ 100 hands; they put up during the year 1866, something like 300,000 cans of fruits and vegetables, and about 100,000 gallons of pickles, besides ketchups, sauces, and other articles. These articles, shipped by this firm to New York, have been pronounced superior to anything of the kind put up on the Atlantic side; their canned tomatoes, peas, and beans being considered of a finer quality than those fresh gathered in that quarter. Cutting & Co. are also extensively engaged in putting up canned meats, and other articles in this department. They furnished in this manner 100,000 pounds of fresh beef for the French fleet on this coast, and have filled numerous orders for vessels going to sea.

In the department of dried fruits, the domestic product has almost driven the imported article from the market. The peaches, pears, apples, and prunes dried here, are in every respect far superior to those which come from abroad. The California prunes are pronounced a better article than those imported from France; and California raisins are becoming an article of commerce. Owing to the defective mode of curing, the dried figs are not equal to the imported. Weston & Co., Pacific Fruit Market, put up during the past season six tons of various kinds of dried fruits. Precht & Eggers, of the same market, are also largely engaged in the business.

CURED MEATS.—For a long time, it was supposed that owing to the mild climate of California, it was impossible to cure pork and beef sufficiently to stand the requisite test. The experience of the past few years, has clearly demonstrated that these articles can be cured and put up in such a manner as to insure their keeping in any climate. In fact, experience has clearly proven that, so far from being unfavorable to this enterprise, the temperature is admirably adapted to the business; and there is less risk now in packing meats in San Francisco in July or August, than is the case in the soft weather which often occurs in the winters of the Northern States. The article put up here has so completely monopolized the market, that pork and beef from abroad, once leading staples, have become a rarity. It is estimated that there are slaughtered daily in San Francisco, something like 150 hogs, averaging 104 pounds each—about 80 pounds of each carcass being cured into hams and bacon; the residue being sold in the markets, and converted into lard.

The pioneers in the pork and beef packing business in California were Root, Brady & Steinberger, men of large experience in this department in the Atlantic States. The parties most extensively engaged in the business at this time, are Messrs. Wilson & Stevens, who have erected at Black Point, immediately on the Bay, about two miles from the city, an extensive slaughtering and packing establishment, modeled after the best arranged concerns of the kind at Cincinnati and Chicago. The main building is 100 by 200 feet, the capacity sufficient to pack 1,000 hogs per day. The Point affords a uniform temperature of low degree, favorable to the business. Messrs. Dietrick & Co., and Willoughby & Co., Third street, also do a large business in this line.

BREWERIES.—The number of establishments in San Francisco where fermented liquors are manufactured, is 24; and the quantity produced during the year 1866, amounted to about 2,500,000 gallons. The barley used for the malt is exclusively of California growth—and a considerable portion of the hops used are raised here; being preferred to the imported, on account of a greater degree of strength and freshness—a sea voyage deteriorating the quality of the article. The principal establishments which are mainly devoted to the manufacture of that popular beverage, lager beer, are those of Messrs. Spreckles & Co., whose extensive brewery is on Everett

street between Third and Fourth, and the Philadelphia Brewery, occupying the Folsom property on Second. Lyons & Co. are the most extensively engaged in the manufacture of ale and porter. The number of breweries in the State is about 125.

CONFECTIONERY.—The manufacture of confectionery in San Francisco, amounted last year to something over \$300,000. This branch of business is divided up among a large number of small dealers. One of the most extensive manufacturing establishments in this line, is that of Rathbun & Co. on Sanson street, between Clay and Commercial.

SOAP.—The fact that the books of the Internal Revenue Department show a return during the year ending June 30th, 1866, of 361,500,600 pounds of soap, amounting in value to \$300,000, exhibits the extent and rapid increase of this manufacture. Every variety of plain, fancy, and toilet soaps are made at the numerous establishments engaged in this business in San Francisco. The materials employed are abundant, and in addition to home productions, large quantities of whale oil, cocoa-nut and palm oil from abroad are consumed. The establishment of J. H. C. Portmann, who first commenced the business on a limited scale, in 1857, on Market street, from whence he removed to his present extensive works located on Mission Creek near Center, where he has invested in the business over \$50,000, and produces about 200,000 pounds per month. The Eureka Soap Co., The Standard Soap Co., J. C. Blair & Co., Lucy & Himes, J. J. Bergin, John Fay, Charles Peterson, and F. Liephart, are also largely engaged in the business.

IRON FOUNDRIES.—The amount of castings produced at the Iron Foundries in San Francisco during the year 1866, was but little less than two millions of dollars, the greater portion being quartz and mining machinery. When the time shall arrive for the reduction of these extensive deposits of iron ore known to exist at various points along this portion of the coast, the magnitude of this branch of industry will be of incalculable extent. There are thirteen foundries in constant operation in San Francisco, in which about one thousand workmen are kept employed. Several of these establishments are of the most extensive character; and being amply provided with all the necessary machinery, they are fully capable of meeting all the demands that may be made upon them. The principal works are the Union Iron Works, H. J. Booth, G. W. Prescott, and I. M. Scott, proprietors; Pacific Iron Works, Goddard & Co.; Vulcan Iron Works, Vulcan Iron Works Co.; Fulton Foundry, Hinckley & Co.; Miners' Foundry, Howland, Angell & King; Golden State Foundry, Palmer, Knox & Co.; and the Aetna Foundry, Hancom & Co. In addition to these, there are numerous foundries to be found at various points throughout the State, almost every mining locality of any extent being provided with this useful and essentially necessary adjunct to mining operations. The number of Iron Foundries in the State, exclusive of San Francisco, is 22. The works at Sacramento, Marysville, and Stockton are well furnished with the necessary appliances for the construction of machinery of the heaviest description. The amount of business transacted by these establishments forms an important item in the interior trade of the State.

The other departments of metal working occupy the attention of a large number of enterprising firms throughout the State, and afford constant employment to a numerous and industrious class of our population. In the business department of the work will be found, arranged under appropriate heads, the various firms engaged in these branches of our mechanical resources.

cutting, tempering,

PACIFIC ROLLING MILL.—Work was commenced in August last, preparatory to the erection of the first Rolling Mill at Potrero Point, on the Bay of San Francisco, by doing the necessary grading and erecting a wharf into the Bay for the discharge of freight from the largest sized vessels. The rolling mill, which will consist of a substantial building of 150 feet by 235 feet, with a machine shop attached, 85 by 100 feet, will be finished and in complete running order in twelve months; all the requisite machinery and fixtures which cannot be produced in California, having been selected in the East, is on its way to San Francisco. Connected with other extensive arrangements, will be a forge of a capacity sufficient for manufacturing shafts for the largest sized ocean steamers, which will supply a want that has long been seriously felt. From the magnitude of this enterprise, and the thorough manner in which the parties engaged in it design to carry it out, it will be in no respect inferior to any similar work in the whole country.

The Pacific Forge Company, under the management of Messrs. Hall & Johnson, have erected a large building on Mission Creek, north of Fifteenth street, which is supplied with the requisite machinery for forging purposes. These works have been in successful operation for some time past; and it is the intention of the proprietors to add the necessary machinery for rolling iron.

LEAD.—The only manufacture of lead upon this portion of the Pacific Coast is carried on by Thomas H. Selby & Co., one of our oldest and most enterprising business firms. These parties erected in the year 1865, on the corner of Howard and First streets, San Francisco, a tower 80 by 70 feet, square at the base, and two hundred feet in height, for the manufacture of shot, of which they produce, as the market requires, every description, from buck shot to the smallest sizes, two hundred bags per day. They also manufacture Minnie balls, bar and sheet lead, and lead pipe, in sufficient quantities to keep the market supplied—the capacity of their manufactory, which comprises all the requisite machinery with the latest improvements, being double the present requirements in this department. About fifteen hundred tons of crude lead per annum are used. This large stock is nearly all imported from abroad; but experiments are making for the development and profitable working of the immense deposits of galena existing in various portions of this coast, many of which contain a large per centage of the precious metals, which is eventually bound to produce an article at home which will supersede the imported.

SAWS AND SAW TEETH.—The operations of the Pacific Saw Manufacturing Company, who commenced work at their manufactory on Pine street, between Battery and Front, in August, 1866, was an important event in the history of the mechanic arts of San Francisco. Hitherto everything in this department being imported from the East and Europe, when special orders were to be filled for sudden emergencies, great delays and a large additional expense were the result. Since this manufactory has gone into operation, all these difficulties are obviated. As there is nothing in this line of manufactory that cannot be furnished to order at a short notice, everything, from the largest sized circular and gang saws for mills to the smallest blades for mechanical and other purposes, can readily be produced at this establishment. The machinery is the most perfect in use, embracing all the modern improvements in the business, among which is Hubbard's patent, for grinding the circular plates in the rough, as they are imported from England, to a smooth and uniform surface. All the operations of cutting, tempering, hammering, and polishing are

gone through in regular order, the result of which is the production of a superior article, suited to the wants of this portion of the country. The improved furnace for tempering long saws, by which a great saving of labor is effected, originated in this establishment. Adjoining is the manufactory of N. W. Spaulding, whose patent saw teeth are in general use in almost every portion of the United States, from their superiority to all others in use.

WIRE AND WIRE ROPE.—The manufacture of wire and wire rope and cordage was commenced in San Francisco, in the year 1857, by A. S. Hallidie and Co. From a comparatively small beginning, this manufacture has increased until the firm supply the whole of this portion of the Pacific Coast. They manufacture round ropes of wire from one-sixteenth of an inch to two inches in diameter, and flat ropes from 2 x 1/4 to 5 x 1 inch. For this purpose they use about 200 tons of forty-two sizes and kinds of wire per annum. Of the former they have turned out in one piece ropes 3,000 feet in length; and of the latter, pieces of 1,200 feet, weighing 36,000 lbs. They have supplied the principal mines in Nevada with the wire rope used in their extensive hoisting apparatus, and guy ropes, as well as furnishing the material used for the construction of wire suspension bridges and aqueducts throughout California, Idaho, Oregon, and British Columbia, of from 200 feet to 400 feet span. One of the most extensive of these is the wire suspension bridge erected by this firm over the Frazer River in the last named territory. They have in operation three sets of machinery of modern English invention and make. The iron and steel wire used by this firm in the manufacture of ropes and other varieties of wire work is drawn in their mill, located on North Beach. Office, No. 412 Clay street.

AGRICULTURAL IMPLEMENTS.—The fact that a large majority of the most extensive and useful agricultural implements are patented inventions is a bar to their manufacture here, although every facility is afforded for the successful production of this important branch of business. This manufacture has thus far been mainly confined to plows, of which a large variety is made—a preference being given to them by the farmers over the imported article. The quantity produced in this State during the past year amounted to over 3,000. The reapers and threshers, of which there have been a number manufactured here during the past year, have demonstrated the advantages of producing such articles at home. The freight upon bulky articles of this class imported from abroad amounting to a considerable sum, the benefits arising from their home production are fully apparent. A number of inventions and improvements in agricultural implements, suited to the wants of this locality, which have originated here within the past few years, have been generally adopted.

CARRIAGES AND WAGONS.—The manufacture of carriages in San Francisco is steadily increasing; and such is the superiority of the vehicles turned out here that they have almost entirely superseded the importations from abroad. The amount returned to the Revenue Office of this district during the year ending June 30, 1866, was \$337,200. The principal manufacturers in this city are R. S. Eells & Co., Casebolt & Co., Kimball & Co.—who have a contract for the labor of twenty men at the State Prison, engaged on wagons and carts; H. M. Black & Co., Pacific Concord Carriage Factory, and O. F. Willey & Co. The number of men employed in the various manufactories in San Francisco is over two hundred.

METALLURGIC AND ASSAY ESTABLISHMENTS.—The business of smelting, refining, and assaying the

precious metals, is carried on to a considerable extent in California. Although there are several establishments in the first named department located in various portions of the State, owing to the universal adoption of the milling process for the reduction of metals, this business is not carried on to that extent that might be reasonably supposed. There are fifteen assay establishments in San Francisco, among which the following occupy a prominent position: Rogers & Brown, Hentsch & Berton, Falkenau & Hanks, B. B. Thayer, O. C. Pope, and J. A. Bauer. The most extensive refinery of metals in the State, next to the U. S. Mint at San Francisco, is the San Francisco Assaying and Refining Works, located on Brannan, near Seventh street, San Francisco. This refinery consists of a substantial brick structure, one story high, one hundred and thirty feet in length, and sixty feet wide, fitted up with a powerful steam engine and all the necessary apparatus for melting and refining metals in large quantities. The office of the establishment is at No. 416 Montgomery street.

CHEMICALS.—Although the returns made in this department during the past year amount to only about \$60,000, the demand for all articles of this character consumed in the numerous metallurgical, photographic, and manufacturing establishments generally is steadily increasing. The oldest concern of this character is that of E. Judson & Co., on Valencia, between Fifteenth and Sixteenth streets. The operations here have been mainly confined to the production of acids, this manufactory having, for the past twelve years, furnished the nitric, sulphuric, and muriatic acids used in the U. S. Branch Mint in San Francisco. The large quantities of nitrate of soda used, are imported from Chile and Mexico; and, notwithstanding large beds of sulphur are found all along this portion of the Pacific, the article required here is imported from Europe.

The Pacific Chemical Works, established by Messrs. Falkenau & Hanks, six months ago, on Sixteenth, between Folsom and Harrison streets, manufacture every article in this line for which there is any demand here, and are fully prepared to fill all orders for the trade. Their apparatus is extensive, and they are engaged in the manufacture of acids and every variety of chemicals used in metallurgical, photographic, and other operations—all kinds of medical and pharmaceutical preparations, pigments and dye-stuffs. They are also prepared to make assays and scientific chemical investigations, analysis of mineral waters, our mineral and metallurgical products, and commercial articles.

SALT.—Large deposits of salt are said to exist in certain portions of Californialying beyond the Sierra Nevada Range, and farther south in the Territory of Arizona. Their distance from navigation, and the consequent cost of transportation, render their working impracticable at present. Extensive deposits of a similar character are found in portions of the State of Nevada, from which the large quantities of the article used in working the silver ores of that region are procured. The manufacture of salt from seawater by solar evaporation is carried on to a considerable extent in Los Angeles and Alameda Counties, the latter works being immediately across the Bay from San Francisco. Large quantities of rock salt are also shipped to this market from the mines of Carmen Island, on the coast of Lower California. Four mills are engaged in grinding the product from these sources, while a considerable portion is used underground for the northern codfish trade, mining purposes, and pickling meats and vegetables. About 35,000 tons were ground at the mills in this city during the past year. Notwithstanding the extent to which the business has already been carried, it may be regarded as only in its infancy here.

OILS AND PAINTS.—One of the most thorough and complete establishments for the manufacture of oils and paints to be found in the United States has been completed, and will shortly go into operation in San Francisco. The building, which is located on King street, between Second and Third streets, near the Bay, is a substantial brick structure on a solid rock foundation, and is 43 feet front by 96 deep, with four stories and a basement in which the engine and the larger portion of the heavy machinery is placed. The chimney is ninety-one feet in height. The fifty-horse power engine used in driving the extensive machinery of this establishment was manufactured at the Vulcan Iron Works in this city; and embodying all the recent improvements in this department, is one of the most perfect specimens of the kind ever produced here. A large hopper is located in the basement, from which the seed to be crushed is conveyed to the upper floor, to be stored in bulk until such time as it may be needed. A large iron tank is also provided for receiving the oil. The two tempering stones, located on the second floor, which are of solid blocks of Angel Island stone, are seven feet in diameter and eighteen inches across the edge, and are each near five tons in weight. The iron bed plate traversed by them weighs near 3,000 lbs. Four rollers for crushing, and three hydraulic pipes, are located on the same floor. The third story is occupied by the machinery for crushing oil cake for feed, and for other purposes. The machinery, which is of a capacity sufficient to crush 4,000 bushels of flax-seed per week, is calculated for crushing linseed, castor-bean, mustard, rape and other seeds manufactured. There is also connected with this establishment a mill for the grinding in oil of white lead and zinc paints, and the manufacture of every variety of paints used in manufactures and arts. The entire arrangements have been under the superintendence and direction of Mr. B. P. Brunner, who visited all the principal establishments of the kind in the United States and Europe for the purpose of inspecting their works; and this mill is the embodiment of his observations. The powerful presses used are the inventions of this gentleman, patented some years since. Notwithstanding the soil and climate of California, are well adapted to the culture of flax-seed, owing to the want of a market for this product, which drawback is obviated by the going into operation of this manufactory, there has been but little of this article raised. Until a sufficient quantity can be furnished at home, the company will be compelled to draw their supplies from Calcutta and other countries abroad. The cultivation of the castor-bean promising to prove a profitable crop in this region, through the introduction of this manufactory, considerable attention is devoted to the subject.

TURPENTINE, PITCH, AND ROSIN.—The manufacturing of these articles engages the attention of numerous enterprising firms in this State and Oregon. In Yuba and Butte Counties the production is nearly one hundred tons per month, which can be increased to an almost unlimited extent, as the supply of the raw material is abundant. Notwithstanding the low prices obtained for these important articles of trade during the past year, the receipts from the interior are regular, and their production must afford to those engaged in the business a remunerative return.

OIL REFINERIES.—There are two establishments engaged in the refining of crude petroleum in San Francisco, one of which is owned by Stanford Brothers, and the other by Messrs. Hayward & Coleman; the first of which produced, during the past year, about 35,000 gallons, and the latter 45,000 gallons of the refined article, although, owing to the non-arrival of a supply of the crude article, operations have been slightly interfered with. has erected a refining establishment at San Buenaventura, Santa Barbara County, which is in successful operation. The flow from the springs, through the tunnels at this place, is from five to six barrels per day. The petroleum of this coast is an entirely different article from that produced from the wells of the Atlantic States, and practical experiment has demonstrated that the refined oil can be produced here at a cheaper rate.

POTTERIES.—There are several establishments of this character in San Francisco. At the Mission Pottery, J. W. Orr has been engaged for the past year in the manufacture of stone ware from a superior quality of clay, found in the southeastern portion of Sacramento County. He manufactures every variety of ware of this description, in common use, as well as for chemical manipulations, among which is an order recently filled for the San Francisco Acid Works for a number of condensers of a capacity of sixty gallons each, to be used in their manufactory. The pottery of R. Chabot, at North Beach, is principally occupied by the manufacture of sewer pipe, of which a large amount is made annually.

MARBLE WORK AND QUARRIES.—It is only within a year or two past that the marble manufacture has been carried on to any considerable extent in San Francisco—almost everything in this department being imported from abroad. Importations of the manufactured article have almost entirely ceased, and instead, the material is imported in blocks and slabs—most of it from the Italian quarries direct—and worked to order here. The manufactures in this line were largely increased the past year, amounting during that time to not less than \$200,000, with the prospect of a large advance in the future. The principal establishment engaged in the business, the Pioneer Steam Marble Works, located on Jackson street below Montgomery—the first steam manufactory of this kind in this city—which commenced operations during the past year, employs twenty-five hands upon building, monumental and furniture work. A considerable quantity of native California marble is used in the manufactories here. The first quarry discovered was that of a fine quality of clouded marble located at Indian Diggings, El Dorado Co. Since the first working in 1857, large quantities have been used, mostly for monuments, some of the finest works of the kind in the State being of this material. This quarry is owned and worked by Aitken & Co., of Sacramento. D. P. Myers has recently commenced working a quarry near Drytown, Amador County, which is extensive, and of a superior quality. The first work from this material is the steps of the new building of the Pacific Insurance Company, on the corner of California and Leidesdorff streets, which were furnished by the Pacific Steam Marble Works. Another extensive quarry is that of John Grant, near Columbia, Tuolumne Co. The first and only quarry of black, variegated marble—needed to fill a pressing want in this particular—the others being the white and clouded varieties—is that located in Placer County, contiguous to the line of the Pacific Railroad, and owned by James A. Pritchard, one of the pioneers in this department in San Francisco. This marble takes a high polish, and is admirably adapted for mantels, table tops, mosaic work, tiles, and other purposes.

FISHERIES.—During the early years of the settlement here by the Americans, owing to the mining excitement and other branches of business arising out of or dependent upon that all-absorbing matter, although it was a well established fact that immense quantities of the finest varieties of fish were to be found all along this coast, with the exception of the catching of salmon with nets in the Sacramento and

San Joaquin Rivers, and the capture of the whales that occasionally lost their reckoning and strayed into the Bay of Monterey, by the enterprising Portuguese, who have made this a paying business, it was only during the past year that the business has been carried on to any great extent in this quarter. At the commencement of last season a fleet of from fifteen to twenty large sized vessels sailed for the Sea of Ochotsk, and other fishing grounds on the northwest coast of America. These vessels have all been highly successful, returning with full cargoes of fish, and considerable quantities of cod-liver oil, which is pronounced by chemists, who have analyzed it, to be a very pure article, and superior to that imported. The fish are caught by hand lines, immediately cleaned and salted away in the holds of the vessels, in which condition they are brought here and dried on scaffolds, when they are fit for market. The average weight of the codfish caught in the Sea of Ochotsk, when dried, is three and three-fourth pounds, about half that of those caught on the Atlantic side. The fishing season commences in June, the fish improving as it advances, the fastest being caught by the whalers for their winter's supply during the month of October. The round trip from this port usually occupies about four months, allowing about forty days' time for fishing. The crews, mostly Americans, engaged in fishing range nine men to double that number, and the total register of the vessels employed was about 3,000 tons, and the total amount of dried fish did not fall short of 1,600 tons, which, at the usual rate of \$12 5/¢ per 100 pounds, will net a handsome sum. Some of the vessels engaged during the past season realized as high as \$15,000 the trip. This flourishing branch of business is destined to increase in importance each year. A fine quality of halibut is caught along the coast of Oregon, and herring are abundant in these waters. The waters of the southern portion of this coast are alive with myriads of sardines, and the time will come when, with the product of the olive orchards of California, this delicious little fish will be properly prepared and form a staple of the market.

The operations of the whaling companies in the Bay of Monterey and Carmelo for the year 1865, are: "Whales caught—California grays, 26; yield of oil, 780 barrels. Humpbacks, 12; yield of oil, 480 barrels. Total whales, 38; total barrels, 1,260. The barrel is of the capacity of 32 gallons. The early season of 1866 has been a good deal better, several right whales having been captured."

The quantity of fish cured and salted for exportation by the Chinese in Monterey County during the same year, is calculated to be 275 tons.

FURS.—Prior to the settlement of this portion of the Pacific Coast by the Americans, and the discovery of the gold mines, it was more celebrated for its extensive fur trade than for any other characteristic. The operations of the Hudson Bay Company form a prominent portion in the history of the North Pacific. Although the production of the precious metals has overshadowed this and every other branch of the trade of this region, yet the traffic in furs here forms a large item. The amount of furs annually imported into San Francisco from the north, including the Asiatic Coast, is estimated at not less than half a million of dollars. Furs are sent here from every section of the coast west of the Rocky Mountains, extending as far north as the Russian Possessions, and quantities are yearly imported from Siberia and Kamtschatka. Of the amount received here, about \$300,000 are exported annually to New York and Europe, while the remainder, about \$200,000, are disposed of or manufactured in various ways here. The following parties are engaged in the business in San Francisco: A. Muller, A. Wasserman, and H. Liebes & Co.

BANKS AND INSURANCE COMPANIES.

There is probably no city of the same population in any other portion of the world where institutions of this character are in a more healthy and flourishing condition than is the case in San Francisco. The liberal encouragement offered by the laws of this State for investments of this character has been the means of concentrating here, a large amount of capital in these departments, a considerable portion of which comes from abroad. The profits of banking have been large, and the securities ample; a vast amount of foreign floating capital, always on the lookout for the safest and most profitable investments, has been diverted to this point. The State law compelling the fulfillment of specific contracts payable in gold coin, has tended to swell the profits of money lenders in California to an enormous extent. The banking capital employed in San Francisco is estimated at \$30,000,000. The amount invested in the insurance business in San Francisco is proportionately large, and as no losses from fire or marine risks, to any considerable extent, have yet accrued in this department, the profits have also been highly remunerative. Almost every species of risk is amply provided for, and the amount of business done, by both home and foreign institutions, is immense, its activity during the past year having been greatly increased. The capital invested in the various institutions of this character in San Francisco amounts to \$5,600,000.

* The figures in the above table referring to the population of this State for 1866, are taken from the report of the State Superintendent of Public Schools, Mr. John Swett, and are estimated upon the basis that the school children under fifteen years of age constitute thirty per cent. of the population. In the absence of official data, this is probably as fair a mode as can be adopted to arrive at an approximation of the population of our State. We think, however, that the estimate for San Francisco is at least 18,000 too low.—COMPILE.

LIBRARIES—PUBLIC AND SOCIETY.

One of the most gratifying evidences of the growing literary tastes of the people of this State is exhibited by the increase of libraries and literary associations, and the interest manifested generally in extending their sphere of usefulness.

The number of libraries in the State, with over 200 volumes each, is 50—containing an aggregate of nearly 150,000 volumes. This enumeration does not include School and Sunday School libraries, of which there are a number scattered throughout the State.

The public libraries of San Francisco are numerous and well supplied, that of the Mercantile Library Association numbering 24,000 volumes, Mechanics' Institute 8,000 volumes, and the Odd Fellows' Library nearly 16,000 volumes, including many valuable works relating to the early history of this coast. The records of these, and other institutions of a similar character, prove that Californians are essentially a reading people. Several of the hotels are supplied with ample libraries and reading-rooms, furnished with all the leading papers, for the accommodation of their guests. One of these contains 5,000 volumes of standard works.

NEWSPAPER AND PERIODICAL PRESS.

There are one hundred and thirty-two different newspapers and periodicals published in the State of California: of which, twenty-six are issued daily; two, tri-weekly; five, semi-weekly; eighty-eight, weekly; one, tri-monthly; one, semi-monthly; eight, monthly, and one bi-monthly. In addition to the regular issues of these publications, five of the dailies issue steamer editions, and twelve issue weekly editions—making a total of one hundred and forty-nine publications, viz: daily, twenty-six; tri-weekly, two; semi-weekly, five; weekly, one hundred; tri-monthly, one; semi-monthly, one; steamer, five; monthly, eight; and bi-monthly, one. Seven are published in foreign languages, two in French, two in German, one each in Spanish, Italian, and Chinese. There are fifty different publications issued in San Francisco; five in Sacramento; two in Stockton; and two in Marysville.

PUBLIC SCHOOLS.

When the youth of our State is taken into consideration, the number and extent of the Public Schools of California is a source of pride to her citizens. In no other State has a more liberal support been given by the government to this class of institutions, and in no other portion of the American Union has more willing or healthy aid been extended to the cause of education among the great mass of the people. The Public Schools of every portion of the State are in the most flourishing condition; and in San Francisco, some of the edifices erected by this department will not suffer in comparison with many of the buildings of the first class colleges of the Eastern States.

STATISTICS OF 1866.—Total number of children in the State between five and fifteen, 84,179; under fifteen, 52,724; total, 136,903. Number of children attending Public Schools, 39,906; attending private schools, 15,671; total, 55,577. Total expenditures for school purposes, \$350,229. The school property of the State is valued at \$1,206,598.

COLLEGES.

The Collegiate and other institutions of learning in California are a credit to the intelligence and liberality of the State. They are well supported and in a flourishing condition. There are five first class institutions of this character empowered to confer the customary degrees. Taken in the order of seniority, there are the three Colleges under the direction of the Catholic denomination. Santa Clara College, located about three miles distant from San José, on the line of the railroad between that place and San Francisco; St. Ignatius College, the extensive buildings of which are situated on Market street, San Francisco; and St. Mary's College, about four miles from the city. The Toland Medical College, the elegant building of which is located at the foot of Stockton street, near the Bay, is the only institution of its class in the State. The College of California, in Oakland, directly across the Bay from San Francisco, is in a highly flourishing condition. The buildings provided for the accommodation of students in each of these are ample, and fitted with all the appliances necessary for acquiring a thorough education in every department of science. The General Government having made the liberal donation of 150,000 acres of the public lands lying within her borders to the State of California for this purpose, at the last session of the Legislature an Act was passed creating the Agricultural, Mining, and Mechanic Arts College. A Board of Trustees, elected at the same session, during the past season visited the most eligible localities in the State, to select the most favorable site for this institution, but have not yet made a decision in the premises.

RAILROADS.

Among the most striking indications of the rapid progress of the State of California, and the healthy and prosperous condition of her affairs, is the system of railroads she has so liberally aided and encouraged. Every assistance has been extended to enterprises of this character, by the State Government; and this wise policy has had a marked effect upon the public prosperity. While the iron links of the great national chain, that is to bind more firmly together the Atlantic and Pacific portions of the Union, are steadily progressing—the lesser but highly important enterprises of this character here, have not been neglected. The number of miles completed and in running order, three hundred and thirty. This is exclusive of nearly thirty miles of street railroads in San Francisco. The following is a list of these improvements, destined to confer a lasting benefit upon our State and this portion of the Pacific Coast. The first in point of magnitude and importance is the—

CENTRAL PACIFIC RAILROAD.—This great work, which is to connect with that of a similar character, steadily progressing in this direction from the Atlantic side, was commenced in 1863. Ninety-three and a half miles of the road have been completed, and the cars are running regularly to Cisco—a point but a few miles from the summit of the Sierra Nevada Range. Extensive preparations are making to prosecute the work with vigor during the coming season; and in the course of another year this great barrier will be overcome. In a few years more, what was not long since conceded to be the work of a lifetime, will be entirely completed.

SACRAMENTO VALLEY RAILROAD.—Although this line extends but a distance of twenty-two and a half miles, from Sacramento to Folsom, it is deserving of prominence on account of being the first work of the kind commenced in California.

SAN FRANCISCO AND SAN JOSE RAILROAD.—This road, connecting San Francisco with Santa Clara Valley and the extensive agricultural regions south of that flourishing locality, exercises an important influence upon the public prosperity. This road was incorporated in 1860, with a capital stock of \$2,000,000. In three years from that time, the entire length—fifty miles—was completed, and the cars running, with a steadily increasing business.

WESTERN PACIFIC RAILROAD.—This work, which is to form a connecting link between the San Francisco and San José Railroad and the Central Pacific, in the laying down a track from San José to Stockton, and from thence to Sacramento, was incorporated in 1862, with a capital of \$5,400,000. It is

A new and import
street, San Francisco
modations have been
the purposes and obje

designed as the Western Division of the Pacific Railroad. Considerable work has been done on the line between San José and Stockton, and the surveys between the latter point and Sacramento have been completed, preparatory to the resumption of operations.

In addition to the above, the following are in successful operation, viz: The Placerville and Sacramento Valley, extends from Folsom to Shingle Springs, a distance of twenty-six miles; the California Central, from Folsom to Lincoln, twenty-one miles; the Yuba, from Lincoln to Marysville (sixteen miles completed); the Northern Californian, from Marysville to Oroville, twenty-six miles; the Copperopolis, from Stockton to Copperopolis, thirty-five miles; the San Francisco and Alameda, from the Encinal to Haywood, fourteen miles; the Napa Valley, from Suscol to Napa, four miles; the Oakland, from Oakland Point to Clinton, four miles; the Petaluma, from Rudall's Landing to Petaluma, three miles.

THE SOUTHERN PACIFIC RAILROAD.—That sooner or later a railroad will be completed over the route indicated by nature through the southern portion of California, through some of the favorable passes devoid of snows in that region, to some point on the Atlantic side, is a foregone conclusion. A company was organized in this city more than a year since for the purpose of constructing a railroad from San José to a point on the Colorado River, to connect with the Southern Railroad from Missouri, through New Mexico and Arizona. From the efforts made by parties on the other side of the continent, aided by the Government, to co-operate with this movement, its commencement will not be long delayed.

OTHER RAILROAD ENTERPRISES.—From recent indications, the long talked of railroad connecting Northern California with Portland, Oregon, will soon prove a reality. The General Government having donated six thousand four hundred acres of the public lands for each mile of the road, and the Legislature of Oregon having passed an act giving interest on the company's bonds, amounting to \$1,000,000, at the rate of seven per cent. per annum, is a sufficient encouragement to enter upon the work at once. There is also a strong prospect of the work being resumed on the railroad between Vallejo and Marysville. A similar enterprise being also in contemplation between Benicia and Sacramento.

TELEGRAPHS.

The State Telegraph ramifies throughout every portion of the limits of California, and connects with the most important points in the adjoining States and Territories, and forms a portion of the overland communication between the Atlantic and Pacific sections. The Russo-American Telegraph, now in the progress of construction, will form another important link in the great telegraphic chain that will soon encircle the world. An association was organized in New York in April, 1866, under the title of the National Telegraph Company, for the purpose of constructing an additional line of telegraph across the continent, which, considering the high tariff of charges existing at present, would prove of great public benefit. A bill has been passed by Congress to aid in the construction of telegraph lines, and to secure to the Government the use of the same for postal, military, and other purposes. It grants to this company the right to construct and maintain telegraph lines throughout the States and Territories, with the privilege of using timber and materials required found on the public domain. A published notice of this company signifies the intention of immediately entering upon the work. There are 5,500 miles of telegraph in operation in the States of California, Oregon, Nevada, the territories of Washington and Idaho, and the colony of British Columbia.

SHIP BUILDING.

The facilities afforded at the Port of San Francisco for conducting this important branch of business being ample, there is a large amount of ship building done at various points around the Bay, from the Potrero to Black Point. During the year 1866, owing to the demands made for vessels in fitting out the fleet engaged in the Cod Fishery in the Ochotsk Sea and other northern waters, an unusual degree of activity prevailed in this department. The following list of the various kinds of craft built here during that time will give some idea of the extent and character of the business: Passenger Steamers, from 300 to 1600 tons, three; Stern-wheel Steamboats, five; Steam Propellers and Tugs, three; Schooners, fifteen; Sloops, three; Barges, four.

The extensive Government Dry-Docks, belonging to the Navy Yard at Mare Island, have hitherto been used in repairing vessels of the largest size, many first-class ships of foreign nations having been allowed their use for this purpose. There is in the course of erection at Hunter's Point a Dry Dock, with a capacity sufficient to accommodate vessels of 4,000 tons, which will be completed in the course of the present year; and arrangements are being made for constructing a floating dock of similar extent at a point on the Bay bounded by Beale, First, Bryant and Brannan streets.

MINERAL SPRINGS.

There are a large number of Mineral Springs of varied character and of diversified medical efficacy to be found interspersed throughout different portions of the State, both in the valleys and mountains. The water from the Napa Soda Springs is of so superior a character as to have almost entirely monopolized the market. Soda Springs also exist at New Almaden, on Russian River, and various other localities. The different varieties of the sulphur and chalybeate springs also abound; and hot springs, some of which impregnated with sulphur are specifics in chronic rheumatism and other diseases of a kindred character. The Geysers, situated at the head of Napa Valley, sixty miles from Napa City, are among the greatest natural curiosities of the State, and are quite a resort for invalids. Callistoga Springs, located in Napa Valley, upon which a large sum has been expended, is one of the most fashionable summer resorts in the State. The white Sulphur Springs, in Napa Valley, are also one of the most popular watering places of this region. The Warm Springs, situated in a beautiful locality between the Mission and Town of San José, owing to their medicinal virtues and eligible location, are much frequented by invalids and pleasure seekers. The Hot Springs of San Luis Obispo are said to possess remarkable virtues, but owing to their distance are difficult of access.

UNION BUSINESS COLLEGE.

A new and important institution with the above name has been recently established at 408 California street, San Francisco, under the charge of Mr. James Vinsonhaler. Extensive and commodious accommodations have been provided, and every effort will be made by its conductors to insure its success. For the purposes and objects of the College, see page cxxxvii.

AREA AND RESOURCES.

Oregon, the most westerly portion of the domain of the United States of North America, is situated between 42° and 46° 20' north latitude, and between 116° 31' and 124° 30' west longitude; being about 395 miles in length, and 295 miles in width. The area is estimated at 101,400 square miles, containing 120,000,000 acres of land, of which it is calculated that about 10,000,000 are susceptible of cultivation. The State is usually divided into three portions, severally styled the Lower, Middle, and Upper Countries. The first is that portion next the ocean; the second lies between the Cascade Range and the Blue Mountains; the third being situated between the latter and the Rocky Mountains. The first is from 75 to 120 miles in breadth, and includes the Willamette, Umpqua, and Rogue River Valleys, the former running parallel with, and the latter two at right angles to the sea. The valleys vary from 40 to 150 miles in length, and are from 5 to 85 miles wide. The middle portion, which consists mainly of an elevated plateau, is about 160 miles broad, while the upper country is a desolate and sterile region, occupying the western slope of the Rocky Mountains. The area of the State is diversified with valleys of the richest agricultural and grazing lands alternating with abrupt mountain ranges, many of the peaks of which rise to the height of 14,000 feet above the level of the sea, and are covered with perpetual snow. The resources of this region are extensive, rich, and varied—embracing agricultural and mineral wealth, combined with vast forests of the finest timber, fitted for every purpose, and inexhaustible water power for manufacturing purposes. There is probably no portion of the Union that combines with the same space, to a similar extent, all the varied elements of wealth, and a steadily increasing prosperity. Placer gold diggings have been extensively worked for a number of years past, both in Southern Oregon and the N. then portions of the State; and extensive and permanent lodes of gold and silver bearing quartz exist in the same regions, which need only the requisite capital for advantageous working, to produce rich returns. The extensive coal mines discovered at Coose Bay and other points have been profitably worked for several years past; and large deposits of copper, lead and iron—the latter of the purest quality—and inexhaustible in quantity, are distributed throughout the State. Salt Springs, of large capacity and strength, are also abundant. The liberal donations of land to actual settlers made by the General Government, gave the first impetus to immigration to the Territory of Oregon. The vast and fertile valleys of this region offering the most favorable field for agriculture and the raising of stock, the operations of the early settlers were mainly confined to those branches; and the unparalleled rush attendant upon the discovery of gold in California, at once opened a ready and remunerative market for these products. The climate and soil of the agricultural portions of the State are highly favorable to the growth of every variety of produce common to the Western and Northern States—all the grains, fruits, and vegetables flourishing here

in the highest perfection. Wheat, oats, barley, potatoes, and apples are the staple products (the export of the latter amounting to 100,000 boxes each year); and experiments in the culture of tobacco, flax, hemp, hops, and other products have proved highly satisfactory. The wide range of pasture, and the nature of the climate being highly favorable to sheep-raising, wool-growing has become a leading business. The salmon and other fisheries are extensive. And the superior quality of the timber, inexhaustible in quantity, combined with other facilities, offer inducements for ship-building superior to those of any portion of the Atlantic or Pacific Coast.

TABLE OF THE CROP OF 1864,

Showing the Number of Acres under Cultivation in 1865, and the Product of 1864 of Wheat, Barley, Oats, Corn, Rye, Tobacco, Hay, Potatoes, Apples and Wool.

GRAIN.—The aggregate amount of wheat, barley, and oats, produced in 1864, is nearly 3,000,000 bushels. The crop of 1865 is largely in excess of this, and will probably reach 4,000,000 bushels.

TOBACCO.—An excellent quality of tobacco is raised in several counties of the State. The crop of 1864 exceeded 70,000 pounds, a large part of which, it is said, was fully equal to the best James River leaf.

FLAX AND HEMP.—These plants grow rapidly in this State, and are more productive here than elsewhere. The climate is exceedingly favorable for their cultivation, and the recent movement to establish, at Salem, extensive works for the manufacture of oil, will serve to increase the interest already manifested to add these important articles to the products of the State.

FRUITS.—"Taken as a whole, this State is one of the best fruit-growing States in the Union. In no

part of the world do fruit trees grow so rapidly, bear so early, so regularly, and so abundantly, and produce fruit of such large size. Nor is there any other country where so great a variety of fruit can be produced in high excellence. Fruit trees in Oregon are generally as large at two years old as they are in New York or Ohio at four years." This is owing to the climate. The product of 1864 amounted to 318,718 bushels, a great part of which was shipped to San Francisco and Victoria.

HOPS.—The cultivation of hops engages the attention of a numerous class. The soil and climate are admirably adapted for their growth.

LIVE STOCK.—The returns of 1864, for the State, give the following: Cattle, 125,536; horses, 49,519; hogs, 104,170; mules, 2,182; sheep, 313,199. The clip of wool, for 1864, was 779,546 pounds. The yield of butter, 1864, 1,044,210 pounds; of cheese, 51,950 pounds.

MINERAL.

The mineral resources of the State are varied and extensive. The gold placers of Eastern Oregon have yielded large amounts. The mines of Jackson County in southern Oregon have been worked since 1850, and have produced a considerable amount, estimated at \$1,000,000 annually. Extensive deposits of silver exist in various portions of the State, and those of the Owyhee region are believed to be exceedingly rich.

There are numerous quartz veins of silver in southern Oregon, and the yield of gold for the year 1864, for the State, is reported by the Secretary of State to have amounted to 106,226 ounces, value, \$1,900,000. This sum is exclusive of large amounts taken by parties leaving the State. Rich lodes of copper exist in the counties of Josephine, Coos, Baker, and Douglas, and immense beds and veins of iron are found in Washington, Multnomah, Jackson, Josephine, and Curry counties. The mine in Washington County is located in the vicinity of the Willamette River, and is regarded as one of great value. Lead is found in Jackson, Josephine, and Curry, but no attempt has as yet been made to reduce the ore. Coal exists in various portions of the State. The vein at Coose Bay is very productive, and is capable of yielding a large amount annually.

MANUFACTURES.

The attention of the early inhabitants of this portion of the Pacific, having been for years after the first settlement of the State almost entirely devoted to agricultural pursuits and the raising of stock, for which the greater portion of its area is admirably adapted, but little was done for a series of years towards the diversion of its immense water power and other resources to manufacturing purposes. No other portion of the world possesses superior advantages for the manufacture of the great staples which mainly make up the commerce of the world. This department is yet in its infancy here, and we are only able to give the following brief synopsis of its operations.

GRIST MILLS—FLOUR.

The number of Grist Mills in the State is sixty-three, of which fifty-five are propelled by water, with an aggregate run of stone of one hundred. Several of these mills are of the most extensive character, with a capacity of from two to three hundred barrels per day.

WOOLEN MILLS.—There are four woollen mills in the State of Oregon. That belonging to the Willamette Manufacturing Company, located at Salem, incorporated by the Legislature in 1856, and which has been in active operation since that time, is the oldest establishment of the kind on the Pacific Coast.

The capital thousand two plain and five Oregon wool thirty-three machinery is The Oregon 1865. The of brick and half stories high and thirty-eight hundred and the manufacturer remaining two Company at D operations of the 1,000,000 pounds.

PAPER.—The Oregon City, other manufacturer has the printing paper.

FOUNDRIES.—employed, the development of the may be enumerated: Iron Works, and Cherry at Albany.

TANNERIES.—the article containing leather is carried on a small scale, there are but only to a limited extent and Oregon will

MANUFACTURE. Pioneer Oil Company. This company producing three million already progressed the business, with experiment of culture to be well adapted.

TURPENTINE AND extent in Oregon, a fine field for the business for some time past for which they find to be of a superior

Congress has granted purposes, and the act up to Sept. 1, 1866

THE OREGON CEMENT of Oregon, for the total capital, \$2,000,000, factory; J. R. Moore, Supreme Court; J. C. Ifford, Oregon; J. C. Ifford, contractor; J. C. Ifford, contractor. This Company has acres of fine agricultural land, interest on very valuable one, and commenced—not later

The capital stock of the concern is \$200,000, and the capacity of the works is sufficient to turn out one thousand two hundred yards per day. The styles of goods manufactured consist of blankets, cloth, plain and fancy cassimeres, tweeds, flannels and yarn, all of a superior quality, and exclusively of Oregon wool. There are in use five sets of cards, one thousand eight hundred and sixty spindles, and thirty-three looms, with all the accompanying machinery. One hundred hands are employed, and the machinery is propelled by a double turbine water wheel of over one hundred horse power.

The Oregon City Manufacturing Company, incorporated in 1864, has been in operation since August, 1865. The company has a cash capital of \$100,000, paid up in gold coin. The main building, which is of brick and stone, is one hundred and ninety-five feet long by fifty-four feet in width, and is three and a half stories high. The works consist of six sets of cards, one thousand nine hundred and twenty spindles, and thirty-eight looms, with all the other requisite machinery, which is propelled by water, equal to one hundred and fifty horse power. One hundred and sixty operatives are employed, and the capacity of the manufactory is two thousand yards per day, of cloths, cassimeres, blankets, tweeds, flannels, etc. The remaining two establishments—the Eagle Woolen Mills at Brownsville, and the Ellendale Manufacturing Company at Dallas, are in successful operation, the former turning out 500 yards of cloth per day, and the operations of the latter being confined to the manufacture of flannel. These establishments work up 1,000,000 pounds of wool each year.

PAPER.—The only manufactory in this department is that of the Oregon City Paper Mills, located at Oregon City, which has been but a short time in operation. The facilities for this, as is the case with other manufactories in Oregon, are abundant. Owing to the want of the requisite machinery, the manufactory has thus far been confined to straw paper. It is calculated that during the present year sufficient printing paper will be manufactured to supply the wants of the newspapers of the State.

FOUNDRIES.—There are a number of foundries and machine shops in Oregon, which are kept steadily employed, the demand for this character of work constantly increasing with the rapid growth and development of the extensive resources of the State. Among the principal establishments in this department may be enumerated the foundry and machine shop of Drake & Moore, at Salem, Oregon; the Oregon Iron Works, and the Willamette Iron Works, at Portland; and the foundry and machine shop of A. F. Cherry at Albany.

TANNERIES.—When the abundant facilities for the business in this State, and the high prices which the article commands abroad are taken into consideration, it is a matter of surprise that the manufacture of leather is carried on in Oregon to so limited an extent. While the supplies of hides of the very best quality are abundant, and the article cheap, with inexhaustible quantities of good oak, fir and hemlock bark, there are but fifteen tanneries in the whole State, the operations of most of which are carried on only to a limited extent. The example set by California will doubtless soon be followed by this State, and Oregon will send a superior article of leather to the Atlantic markets.

MANUFACTURE OF LINED OIL.—Some months since articles of incorporation were filed by the Pioneer Oil Company of Oregon, with the Secretary of State, the capital stock being fixed at \$300,000. This company propose to enter largely into the manufacture of lined oil, for which purpose they intend erecting three mills, located at Salem, Oregon City, and Portland, the work upon the first of which has already progressed to a considerable extent. An agent of the company of considerable experience in the business, went to the Atlantic States some months since to purchase the requisite machinery. The experiment of cultivating flax, which has been thoroughly tested, proves the soil and climate of Oregon to be well adapted to its production, the yield being from twenty to thirty bushels of seed per acre.

TURPENTINE AND ROSIN.—The manufacture of turpentine and rosin is carried on to a considerable extent in Oregon, the immense forests of fat pine and balsam producing trees affording the most extensive field for the business. Messrs. I. A. Wood & Co., of Portland, the pioneers in this department, have for some time past been engaged in the manufacture of turpentine, varnish, rosin, pitch and axle grease, for which they find a ready market. The articles shipped by them to the Eastern States, are pronounced to be of a superior quality.

PUBLIC SCHOOLS.

Congress has granted to the State one-eighteenth of the surveyed lands in the State for educational purposes, and the fund arising from the sale thereof is placed in the State Treasury. The amount received up to Sept. 1, 1866, is: School Fund, \$19,374; University Fund, \$9,206.

RAILROAD.

THE OREGON CENTRAL.—This Company was incorporated October 6th, 1866, under the General Laws of Oregon, for the purpose of constructing the Oregon end of the California & Oregon Railroad. Nominal capital, \$2,000,000. Incorporators: J. S. Smith, agent and manager of the Willamette Woolen Manufactory; J. R. Moores, merchant and capitalist; Jesse Applegate, farmer; E. D. Shattuck, Judge of the Supreme Court; J. H. Mitchell, attorney; Hon. H. W. Corbett, wholesale grocer and proprietor of the California & Oregon Stage Line, and recently elected United States Senator; Joel Palmer, farmer, miller, and contractor; J. Gaston, attorney; Mr. Gaston has been appointed the General Agent of the Company. This Company has received the Congressional land grant, consisting of about three and a half million acres of fine agricultural, grazing, and timber lands. The State has also assumed the payment of seven per cent. interest on \$1,000,000 of the Company's bonds, running for twenty years. The franchise is a very valuable one, and as soon as the county and individual subscriptions are received, the work will be commenced—not later than May, 1867.

AREA AND RESOURCES.

The State of Nevada extends from the thirty-seventh to the forty-second degree of north latitude, and from the thirty-eighth to the forty-third degree of longitude, west from Washington. It comprises within its present limits an area of about 81,539 square miles, or 52,184,960 acres, 832,000 of which are covered by the water of the various lakes in this State, leaving a total land area of 51,352,960 acres. By an Act of Congress, approved May 5th, 1866, there was added to this State on the east all the territory lying between the thirty-seventh and thirty-eighth degrees of longitude west from W. Shington, and extending from the thirty-seventh to the forty-third degrees of north latitude, embracing 18,000 square miles, or 11,520,000 acres. The same act contained a further enlargement of the boundaries of the State, contingent upon the action of the Legislature. Notwithstanding the mountainous and broken character of this area, there is a considerable portion of it agricultural land of good quality, which, under proper cultivation—irrigation being required in certain localities, for which purpose abundant supplies of water are available—produces fine crops of grain and vegetables. This is particularly the case in the extensive valleys watered by the Carson and East and West Walker rivers, in the counties of Douglas, Churchill, and Esmeralda, where heavy crops of grain and hay are produced each year. Extensive bodies of land lying in the Humboldt and Reese River region, it is estimated, can be made largely productive by resorting to irrigation. In the mountain portions immense quantities of the finest quality of timber exist, which supply a large number of saw mills, put in operation during the mining excitement which prevailed in this region, attracting an energetic and enterprising population from all quarters.

It is owing solely to her rich mineral resources that this young State has already attained a prominent position among the members of the Federal Union, and it is her inexhaustible silver lodes that constitute her principal wealth. Although the first discovery of silver in Nevada was made by the brothers Grosch, in 1852, owing to the untimely death of these parties, nothing definite was arrived at until the discovery of a rich deposit of sulphuret of silver, in June, 1859, by some parties engaged in placer mining near the present site of Virginia City. Immediately following this discovery, the rich lode which has become famous throughout the world as the Comstock, was claimed for miles, and an excitement fully equal to that caused by the first discovery of gold in California was the result. A large population streamed in, mines were opened, mills built, and an unprecedented activity prevailed in every branch of business. While this excitement has, to a great extent, gradually quieted down, the mills of Nevada still continue to send forth a large amount of bullion, and the quantity of silver bricks, instead of diminishing, is steadily on the increase. Vast as have been the results from the silver mines of Nevada, they are but the type of what is destined to follow. The proposed Sutro Tunnel to drain the Comstock ledge—an enterprise to which the General Government seems disposed to lend its fostering aid, will largely enhance the silver product of this State, and add greatly to the material wealth of the country. While it is estimated that the entire cost of this work will not exceed \$2,000,000, it is confidently anticipated that the net annual profits will amount to \$2,500,000. The entire* yield from the Comstock Lode, during the year 1866, is set down at \$14,907,894, being about \$2,000,000 over the product of the previous year. It is estimated that over \$5,000,000 are annually lost through the present wasteful mode of working the ores of the mines. Improvements are constantly making to remedy this evil. Notwithstanding the magnitude of the operations in this department, mining in the State of Nevada is still in its infancy, and it is reserved for the future to prove the vastness of its extent.

MINERAL—QUARTZ MILLS.

The number of quartz mills in operation in this State, January, 1867, is one hundred and fifty-six, of which one hundred and eighteen are propelled by steam; twenty-three by water, and fifteen by steam and water. The aggregate number of stamps is two thousand five hundred and seventy-seven. The cost of machinery and the works connected with the different mills is estimated at nine million four hundred and two thousand dollars. In addition to the stamps above enumerated, there are about twenty arrastras in operation, principally connected with the mills of Lyon County. There are several large metallurgical establishments and numerous private assaying offices in the State, which annually transact a heavy amount of business.

* "Since the discovery of silver in this State, there have been extracted and added to the wealth of the world, \$45,000,000 of bullion, and the main source of all this wealth, from the most reliable authorities, has but just been uncovered."—*Gold Hill News*.

CANALS AND WATER DITCHES.

In addition to those enumerated in the following table, there are numerous irrigating ditches and several important works now being constructed. The Humboldt Canal will, when completed, furnish power for a large number of mills, and sufficient water to irrigate the agricultural districts in its immediate vicinity, and the Summit Lake and Virginia Aqueduct Co., with a capital of \$2,000,000, propose conveying the waters of Summit Lake a distance of thirty miles, supplying the cities of Carson, Silver City, Gold Hill, and Virginia City with an abundance of water for mining, agricultural, and municipal purposes.

AGRICULTURAL.

LAND.—The amount of land in the counties of Churchill, Humboldt, Lander and Nye, adapted to agricultural and grazing purposes, is 227,000 acres. Under cultivation in Humboldt, Lander, Lyon, Nye and Washoe, nearly 22,000 acres. "Many millions of acres of land in this State now comparatively worthless, would be valuable if irrigated, and several hundred thousand acres of swamp and overflowed land might be reclaimed by a proper system of drainage."

PRODUCTS.—The different cereals are produced

in abundance in several counties. In Douglas, Humboldt and Nye counties good crops have been raised, the wheat averaging thirty bushels and barley forty bushels per acre. The amount of hay cut in 1865 is estimated at 100,000 tons. A sufficient amount of vegetables is raised for home consumption, and the potato crop has been more than the average yield in other States, and of an excellent quality.

LIVE STOCK, 1865.—Horses, 3,900; Mules, 650; Cattle, 10,650; Sheep, 5,600; Swine, 750.

GRIST MILLS—FLOUR.

There is but one Grist Mill in the State. It is located near Genoa, and owned by W. M. Carey. The power used is water, run of stone four, and the value estimated at \$8,000. John W. Varney, of Austin, has made arrangements for the erection of an extensive mill at that place.

SAW MILLS—LUMBER.

The demand for lumber for mining and building purposes renders its manufacture a profitable employment. The number of saw mills in operation is twenty-one, of which fourteen are propelled by steam, five by water, and two by steam and water. The value of these mills is estimated at \$150,000, and the aggregate capacity, per day, is about 180,000 feet.

FINANCES—STATE DEBT.

STATE DEBT.—The State debt, exclusive of Territorial liabilities assumed, approximates \$278,000 in coin. Of this amount there will be due, February 1st, 1867, \$218,000, and of floating debt, \$60,000. The balance in the treasury, January 1st, 1866, was \$51,000. The total receipts during the last fiscal year from all sources, were \$425,000. The total disbursements were \$320,000. The balance on hand, in all the different funds, is about \$156,000, mostly in currency. (Governor's Message, 1866-7.)

PUBLIC SCHOOLS.

The Legislature of the State has made the most liberal provision for the support of the public schools. A most thorough system of education has been inaugurated, and wherever a sufficient number of pupils is found, free schools are in successful operation. The average attendance of the pupils is commendably large, and the cause of education generally is in a highly prosperous condition.

* Estimated.

LIBRARIES.

The State Library at Carson City contains 4,721 volumes, of which 2,209 are of law, and 2,512 of a miscellaneous character. The increase in 1866 was 1,432 volumes. The rapidity with which this library has accumulated, and the number and importance of the works contained therein, reflect great credit upon the State.

The above are the amounts shipped through Wells, Fargo & Co. for the years 1865 and 1866. There should be added to the figures of the year 1866, as a part of the product of the year, the following as the yield of the districts not included in the table, viz: From Carson City, \$341,366; Reese River, \$400,587; Aurora, \$171,534; and by other parties outside of Wells, Fargo & Co., \$350,000, together making an aggregate of \$16,171,381 as the yield of the entire State.

COLLEGES AND SCHOOLS.

The General Government has donated to the Territory 46,080 acres of unoccupied land for the endowment of a Territorial University, which, it is estimated, will create a fund of not less than \$75,000. The Legislature of 1862 passed an act incorporating a Territorial University, and providing for the election of a Board of Regents for its government. The university is located at Seattle, and is in a highly prosperous condition, under the superintendency of G. F. Whitworth. Much attention has been paid to the establishment of district schools throughout the Territory. The General Government has set apart two sections in each township, or one-eighteenth of the public land, for common school purposes. The amount thus donated to this Territory is equivalent to some 3,000 square miles of land.

STATISTICS, PORT TOWNSEND, FOR THE YEAR ENDING JUNE 30, 1866.—Vessels cleared for foreign ports American, 207—tunnage, 28,783; registered, (of course not including licensed) 25—tunnage, 7,128; foreign, 69—tunnage, 24,185. Total, vessels, 301—tunnage, 60,096.

Vessels entered Foreign and Coastwise.—American, 231—tunnage, 28,469; coastwise, 20—tunnage, 9,278; foreign, 72—tunnage, 23,440. Total: vessels, 323—tunnage, 61,187.

Imports.—American vessels, value, \$37,378—duties, \$14,195; foreign vessels, value, \$11,807—duties, \$3,406. Total: value, \$49,185—duties, \$22,601.

Exports.—American vessels, value, \$247,008; foreign, \$179,250. Total, \$426,258.

NATURAL RESOURCES OF THE TERRITORY.—"It is only recently that the settlement of this part of our country has commenced to develop its resources, or to show the advantages which may be derived from its position, and it is these points which I desire to bring to your notice. That portion of Washington Territory lying between the Cascade Mountains and the ocean, although equaling in richness of soil and ease of transportation the best portion of Oregon, is heavily timbered, and time and labor are required for clearing its forest and opening the earth to the production of its fruits. The great body of the country, on the other hand, stretching eastward from that range to the Rocky Mountains, while it contains many fertile valleys and much good land suited to the farmer, is yet more especially a grazing country, one which, as population increases, promises in its cattle, its horses, and above all its wool, to open a new and vast field to American enterprise. But in the mean time, the staple of the land must continue to be the one which nature herself has planted, in the inexhaustible forests of fir, of spruce, and of cedar. Either in furnishing manufactured timber or spars of the first description for vessels, Washington Territory is unsurpassed by any portion of the Pacific Coast."—*Governor's Message*, 1854.

* Formerly Sawamish County.

AREA AND RESOURCES.

The Territory of Idaho is situated between 42° and 49° north latitude, and 110° and 117° west longitude. Its greatest length, from north to south, is about 480 miles, and its extreme breadth is about 340 miles, with an area estimated at about 96,000 square miles. Since the organization of this Territory in 1863, its limits have been somewhat reduced by the formation of the Territory of Montana. The character of the country is generally mountainous, although there are occasionally fertile, well watered, and finely timbered valleys found distributed throughout its extent. The largest of these—Boise Basin—contains the richest and most extensive placer mines yet discovered on this coast outside the limits of California. It contains, also, numerous rich and extensive quartz lodes, which give a permanent value to the mineral resources of this region. The climate here is mild, dry, and pleasant during the summer and fall seasons, but the greatest drawback is the severity of the weather and immense fall of snow, which retard mining operations during the winter months. Notwithstanding these disadvantages, the growth of this Territory, since the discovery of the richness of its mines, has been rapid, and its prosperity of a permanent character. Until 1852, this region was entirely in the possession of hostile savages, and never visited by any of the whites, except the hardy and adventurous trappers and mountain men. Although gold was first discovered in this year in a portion of this country, the discovery was not followed up till 1861, when the finding of other placer diggings gave rise to a large immigration from abroad the succeeding year, since which time, the filling up of the Territory has been rapid.

MINERAL.

"The discoveries of placer and quartz mines which have been made in Idaho within the last five years, have developed it enough to prove its richness in minerals. A large area of territory, hitherto unexplored, is believed to be rich in auriferous deposits and gold and silver-bearing quartz lodes, which will, at no distant period, support a large mining population.

"Boise Basin is the largest placer mining region yet discovered in Idaho Territory, and exceeds in extent and richness all other placer mining regions, outside of California, on the Pacific coast. There are many rich and valuable quartz lodes, and an abundance of timber and water, offering excellent facilities for the development of its mineral resources. The climate is mild, dry and serene during the summer and fall; it is cold in the winter, but generally equable and healthy all the year round.

"The natural resources of the Owyhee District for the development of her mines are equal if not superior, to any on the continent. Here timber in quantity and quality sufficient for all purposes is found

within the immediate vicinity of the mines, and the numerous creeks, gulches and springs afford an abundance of water for milling purposes."

It is estimated that the yield from the quartz lodes amounted, in 1866, to \$4,500,000, and from the placer mines \$1,265,000.

QUARTZ MILLS.

The number of mills in operation in September, 1866, was thirty-two, of which about three-fourths are propelled by steam. Aggregate number of stamps, 357; cost of erection estimated at nearly \$1,500,000.

AGRICULTURE.

There are numerous tracts of fine agricultural land, of limited extent, to be found in the vicinity of the valleys. The bottoms of Boise and Payette Valleys are productive to some extent. The Owyhee region contains some excellent land, with an abundance of water, "well calculated to yield, in profitable abundance, the different varieties of grain, vegetable, succulent roots and hay, and the hillsides are verdant with luxuriant and nutritious grasses, being unsurpassed as a stock range."

AREA AND RESOURCES.

The Territory of Montana is, with the exception of a small projection in the southwest portion, situated between 45° and 49° north latitude, and between 104° and 116° west longitude. Its length from east to west is about 750 miles; breadth, about 275 miles; and its area is estimated at about 200,000 square miles. This Territory was organized in the year 1864, previous to which it formed a part of the Territory of

Idaho. The surface of the country is generally mountainous, the great Rocky Mountain Range extending across the Territory, with minor chains extending in various directions throughout other portions. The Yellow Stone River and other valleys on the eastern border, once the favorite hunting grounds of the savage, and where the adventurous trapper secured his richest harvest of furs, are unsurpassed in fertility; and that portion lying between the Yellow Stone and Missouri, which abounds in extensive well-watered prairies, interspersed with clumps of timber, is pronounced by experienced explorers to be among the most beautiful to be found west of the Mississippi River. Placer gold diggings have been found on both sides of the Rocky Mountain Range—the Eastern and Pacific Slopes—and worked to a considerable extent. Extensive lodes of gold and silver-bearing quartz have also been discovered in the same localities, which promise rich returns. Since the organization of this Territory, it has rapidly filled with an enterprising and industrious population.

MINERAL.

This Territory is rich in mineral wealth. The placer mines in the vicinity of Helena and Virginia cities, have yielded large amounts of gold. Extensive and valuable quartz lodes exist in the counties of Beaver Head, Edgerton, Jefferson, and Madison, which afford employment to a numerous and active population.

QUARTZ MILLS.

The number of mills in operation in August, 1866, was fourteen, of which ten are propelled by steam. The number of stamps employed, one hundred and ninety-five. Aggregate cost of mills and machinery, five hundred thousand dollars. Several of the mills have a number of arastras in addition to the stamps herein enumerated.

AGRICULTURAL.

The agricultural and grazing facilities of this Territory are said to be unsurpassed. The soil is capable of growing the finest wheat, barley, etc., while the hill-sides are covered with the most nutritious grasses in the world. The valleys of Gallatin, Deer Lodge, and Jefferson have produced fine crops of the cereals; and wherever they have been planted, rich returns have rewarded the husbandman. "Along the valleys of both the Hell Gate and Bitter Root there is a great abundance of excellent timber—pine, hemlock, tamarack, or larch, predominating. The numerous mountain rivulets tributary to the Bitter Root which run through the valley afford excellent and abundant mill seats. The valley and mountain slopes are well timbered with an excellent growth of pine, which is equal in every respect to the well known and noted pine of Oregon."

GRIST MILLS, FLOUR.

There is one grist mill in the Territory, located at Bozeman City, and owned by Coover & McAdow.

DELEGATE IN CONGRESS.

NAME OF INCUMBENT.	Residence.	Term Expires.
William H. Hooper.....	Great Salt Lake City	March 3, 1867.

LEGISLATURE.

The Legislative Assembly is composed of a Council and House of Representatives, and convenes annually, at Great Salt Lake City, on the second Monday in December.

The Council is composed of thirteen members, who are elected for two years. The House of Representatives is composed of twenty-six members, elected annually.

COUNCIL DISTRICTS, THE COUNTIES COMPOSING THE SAME, AND REPRESENTATION OF EACH.

Great Salt Lake, Tooele, Summit, and Green River—Elect four Councilmen.

Davis and Morgan—Elect one Councilman.

Weber and Box Elder—Elect one Councilman.

Cache and Richland—Elect one Councilman.

Utah and Wasatch—Elect two Councilmen.

San Pete and Sevier—Elect one Councilman.

Millard and Juab—Elect one Councilman.

Beaver, Iron, and Piute—Elect one Councilman.

Washington and Kane—Elect one Councilman.

REPRESENTATIVE DISTRICTS, AND THE COUNTIES COMPOSING THE SAME.

Beaver and Piute—One member.

Box Elder—One.

Cache and Richland—Two.

Davis and Morgan—Two.

Great Salt Lake—Six.

Green River and Summit—One.

Iron—One.

Juab—One.

Kane and Washington—One.

Millard—One.

San Pete and Sevier—Two.

Tooele—One.

Utah—Three.

Wasatch—One.

Weber—Two.

*The General Election is held on the first Monday in August. The Territorial officers are all elected by the Legislature, for four years, except those marked thus: †, who are appointed by the President of the United States. For list of United States officers, see page 33. For list of Post Offices, see page 28. For organization and terms of the Federal Courts, see pages 30-32.

AREA AND RESOURCES.

The Territory of Utah is situated between 37° and 42° north latitude, and between 109° and 115° west longitude, being about 345 miles in length from north to south, and 320 miles in width, with an estimated area of 103,000 square miles, or 65,920,000 acres. It is divided in the center by the Wasatch Range of mountains, which rise to a height ranging from 4,000 to 7,000 feet above the level of the adjacent valleys, the highest peaks of which are covered with perpetual snow. The elevation of some of the valleys in the settled portion of the Territory is fixed at 6,000 feet above the level of the sea. That portion of Utah lying west of the Wasatch Mountains forms a part of the extensive and sterile region known as the Great Basin, the rivers and lakes of which have no communication with the sea. Although gold and silver quartz lodes have been discovered in this Territory, and copper, iron, and lead are known to exist within its limits, owing to the general discouragement of mining enterprises by the Mormon leaders, but little has been done in this department. Hitherto, agriculture and stock raising have constituted the principal business of the large population, composed of representatives from every civilized portion of the globe. There are about 200,000 acres of land under cultivation, producing grain, fruits, and vegetables of the best quality. The Territory produces about 500,000 sacks of flour each year, from which the population of Montana is mainly supplied. Quantities of dried fruit, produced here each year, also supply the same market. Cotton has been extensively raised in Southern Utah, the soil and climate being well adapted to its production, and the manufacture of this staple is carried on to a considerable extent.

AGRICULTURAL.

"Cache County (the granary of Utah) comprises fifteen cities and settlements; Washington County, (the cotton country of Utah) eleven; San Pete County, eleven; Kane County, (named in honor of the brother of the famous Arctic explorer) eight; Iron County, eight; Millard County, (with Fillmore, the former capital of Utah, principal) six; Great Salt Lake County, five; eleven more counties, including thirty-two settlements and cities. Total, ninety-six settlements and cities. Utah consists of about 100,000 souls. About 7,000 of them are farmers, who have under cultivation about 140,000 acres of land. The Territory produces about 480,000 sacks of flour yearly. A large quantity of dried fruit is also raised, part of which

goes to Montana. Great Salt Lake City is a city of orchards, and from the "bench" on the mountains the houses seem, in the summer, to be peeping out of a forest. The most plentiful fruits are apricots, apples, and strawberries. Stock raising is also an important branch of the farming interests. Southern Utah will be a land of vineyards and cotton. Cotton has already been raised in considerable quantities. In manufactures, of cotton particularly, a good beginning has been made. A large quantity of cotton yarn is already spun from cotton grown in the Territory. There are two large cotton factories, one of them belonging to Brigham Young, and there are several smaller ones. The whole Mormon community has long been, and is still, clothed in cloth and linsey of homespun, and almost every house is a manufactory."—*Correspondence Alta California, Nov. 21, 1866.*

AREA AND RESOURCES.

Vancouver's Island is situated near the northwest coast of North America, between N. lat. 48° 20' and 50° 55', and W. lon. 123° 10' and 128° 20', having an extreme length of 275 miles, and a breadth varying from 40 to 50 miles. The distance by water from San Francisco to Victoria, its principal seaport, is 800 miles. The island is separated from the main land by a channel, called in various parts by the names of Queen Charlotte's Sound, Johnstone Straits, and Gulf of Georgia. On the south it is divided from Washington Territory by the Juan de Fuca Strait. Its area has been roughly estimated at 12,000,000 acres, the greater proportion of which is mountain and barren rock.

The whole country is more or less densely wooded, excepting where the summit of the mountains (which rise to the height of nearly 16,000 feet) affords no hold for plants. The soil is fertile, and capable of successful cultivation. Coal, good in quality, has been found at many points, and has been worked to a considerable extent at Nanaimo, on the east coast. The climate is beautiful, more especially from early summer to late autumn, or what is commonly called the Indian summer, somewhat resembling that of the southwest of England.

British Columbia is situated on the northwest coast of North America. It comprises the territory lying between the Rocky Mountains and the Pacific Ocean, and extends from the frontier line of the United States on the south to the Simpson and Finlay Rivers, which form its northern boundary. The average breadth of the territory is about 250 miles, the length of its coast line about 450 miles, and its area (including Queen Charlotte Island) is roughly calculated at 200,000 square miles.

The mineral region of British Columbia is extensive, stretching to the western slope of the Rocky Mountains. Gold was first discovered in 1858, on Fraser River, above New Westminster, and gradually followed to Cariboo and Kootenay. Gold quartz veins are known to exist, but mining operations have been confined to placer and hill diggings.

SHIPMENTS OF GOLD.

Bank of British Columbia, July 1, 1865, to June 30, 1866	\$1,397,129
Bank of British North America, same period	657,976

Total

In addition to the above, there should be added, as the product of the mines of this section, the amounts shipped by Wells, Fargo & Co. and in the possession of parties leaving the colony, and the product of the Kootenay region, shipped by way of Portland, which together would probably extend the amount to nearly \$3,500,000.

FOUNDRY,
MACHINE, BOILER, FORGING AND SMITHING,
PATTERN AND WOOD WORK DEPARTMENTS,

DRAWING AND LIBRARY ROOMS, &C.

GODDARD & CO., PROPRIETORS.

IRA P. RANKIN.

ALBERT F. BRAYTON.

A. C. AUSTIN.

These works have now been in successful operation for the past sixteen years. From a comparatively small beginning in the year 1850, its increasing patronage has each year demanded enlarged facilities; until our establishment, in all its appointments, will compare favorably with that of any similar one in the country.

Our patterns in variety and extent are unsurpassed; embracing the latest improvements in all classes of machinery, adapted to use on this coast. Our several departments are well equipped with skillful workmen, and efficient tools; enabling us to execute all orders intrusted to us promptly, and in the most workmanlike manner. With ample facilities for doing work, as also for procuring our supplies from first hands, we are enabled to give our customers first-class machinery, at prices frequently paid for inferior work. The most skillful designing and engineering talent, applying to the various branches of mechanical work, constantly at the service of our customers.

We would call particular attention to the fact, that we have secured the exclusive right of manufacture for this coast of the celebrated HARTFORD ENGINE, which is conceded to be the most economical and perfect working engine now in use. Orders for all classes of Machinery, Castings, or Boiler Work promptly executed at the most reasonable rates.

GODDARD & CO.

ST and FREMONT STREETS, between Mission and Howard, SAN FRANCISCO.

PARTICULAR ATTENTION GIVEN TO STEAMSHIP AND STEAMBOAT WORK.

Alameda Park Asylum.

The spacious and elegantly furnished buildings of this Institution, situated upon the healthy and picturesque peninsula of Alameda, (opposite San Francisco) are now open, for the reception of patients suffering from DEMENTIA, and all other CEREBRAL and NERVOUS DISORDERS. The location is easy of access, free from cold winds and fogs, surrounded by extensive oak parks and gardens, abounding in beautiful drives, with the bay shore distant a few moments' walk only.

Bowling Alleys and Gymnasium, Billiard and Reading Rooms, Fresh and Salt Water Baths, and all other sanitary improvements for the cure and entertainment of patients.

Female Department in charge of an experienced Matron.

Every effort will be made to render this Institution deserving the confidence and patronage of the medical profession and public generally of the Pacific Coast. Communication with San Francisco, *via* Oakland and Alameda Ferries, ten times daily, each way.

Charges, including EVERYTHING, from \$1.50 per day, upwards,

Depending upon apartments occupied and condition of patients. Suites of apartments, with special servants, if required.

PHYSICIANS.

SAN FRANCISCO, CAL.

MANUFACTURERS AND INVENTORS.

Pacific Patent Agency.

The object of this Agency, is the opening a place for the sale of

Manufactured Patented Articles,

thus presenting to Manufacturers facilities to introduce their articles more readily to the public.

To enable persons needing the latest improved machinery or appliance in

MINING,

MECHANICAL,

AGRICULTURAL,

DOMESTIC,

MUSICAL,

MATHEMATICAL, or

PHILOSOPHICAL INSTRUMENTS,

TO PROCURE THEM THROUGH THIS AGENCY.

Also, to procure Patents and co-operate with Inventors, and make arrangements to put valuable Patents into practical use.

JOSEPH H. ATKINSON,

615 Sacramento Street, - - San Francisco, Cal.

N. B.—Samples, Drawings, and Models, solicited.

Manufacturers and Inventors will do well to communicate with this Agency.

Oakland, Alameda Co, P O and incorporated city; is pleasantly situated on the east shore of the Bay of San Francisco, about 7 miles distant from the metropolis. Communication between the two cities is rapid and frequent by railroad and steamboat. The San Francisco & Oakland Railroad commences at Oakland Point, and is completed to San Antonio, a distance of five miles. The climate is remarkably healthy, and a large portion of its population is made up from the business community of the Bay City. Several of the best educational institutions of the State are located here, of which the following deserve especial mention, viz: College of California, Oakland College School, Pacific Female College, Oakland Seminary for Young Ladies, etc.

OFFICERS.—John W Dwinelle, Mayor; E Gibbons, M D, F K Shattuck, D P Barstow, Jas Miner, Andrew Anderson, A H Jayne, J Wilcox, Councilmen; Jas Brown Marshal; H P Watkins, Police Judge; A D Eames, Clerk and Treasurer

Rudsill's Landing, Sonoma Co, (P O address Petaluma) 3 miles e of Petaluma, at the head of navigation of Petaluma Creek. A railroad connects this point with Petaluma

Rudsil John, saloon

Sacramento, Sacramento Co, the Capital of the State of California, P O, County seat of Sacramento and incorporated city. This is the second city in the State, situated on the left bank of the Sacramento River, a short distance below the mouth of the American River. Distance from San Francisco in a direct line, 75 miles, n e; by water, 120 miles. The Sacramento River is navigable to this point for steamers and sailing craft throughout the year, while the Upper Sacramento, as far as Red Bluff, and the Feather River, as far as Marysville, afford sufficient depth of water to allow small steamers to make trips

for at least nine months in the year. These advantages, together with the facilities extended by the several railroads which terminate at this point, have made this city the principal entrepôt for supplying the northern and Nevada trade. The Central Pacific Railroad is now completed to Dutch Flat, a distance of 68 miles, and the Sacramento Valley to Shingle Springs, a distance of 45 miles. The California Central connects with the latter at Folsom and extends to Lincoln, a distance of 18 miles, where it joins the Yuba Railroad to Marysville and the Northern California to Oroville. The Western Pacific Railroad, now in course of construction, will connect this city with San Francisco, *via* Stockton and San José

SAN FRANCISCO (City and County Consolidated 1856.) P O, and Incorporated City. Boundaries—North and East by the Bay of San Francisco, south by San Mateo, and west by the Pacific Ocean. Area of the City and County, about 42 square miles. This city, the commercial metropolis of California, is most favorably situated on the west shore of the Bay from which it derives its name. Possessing the only large and secure harbor on the Pacific Coast for a distance of nearly 2,000 miles, and the means of easy and rapid communications with a rich and prosperous inland population, this city already enjoys a large and important share of the trade of this Coast. The San José Railroad, connecting this city with San José, is 50 miles in length, and the Western Pacific Railroad, now in the course of construction, will connect this road, via Stockton, with the Central Pacific Railroad at Sacramento, thus forming a continuous line of railway from San Francisco to the eastern boundary of the State, and constituting the western division of the great Pacific Railroad. In addition to eight different lines of street railroads, the following are in operation in the vicinity of San Francisco, which, with the aid of steamers, furnish convenient means of communication with rich and flourishing interior localities, viz: San Francisco and Oakland, San Francisco and Alameda, Napa, and the Petaluma. This city is also connected with the leading ports of the North Pacific by lines of first class ocean steamships. Regular trips are made to Panama, San Juan del Sur, the Pacific Mexican ports, Vancouver, and the different seaports of this State, Oregon, and Washington Territory. The new line to China will commence its monthly trips on the first day of January next; and a line to Honolulu, Sandwich Islands, has been provided for by a recent Act of Congress. Legal distances: From Sacramento, 117 miles; from Stockton, 117 miles; and from San Quentin, 12 miles.

Staples' Ranch, San Joaquin Co, 16 miles n of Stockton

Stockton, San Joaquin Co, P O, County seat of San Joaquin Co, and incorporated city, situated on an arm or creek of the San Joaquin River, three miles from the main stream. Distance from Sacramento, 51 miles, s e, and from San Francisco, by water, 117 miles, n e. Legal distances: From Sacramento, forty-five miles; and from San Quentin, one hundred and thirty miles. This is one of the most flourishing interior towns; commanding the trade of a rich agricultural and mineral region, it must continue to advance in prosperity and wealth. The city is supplied with gas, and water is furnished by an artesian well, 1000 feet deep. The State Insane Asylum, and several important educational institutions are located here. Communication is had with the interior by numerous lines of stages, and with San Francisco by steamers, which make daily trips throughout the year. The Western Pacific Railroad, now in the course of construction, will connect this city with San Francisco, via San José, and Sacramento, where it will join the Central Pacific Railroad. The Copperopolis Railroad, 38 miles in length, is also in the course of construction, and its completion is expected during the approaching season.

OFFICERS.—C T. Meader, Mayor. Jerome Myres, Chief of Police; James Littlehale, Treasurer; Charles Belding, Assessor; A G Brown, Police Judge; L E Yates, Clerk; E Master-son, L W Shippee, H W Hatch, and F P Williamson, (First Ward) M S Thresher, H Hodgkins and Joseph Adams, (Second Ward) T K Hook, (President), Geo S Ladd, and Charles Hubner, (Third Ward) Aldermen.

BAKER COUNTY. Situated east of the Cascade Mountains, bordering on Idaho Territory. A large portion of this county is hilly and mountainous; but the valleys contain some fertile agricultural land, together with numerous valuable mining claims, which afford employment to a portion of its population for several months in the year. County seat, Auburn.

BENTON COUNTY. Boundaries—North by Tillamook and Polk, east by the Willamette River, south by Lane, and west by the Pacific Ocean. Area of the County, 1150 square miles. Population, estimated, 3,600. The eastern portion of this county, lying adjacent to the Willamette and its tributaries, contains large tracts of agricultural and grazing land. The western portion, embracing the district of Yaquina Bay, is attracting considerable attention as an agricultural and commercial point. The stock raised in this county is superior, and the yield of wheat and oats for the year 1864 exceeded 210,000 bushels. Value of real and personal property, 1865, \$1,400,000. County seat, Corvallis.

CLATSOP COUNTY. Boundaries — North by Multnomah, east by the Cascade Mountains, south by Marion, and west by Marion and Washington. Area, 1610 square miles. The surface is hilly and mountainous, but in the Willamette Valley numerous fertile tracts exist, and throughout the county a fine range for stock can be had. The northwest part of the county is intersected by the Willamette River, which affords, in the vicinity of Oregon City, the finest water-power on this coast. County seat, Oregon City.

COOS COUNTY Boundaries—North and East by Douglas, south by Curry, and west by the Pacific Ocean. Area, 1060 square miles. The surface is generally mountainous and heavily timbered; the valleys contain limited tracts of excellent agricultural land, and in many parts of the county good grazing facilities can be found. The principal business is lumbering, at and in the vicinity of Empire City. The coal mines at Coos Bay, the property of Flanagan & Mann, are now in successful operation. The vein is seven feet in thickness, and it was opened by the present proprietors in 1857. County seat, Empire City.

DOUGLAS COUNTY. Boundaries—North by Lane, east by the Cascade Mountains, south by Jackson and Josephine, and west by Coos and the Pacific Ocean. By Act of Legislature, Umpqua County is now consolidated with Douglas, which gives it the largest area (over 5000 square miles) of any county west of the Cascades. The surface is mountainous. Umpqua Valley lies wholly in this county, and is the largest in southern Oregon, and second only in importance to the Willamette. "It is most bountifully watered by the Umpqua River and its numerous branches and affluents, and it possesses a soil so varied and fertile that every thing may be grown that can be raised in any of the Northwestern States." The unoccupied public lands afford admirable grazing facilities for large herds of stock. Acres of arable land estimated at 233,000. Real and personal property, 1864, \$1,410,259. County seat, Roseburg.

GRANT COUNTY. Boundaries—North by Umatilla, east by Union, south
by Nevada, and west by Wasco. Organized 1864, from portions of Wasco and U-
matilla Counties. The land in this county is unproductive for agricultural purposes,
except a few tracts of limited extent adapted for grazing. Rich gold quartz is found
in several localities, the annual yield from which is about 10,000 oz. County seat,
Canyon City.

JACKSON COUNTY. Boundaries — North by Douglas, east by the Cascade Mountains, south by the State of California, and west by Josephine. Area, 3,000 square miles. Rogue River Valley lies in Jackson County, and embraces lands of superior quality for agricultural purposes. A considerable portion is admirably adapted for grazing, and an abundance of timber for manufacturing purposes is found throughout the mountainous section. Extensive ledges of gold and silver exist, which afford employment to a large number of persons; and copper, iron and coal have been discovered, but have not as yet been developed to any extent. An excellent article of salt is now being manufactured in large quantities. County seat, Jacksonville.

LINN COUNTY. Boundaries—North by Marion, east by the Cascade
Mountains, south by Lane, and west by Benton. Area, 2500 square miles. This
county ranks second in the State in point of population. Within its limits is embraced
a larger amount of productive land, including the best portion of the Willamette Val-
ley, than is contained in any other county in Oregon. Settled by a population noted
for its enterprise and energy, Linn must continue to advance in all the elements of
agricultural and commercial wealth. County seat, Albany.

Portland, Port of Entry, P O, County seat of Multnomah County, and incorporated city, situated on the left bank of the Willamette River, 13 miles above its junction with the Columbia, and 110 miles from the ocean. Distance from San Francisco, by sea 642 miles, and by the overland route 750 miles; from Salem, 50 miles n e. This is the most populous and wealthy city in the State, and second only to San Francisco on the Pacific coast in commercial importance. It is the entrepot for the interior trade of Oregon, and the territories of Washington and Idaho. Three lines of ocean steamships and numerous sailing vessels make regular trips to San Francisco, and a line of sailing packets and a line of steamers are also in operation to Honolulu and Victoria. Daily communication with the interior is maintained by lines of steamers and stages.

Salem, Marion Co, capital of the State, P O, county seat of Marion Co, and incorporated city. Beautifully and advantageously located on one of the richest prairies of the Willamette Valley, and on the right bank of the Willamette River, at a point navigable for steamers for nine months of the year. Distance from San Francisco, by the Overland Route, 710 miles; and from Portland, 50 miles s w. This city lies on the direct route between the great valleys and Portland, and in the immediate vicinity of the richest agricultural section of the State. Valuable water privileges exist in the neighborhood, which must at no distant day be a source of great advantage to the city. The Willamette University, the Catholic Seminary, and several other educational institutions, are located here.

OFFICERS.—George A Edes, Mayor; P L Willis, Recorder; Charles Uzafove, Treasurer; William S Barker, Mar-

EDWARD BOSQUI & Co. Print and Rule Blanks of all kinds, 517 Clay Street, San Francisco.

W. M. B. COOKE & CO., S. E. cor. Clay and Sanson Streets, San Francisco. HENRY O. LANGLEY, Publisher, San Francisco, will issue bi-annually the Pacific Coast Business Directory. (See account of this work in all responsible publications in imported stock.)

YAMHILL COUNTY. Boundaries—North by Washington, east by Clackamas and Marion, south by Polk, and west by the Coast Range. Area, 750 square miles. Yamhill is rapidly growing into importance; some of the best farming land in the State is to be found in large tracts in this county. "The prairies are gently undulating, and are skirted by groves of the choicest timber." The statistics of mortality show this county to be the healthiest in the State. Numerous water privileges exist, affording sufficient power for an indefinite number of mills, etc., which at no distant day must attract the attention of enterprise and capital. County seat, Lafayette.

OFFICERS.

Yaquina City, (Yaquina Bay) Benton Co, P O, 40 miles west of Corvallis. Yaquina is now attracting considerable attention as a trading port, and place of resort for tourists and pleasure-seekers. But little of this section has been known hitherto. The mouth of the bay is not referred to on the sea charts. The oyster beds and fish-

eries of Yaquina Bay are valuable, and it is claimed that vessels of small tonnage can at all times find safe entrance to the harbor, and that it must, at no very distant day, become an important commercial point as an outlet to the great Willamette

Austin, Lander Co, P O, county seat of Lander Co and incorporated city, situated on the Overland Mail Route, 187 miles e of Virginia City, and 415 miles w of Great Salt Lake City. This city, the center of the great Reese River mining region, was settled about the years 1862-3. It is situated in Talcot or Pony Cañon, on the Toiyabe range of mountains, and occupies an area of two square miles. It is the seat of considerable trade, and contains a population of about 3,000. A number of fine brick buildings have already been erected, and several associations of a religious and benevolent character are in operation. The Reese River Daily Reveille is published here.

Carson City, Ormsby Co, P O,
 County seat and Capital of the State.
 15 miles s of Virginia City. This
 city, the Capital of the State, is
 pleasantly situated in Carson Val-
 ley. It contains many fine brick
 buildings, amongst which may be
 mentioned the County Court House
 and Jail, and the St Charles Hotel,
 also several fire-proof warehouses and
 stores. The U S Branch Mint, for
 which an appropriation of \$100,000
 has been made, is located here, and
 is now in the course of erection. The
 State Prison is also situated near
 the city.

DOUGLAS COUNTY. Boundaries—North by Ormsby and Lyon, east by Esmeralda, south and west by State of California. Area, 1100 square miles. This is the principal agricultural district of the State, and its inhabitants are chiefly engaged in agricultural pursuits and the raising of stock. It is estimated that Carson Valley alone produced, in 1866, 300,000 bushels of grain, and 150,000 tons of hay. The product of lumber is large, there being seven mills engaged in its manufacture. There are also several valuable mining claims, which are being worked to a limited extent. County seat, Genoa.

ESMERALDA COUNTY. Boundaries—North by Churchill, east by Nye, south and west by State of California and Douglas County. Area, 6,000 square miles. The land in this county, with the exception of a few tracts of a limited extent which yield fair crops, is not adapted for cultivation. It is generally dry and barren, with a surface mountainous and rocky. The mineral deposits are varied and extensive. Silver ore is found in great abundance; also gold, copper, lead, iron, coal, etc. In the vicinity of Aurora there are 6 mills with an aggregate of 106 stamps engaged in working silver ore. Assessed value of real and personal property in 1864, \$1,518,010. County seat, Aurora.

HUMBOLDT COUNTY. Boundaries—North by State of Oregon, east by Lander, south by Churchill, and west by Washoe and Roop. It is estimated that there are in this county 150,000 acres of land suitable for agricultural purposes, and 640,000 acres adapted to the raising of stock. Along the banks of the Humboldt River are found thousands of acres of rich arable and grazing land. The silver mines of Humboldt County have long been known to be among the richest in the State, the ledges being large and well defined. Considerable excitement has been occasioned by the recent discovery of the "Black Rock" Mines, which are represented to be exceedingly rich in mineral wealth. Several mills are in course of erection in this district. Gold, lead, copper, sulphur, salt, lime, etc., also exist. The great Humboldt Canal now being built, will, when completed, be of vast benefit to this section, furnishing unlimited water power for mill and manufacturing, and also for purposes of irrigation. County seat, Unionville.

LANDER COUNTY. Boundaries—North by Territory of Idaho, east by Territory of Utah, south by Nye, and west by Churchill and Humboldt. The surface of the country is rough and mountainous, with a dry and barren soil. Number of acres adapted to agricultural purposes, including grazing land, 28,895. The "Reese River Mining District" is one of the most important mineral regions in the State. There were in operation in September, 1866, twenty-three quartz mills—aggregate number of stamps, 289—working silver ore. Gold, copper, sulphur, lead, iron, etc., are found in several localities. The lumber trade is also an important item; it is estimated that over 6,000,000 feet have been used in Lander and Nye counties during the past eighteen months. County seat, Austin.

LINCOLN COUNTY. This County was created by an Act of the State Legislature, 1866, from the south eastern portion of Lander County, including the newly-discovered mining district of Pahranaagat, and its organization provided for upon the application to the Governor of 300 resident voters. The enlargement of the State by the recent Act of Congress will include within the limits of this county the head of navigation on the Colorado River.

LYON COUNTY. Boundaries—North by Storey and Churchill, east by Churchill, south by Douglas, and west by Ormsby. Area, 480 square miles. The topography of this county is rough and mountainous, with a dry and barren soil, excepting along the Carson River, where there are a few tracts of arable land. The mineral deposits are exceedingly rich, and many of the claims have yielded large returns. Number of mills in operation, 39; aggregate number of stamps, 106. In the vicinity of Walker River very rich copper ore exists, which has been tested sufficiently to fully establish its value and importance. County seat, Dayton.

NYE COUNTY. Boundaries—North by Lander, east by Territory of Utah, south by Territory of Arizona, and west by Esmeralda. Nearly one-half of the area of this county is grazing land, of which about 50,000 acres are suitable for agricultural purposes. The mineral deposits are very rich and extensive, and it is estimated that over one-fifth of the land in the county abounds in metalliferous wealth. Gold and silver ore is abundant. In July, 1866, eleven mills had been erected, with an aggregate of 122 stamps. Iron, copper, lead, coal, salt, and sulphur are found in several localities. County seat, Ione.

ORMSBY COUNTY. Boundaries—North by Washoe and Lyon, east by Lyon, south by Douglas, and west by Lake Tahoe (or Bigler). The surface of the county is rough and mountainous, with a soil exceedingly dry and barren, except a few tracts of limited extent, situated in the valleys. Estimated number of acres of arable and grazing land, 5,000. Rich deposits of quartz have been discovered in Ormsby County, but, with the exception of the "Athen's Ledge," but little has been done as yet towards developing them. In September, 1866, there were eight quartz mills, with an aggregate of 175 stamps, crushing ore from the "Comstock Lode," in Storey County. County seat, Carson City.

ROOP COUNTY. Boundaries—North by the State of Oregon, east by Humboldt, south by Washoe, west by the State of California. This county is unorganized, but is attached to Washoe for judicial and legislative purposes. Portions of the county furnish fine agricultural lands, and many thousands of acres could be made highly profitable by a proper system of irrigation. The newly discovered mining district of Black Rock, in Humboldt County, is causing the valleys in the southern section to be settled, and another year may work many changes. At present, however, but little attention has been paid to developing its resources, although wherever attempts have been made to cultivate the soil, they have proved highly encouraging and remunerative. In the neighborhood of Pyramid Lake there are fine agricultural and meadow lands, which form part of the "Indian Reservation."

STOREY COUNTY. Boundaries—North by Washoe, east by Churchill and Lyon, south by Lyon, and west by Washoe. This is the richest and most populous county in the State. The land is not adapted for agricultural purposes, except what is found on the east bank of the Truckee River, which is of limited extent, but it is exceedingly rich in mineral wealth. The celebrated Comstock Ledge is situated within the limits of this county. The mines located thereon employ 76 mills, with an aggregate capacity daily of 1,800 tons, to crush the ore taken therefrom, a portion of which has to be conveyed on wagons for a distance of 18 miles to be reduced. The yield from this ledge for 1865 was nearly \$13,500,000, and it has been, and is, the principal source of revenue to the State, five-sixths of the taxable property having been within the limits of Storey, Washoe, Lyon, Ormsby, and Douglas counties, which depend for nearly all their business, directly or indirectly, on this lode. The Sutro Tunnel, an important enterprise, intended to drain the Comstock Lode 2,000 feet below the Gould & Curry croppings, has been projected. This, if successfully prosecuted, must result in adding largely to the mineral wealth of the State. County seat, Virginia City.

Vansyckles, Douglas Co, (P O address, Genoa) 3 miles s of Genoa

VAN SYCKLE H, proprietor hotel, dealer in grain and gent merchandise

Virginia City, Storey Co, P O and County seat of Storey County and incorporated city, 16 miles n e of Carson City, 158 miles n e of Sacramento, and 278 miles n e of San Francisco. This city, the Metropolis of the State, is situated on the eastern slope of Mt Davidson, and is well built, containing many fine brick stores and public buildings. The population is variously estimated at from 8,000 to 10,000. The city proper occupies an area of four square miles, and extends from the northern line of Gold Hill, two miles north beyond Seven-mile Cañon. Its annual aggregate business forms an important item in the trade of the Pacific coast, and the energy and enterprise displayed in its prosecution is worthy of commendation.

WASHOE COUNTY. Boundaries—North by Roop, east by Humboldt and Storey, south by Storey and Ormsby, and west by the State of California. This county has many fine natural lakes and valleys, and thousands of acres of the finest arable, grazing and timber land in the State. The number of acres under cultivation in 1864 was 10,450. Mining operations have not, as yet, been carried on to any considerable extent, though many rich localities have been prospected. Superior copper ore is obtained from Peavine District, about 25 miles north of Washoe City. Owing to the abundance of wood and water, many of the mining companies on the Comstock Lode have erected quartz mills in this county. A fine road has been built

between Virginia and Washoe City, for the transportation of the ore from their claims, which affords constant employment to a large number of persons. The manufacture of lumber is an important item in the business of this county; it is estimated that over 30,000,000 feet were produced in 1864, most of which was consumed in Storey County. County seat, Washoe City.

Port Townsend, Jefferson Co, P O, county seat of Jefferson Co, and port of entry for Puget Sound District, on Port Townsend Bay, at the entrance of Puget Sound. This is an important mercantile distributing point for all the ports of Puget Sound and the vicinity; distance from Olympia, 105 miles north. The bay here is four miles wide and six long, with good depth of water, bold shores, and safe and reliable anchorage. The harbor has a naturally commanding position, easily fortified, and it is capable of being made a strong military point. Considerable trade is here transacted, annual sales about \$250,000. There are several public buildings, one of which is the U S Marine Hospital. This region abounds with fish and game, which can, at all seasons of the year, be obtained in the greatest abundance. The military station of Fort Townsend, an important post, is at the head of the bay.

San Juan Island. in the Gulf of Georgia, bounded on the east by Rosario Straits, and on the west by the Canal de Haro. This island created a considerable controversy, a few years since, between the British and American Governments, concerning the boundaries of their respective territories, which came near ending in a war between the two nations. It is now occupied jointly, the British having a fort on one end of the island, and the Americans one near the town of San Juan. This island is exceedingly fertile, and well adapted for grazing and agricultural purposes, and contains an area of 40 square miles.

BOISE COUNTY. Boundaries—North by Idaho, east by Alturas, south by Ada, and west by Ada. This county is the richest and most populous in Idaho, and includes Boise Basin, which is said to be the largest and most productive placer mining region in the Territory. There are also many rich and valuable quartz lodes, and there are at present (October, 1866) nine quartz mills, with an aggregate of 100 stamps, profitably engaged in crushing ore therefrom. An abundance of wood and water exists, for milling and mining purposes. The climate is mild and serene during the summer and fall, cold in the winter, but generally healthy throughout the year. Warm springs exist within a few miles of Idaho City. The towns of Idaho City, Placerville, Centerville, and Pioneer City, with an aggregate of over 10,000 inhabitants, are included within the limits of this county. County seat, Idaho City.

BIG HORN COUNTY. This is an unorganized county in the southeastern portion of the Territory. It is said to be an excellent grazing country, but as yet little is known of its agricultural and mineral resources.

EDWARD BOSQUI & CO. Print and Rule Blanks to any pattern required. 517 Clay Street, San Francisco.

BEAVER HEAD COUNTY. Boundaries—North by Deer Lodge and Missoula, east by Madison, south and west by Territory of Idaho. In this county were discovered the first rich placer diggings of Montana, and here was the first important settlement of the Territory. As early as 1862, Bannack, the pioneer town, was settled on Grasshopper Creek, in the immediate vicinity of rich placers. These mines were soon exhausted, but there have since been discoveries of quartz ledges in the county, and there are several mining companies in active operation at the present time. Through this county flow several affluents of the Missouri River. Assessed value of real and personal property, \$250,000. County seat, Bannack City.

limits of this county, and near the west base of the Rocky Mountains, is Deer Lodge Valley, celebrated for its grazing capacity. There are rich mining districts in the county, and several quartz mills are in active operation. It is well watered by the Deer Lodge River, the Pipestone Creek, which is a tributary of the Missouri, and the Silver Bow, which flows into the Columbia. The only towns of importance are Deer Lodge City, Reynolds City, Blackfoot City, and Silver Bow, with an aggregate population of 6,500. Assessed value of real and personal property, \$466,091. County seat, Deer Lodge City. James H. Brown, Recorder; C. Mulkey, County Commissioner; no other returns of County Officers.

EDGERTON COUNTY. This is one of the north-central counties of Montana, situated near the east base of the Rocky Mountains. In point of population and wealth it ranks among the first. The placer and gulch mines of Edgerton have proved exceedingly rich, especially in the vicinity of Helena, and are now being worked with much success. The county contains many valuable quartz ledges, and several quartz mills are engaged in crushing the ore therefrom. It contains Helena, the most important town in Northern Montana, with a population of 8,000. Assessed value of real and personal property, \$1,326,386. County seat, Helena.

JEFFERSON COUNTY. This is one of the central counties of Montana, situated south of Edgerton County, near the east base of the Rocky Mountains. The prominent features of this county are its fine farming lands, its natural advantages for the raising of stock, and its beautiful and varied scenery. In 1862, mines were discovered, but until recently have never been thoroughly worked. Indications of quartz exist, but slight developments have been made. The county is well watered by the Prickly Pear and other affluents of the Missouri. Assessed value of real and personal property, \$190,628. County seat, Prickly Pear.

Vivion & Andrews, general merchandise

MADISON COUNTY. This county is situated in the extreme southern portion of Montana, and is one of the most wealthy and populous. It is especially noted for the extent and richness of its mines, which are annually yielding many millions of dollars. Within the limits of this county is Virginia City, the Territorial Capital, on the north side of Alder Creek. The county is watered by the North Fork of the Jefferson River. There are numerous valuable quartz ledges developed in this county, and the ore taken therefrom affords constant employment to several extensive quartz mills. Assessed value of real and personal property, 1866, \$1,732,905. County seat, Virginia City.

BOX ELDER COUNTY. Boundaries—North by the Territory of Idaho, east by Cache and the Great Salt Lake, south by the Great Salt Lake and Tooele, and west by the State of Nevada. This county forms the northwest boundary of the Territory, and comprises within its limits a large part of Great Salt Lake. For the most part, the soil is unproductive, but there are tracts of limited extent under cultivation, which produce more than an average yield. The number of acres under cultivation, in 1865, was 3,329, of which 1,845 were wheat. Number of mills: saw, two; grist, one. County seat, Brigham City.

The distance between this point, recently reached by a steamer, carrying over 100 tons freight, and Great Salt Lake City, is about 420 miles, over a tract of country admirably adapted for teaming. If navigation to this point can be maintained, this route, from its many advantages, must eventually control the trade of Utah.

Camp Douglass, Great Salt Lake County (P O address, Great Salt Lake City) a military post 3 miles e of Great Salt Lake City.

Calville. This point is said to be the head of navigation on the Colorado River, 100 miles above Fort Mojave.

CACHE COUNTY. Boundaries—North by Idaho Territory, east by Green River and Richland, south by Morgan and Weber, and west by Box Elder. This is one of the northern counties, bordering on Idaho Territory, and is one of the most productive agricultural Counties of Utah. The number of acres under cultivation, in

Beaver. An iron smelting furnace is located here

JUAB COUNTY. Boundaries—North by Tooele and Utah, east by Utah and San Pete, south by San Pete and Millard, and west by Tooele and San Pete. This county occupies a central position in the Territory. It has a mountainous surface, and, for the most part, is unproductive. The Wasatch Mountains form the eastern border, and in the northern part is Mount Nebo, 12,000 feet high. The number of acres cultivated in 1865 was 1,780, of which 1,000 were in wheat. Number of mills: saw, one; grist, two. County seat, Nephi.

OFFICERS.

KANE COUNTY. Boundaries—North by Iron, east by Colorado Territory, south by Arizona Territory, and west by Washington. "In consequence of Indian hostilities, all the settlements of this county have been vacated, except two, and everything is, therefore, in an unsettled condition. There are no merchants, manufacturers, lawyers, or physicians. It is a distant county of the Territory, with no thoroughfare through it, except into an Indian country. It is rugged and broken, and its soil sterile." County seat, Grafton. (No returns of county officers received.)

UTAH COUNTY. Boundaries—North by Great Salt Lake County, east by Wasatch and San Pete, south by San Pete and Juab, and west by Juab and Tooele. This is one of the central counties, and one of the most prominent in the Territory in population and resources. It is forty-five miles in length, and has an area of about 1,900 square miles. The character of the soil will compare favorably with that of any

other county in the Territory, and an abundance of timber exists in the mountain regions. Utah Lake, a body of fresh water, ten miles wide by thirty miles in length, lies in the northwest section. The number of acres under cultivation in 1865 was 13,198, of which 7,354 were in wheat. Number of mills: saw, eight; grist, twelve. The following incorporated cities are included within the limits of the county: Leli, Lone, Lake, Pleasant Grove, Provo, Springville, Spanish Fork, and Payson. County seat, Provo City.

WASHINGTON COUNTY. Boundaries—North by Iron, east by Kane, south by Territory of Arizona, and west by the State of Nevada. This county is in the southwestern extremity of the Territory, bordering on Arizona. The eastern part is mountainous, but there is much fine productive land in the county. Cotton is raised with great success in the vicinity of Virgin and Santa Clara rivers, and tobacco and tropical fruits thrive and yield abundant crops. The average yield of grain per acre is not as large as in the more northern counties. In 1865, there were 2,781 acres under cultivation, of which 790 were in wheat, and 500 in fruit. Number of mills: saw, six; grist, two. County seat, St. George.

JOHN V. LONG,

ATTORNEY & COUNSELOR & SOLICITOR IN CHANCERY.

Will practice in all the Courts in this Territory.

OFFICE IN GREAT SALT LAKE CITY.

A. ROMAN & Co., San Francisco. Medical, Scientific, and Theological Books.

FIREMAN'S FUND INSURANCE CO. Pay all losses promptly in Gold Coin. S. W. corner California and Sanson Streets. San Francisco.

The North America Life Insurance Company, OF NEW YORK.

(MUTUAL.)

THE MOST RESPONSIBLE COMPANY IN THE WORLD!

For, by an act of the last Legislature of New York, the Policies of this Company **EXCLUSIVELY**, will be guaranteed by the State, bear the Seal of the State, and be countersigned by the Insurance Commissioner.

IT IS ALSO

THE MOST LIBERAL COMPANY IN THE WORLD!

For it is the ONLY Company that

Places No Restriction on Occupation!

The only Company that makes

No Extra Charge for Residence anywhere on the Globe!

(Except between the tropics.)

The only Company that makes

No Extra Charge for Traveling anywhere on the Globe!

The only Company

WHOSE POLICIES ARE ALL NON-FORFEITABLE AND INDISPUTABLE!

The only Company that

Allows Thirty Days Grace on Renewal Payments without Reserve!

This Company

Insures Against Accidents from Traveling,

ON THE VERY BEST TERMS.

 **DIVIDENDS ANNUALLY**—of 45 per cent.
in Cash, or over 80 per cent. if added to Policies.

Nanaimo, is situated about 80 miles n of Victoria, and is the only point in the interior of Vancouver Island which has assumed the pretensions of a town. It has a splendid bay opening from the Gulf of Georgia, which is well buoyed, and capable of admitting the largest class man-of-war. It is only 30 miles from Burrard Inlet, which is rapidly coming into prominence for its superior lumber. It is a fine agricultural district; the principal interest, however, is coal; the Vancouver Company Coal Mine being located here.

New Westminster, capital of British Columbia, P O, incorporated by Royal Charter, organized August, 1860, on the Frazer river about 20 miles above the entrance proper, and is the only port of entry in the colony. Its population is estimated at about 600. The magnitude and commercial importance of the Frazer is second only to the Columbia on the north-west coast of America, and at some future time will give an equal importance to New Westminster. The town already contains a number of excellent buildings, wharves, and private residences. A novel feature of New Westminster, recalling many pleasing recollections to strangers, is the splendid peal of eight bells, presented by Miss Burdett Coutts to the Episcopal church. The climate, though severe in winter, is delightful and healthy in summer.

OFFICERS.—John Robson, President; J McMillan, William J Armstrong, William D Ferris, James Cunningham, David Withrow, John S Clute,

W. M. A. COOPER & CO., Importers and Manufacturers Stationers. San Francisco, offer the best inducements to the Trade.

Victoria. Incorporated by Royal Charter, and P O. This town, the capital of the former Colony of Vancouver's Island, is situated about 850 miles north of San Francisco, and may be justly regarded as the next important seaport on the coast. The harbor is safe and easy of access to vessels drawing 14 or 15 feet of water, at all times, but vessels over that draught require the highest spring tides. This deficiency is made up, however, by the adjacent harbor of Esquimault, which can be entered at all seasons of the year, and where all the vessels of the British North Pacific Squadron lie. Victoria is a free port, and the increase of steam communication with the American Territories has already attracted an equal increase of business. The island is rich in minerals, gold, copper, iron, and coal. Its extensive coal fields, stretching a long distance on the east side of the island and the main land, give it an especial interest and importance to San Francisco. The town is well laid out with beautiful suburban scenery and drives. For eight months in the year the climate cannot be surpassed, and as a summer resort for tourists and invalids, it is unexceptionable. The town contains many handsome buildings and substantial wharves, and its municipal affairs are regulated by a Council and Mayor. Population estimated at 4,000.

OFFICERS.—Lumley Franklin, Mayor; William Leigh, Town Clerk; Charles Gowen, Richard Lewis, Joseph Jeffrey, Robert Layzell, William Hebbard, Joseph Jeffrey, Jr, Councilmen; Joseph Joseph, Messenger; Richard Lewis, J Jeffrey, Sr, William Hebbard, Fire Wardens.

Yale, P O. This is a small town at the head of steam navigation, on the Fraser, 105 miles above New Westminster, and enjoys a flourishing business in the transmission of goods to the Cariboo mines. Two steamers run twice a week between the two towns. The freighting business to the mines, from Yale, gives the best idea of the importance of British Columbia, employing, as it does, over 3,000 animals. Barnard's stages leave this town for the Cariboo country, and an opposition line was started, last year, by Mr. Davis.

FIREMAN'S FUND INSURANCE CO. A Home Institution, insure throughout the Pacific Coast.

Walla Wall University,
SALEM, OREGON.

INCORPORATED, - - - - - 1853

CALENDAR.

**The First Term begins September 10th, 1866.
Quarterly Meeting of the Trustees, November 14th.
Term ends December 21st.
The Second Term begins January 7th, 1867.
Quarterly Meeting of the Trustees, February 6th.
Term ends April 13th.
The Third Term begins April 23d.
Annual Examination, July 23d, 23d and 24th.
Annual Meeting of the Trustees, July 23d.
Commencement Exercises, July 25th.**

There are seven competent and experienced Teachers now employed in the School, and with its complete set of Philosophical and Chemical Apparatus, it offers advantages to students not afforded by any other Institution in the State.

PRICE OF TUITION.

Collegiate Department, Per Term.....	\$16	Primary Department, Per Term.....	\$8
Young Ladies' " " " ".....	13	Instrumental Music, " ".....	18
Preparatory " " " ".....	13	Use of Piano, " ".....	3
Academical " " " ".....	10	Drawing, French, German, " (each).....	4
Intermediate " " " ".....	8	Painting, " ".....	12

Prepayment each Term required, and no bill rendered for less than half a Term. Board can be procured in private families at about \$4 per week.

J. S. SMITH, SECRETARY.

THE
Willamette Woolen Manufacturing Company,
SALEM, OREGON.

Having greatly increased its manufacturing facilities, is now prepared to fill, without delay, all orders with which it may be favored, for the following styles of Goods, viz :

BLANKETS.

WHITE and GRAY, with Fancy Bindings and Borders.

FLANNELS.

**SCARLET, CRIMSON, WHITE, RUBY, CLARET BROWN, GREEN, BLUE, ORANGE,
BLACK, GRAY, CHECKED, STRIPED.**

TWEEDS.

BLACK, BLUE, STRIPED, CHECKED, MIXED, GRAY, DRAB.

CASSIMERES.

BLACK, Extra; BLACK, Heavy; FANCY RIBBED, various Styles and Colors.

LADIES' CLOTH.

BLACK EXTRA, Double Width; BLACK, Double Width; DRAB, Double Width.

**Also, EXTRA BLACK DOESKIN, Plain and Striped; HARD TIMES; BEAVER CAS-
SIMERES; STOCKING YARN; GRAY OVERSHIRTS, Etc., Etc., Etc.**

As neither Cotton nor Shoddy is used, and great care is taken in their manufacture, the *excellence* and *durability* of its Goods can safely be guaranteed.

FEMALE COLLEGE OF THE PACIFIC,

OAKLAND, CALIFORNIA.

This Institution is the successor of the PACIFIC FEMALE COLLEGE.

It is thoroughly organized in all the departments of instruction. In each department, Preparatory and Collegiate; in the department of Music, both Vocal and Instrumental; and in that of Arts of Design, teachers of experience and of tested ability will be employed.

In addition to daily instruction, the special oversight and immediate direction of the Institution in all its internal arrangements will be committed to Mr. and Mrs. Harmon, whose success as educators, both in the Atlantic States and on this coast, has deserved and won the fullest confidence of the public.

The Trustees assure parents and guardians that the most earnest and diligent attention will be paid to the moral and intellectual culture of the pupils, and no pains or expense shall be spared to promote their health and comfort.

The present term commenced on WEDNESDAY, JANUARY 2d, and will continue twenty weeks, at which time the Collegiate year closes, and the members of the present Senior class will receive their diplomas.

OAKLAND SEMINARY FOR YOUNG LADIES.

This School was first commenced on the 8th of November, 1858, by Mrs. G. M. Blake, its present Principal. Since that time it has been constantly increasing in excellence. It is located in the City of Oakland, a town that in healthfulness of climate, beauty of scenery, and facilities for mental and moral culture, is unsurpassed in the State. The grounds embrace an entire square, and command one of the finest views of the city. The design of the School is to furnish the comfort and quiet of a home, in connection with such resources as are essential to the thorough and accomplished education of young ladies. Competent and experienced teachers fill each department of study.

The School year is divided into two sessions. The winter session commences on the 8th of January, and the summer session on the 23d of July. This institution affords all the advantages of a **THOROUGH ENGLISH COURSE, THE ANCIENT AND MODERN LANGUAGES, CALISTHENICS, GYMNASTICS, MUSIC**, and all the Ornamental Branches.

For Catalogues, containing full information, please address

BENICIA COLLEGE

AND

BOARDING SCHOOL,

AT BENICIA, CAL.

(FOR MALES ONLY.)

This Institution has been in successful operation **TWELVE YEARS**. Its accommodation for the comfort of Pupils, as well as its facilities for Instruction, are of the **FIRST CLASS**.

The location is accessible from all parts of the State. The climate is entirely healthy, being free from the heat of the Interior and the cold winds and fogs of the Coast. The village is quiet, and free from those injurious influences found in large cities and their immediate vicinity.

The Instruction is divided into three parts—the **ELEMENTARY COURSE**, the **ENGLISH or SCIENTIFIC COURSE**, and the ordinary **COLLEGE COURSE**. If desired, Pupils will be prepared to enter Eastern Colleges. Book-keeping and kindred branches are also taught, giving the pupil those advantages claimed by Business Colleges.

Especial attention is invited to the **ENGLISH or SCIENTIFIC COURSE**, as being peculiarly suited to those who wish to obtain a liberal education, fitting them for almost any business in life, and yet want either time or inclination to pursue the Dead Languages. Close attention is given to making pupils thorough and practical. The number of pupils is limited, so that all can have the instruction of a few able teachers, instead of being placed in large classes under the tuition of inexperienced assistants.

Pupils generally board at the Institution, under the direct charge of the Principal.

EXPENSE.

Board, Washing and Tuition of pupils under fourteen, per month.....	\$32.50
Pupils over fourteen, " "	35.00
Per year of ten months, from.....	\$325 to 350

The rooms are ready furnished. No extra charges. A deduction will be made when two or more come from the same family.

SESSIONS.

The year is divided into two Sessions, of five months each, commencing on the third of January, and the 26th of July, and closing on the 30th of May, and the 20th of December. The principal examination and graduating exercises, will take place in May.

For further information request a circular.

C. J. FLATT, Principal.

ST. CATHERINE'S

Academy for Young Ladies,

BENICIA, CAL.

This Institution is conducted by the SISTERS OF ST. DOMINIC, and is situated in the healthy and accessible town of Benicia. The plan of education embraces the various branches of instruction usually taught in the most approved seminaries for young ladies. Pupils of any religious denomination will be received, but for the sake of uniformity, all are required to be present at the regular religious services of the Institution.

The scholastic year, comprising ten months and a half, opens on the twenty-first of August, and ends about the first week of July. No deduction will be made if the pupil is withdrawn during the session, except in case of sickness. Pupils will be received at any time, the fees to commence from date of entrance.

The uniform for Sundays, in winter, will be black alpaca, white collar, cuffs, black silk apron, white straw bonnet trimmed with white, green veil, and black kid gloves. For the summer uniform, inquiry is to be made at the Institution.

Besides the uniform dress, each pupil should be provided with four dresses, six changes of linen, towels, blankets, sheets, pillow-cases, a calico morning gown, parasol, six table napkins, a knife, silver spoon, fork and goblet, a straw bonnet trimmed with green, a white Swiss muslin dress, a dressing and ivory comb, a hair brush, tooth brush, and nail brush. All articles should be marked with the name.

TERMS PER ANNUM—Payable half-yearly in advance.

NAPA LADIES' SEMINARY.

Boarding and Day School for Young Ladies,
NAPA CITY, CALIFORNIA.

This institution entered upon its fifth school year with the present session, which opened July 17th, 1866, and will continue for five months and a half, or twenty-two weeks.

The ensuing Term will commence January 2d, 1867.

The location of this Seminary is delightful, it being situated in Napa, noted as one of the most healthy, accessible and beautiful towns in the State.

The new and commodious buildings fitted up expressly for school purposes, offer superior accommodations for boarding, as well as day pupils.

No efforts are spared by those in charge of the school, to make it an institution of learning, that may fully meet the demands of a discriminating public.

The course of study is the same as that pursued in the best Seminaries in the East, comprehending the useful and ornamental branches of a complete female education.

Special attention given to the Musical Department.

Pupils can enter during the term, and be charged from the time of entrance.

FOR

Young Ladies and Gentlemen.

This Institution is located in Napa City, which, in point of climate and natural scenery, is unsurpassed in the State. It is easy of access, there being a daily boat from San Francisco, and daily stages from Sacramento and Benicia. It is on the line of travel to the White Sulphur Springs, Calistoga Springs and the Geysers. The building is constructed with a special view to a mixed school. The best teaching talent of the State will be secured at whatever expense. Thoroughness in scholarship will ever be prominent before the instructors. There are two fine Gymnasiums and ample play grounds connected with the Institute. The teachers reside in the building, and have a constant oversight of the students who are boarders, but cannot be responsible for those who board in the town or country. The government is mild, but firm.

CALENDAR.

The Collegiate year is divided into two sessions, of twenty-one weeks each. The first session will begin July 26th, 1867, and end December 23d. The second session will begin January 3d and end June 1st. Winter vacation two, and the summer vacation eight weeks long.

SOTOYOME HOUSE,

HEALDSBURG,

SONOMA COUNTY, CALIFORNIA.

This long established House has gained a wide spread reputation throughout this section of the State for its home-like conveniences and comfortable apartments.

Here the stranger is made to feel himself at home, and his every want anticipated.

The Rooms are neatly furnished, and well ventilated, and the Table supplied with the best the Market affords.

This village being situated on the West bank of the Russian river, in a pleasant and healthful valley, is a most inviting resort for the invalid and pleasure seeker.

The Pacific Coast Business Directory

FOR 1866-67.

PRICE, FIVE DOLLARS. PAYABLE ON DELIVERY OF THE WORK.

Containing the Names, Business and Address of over thirty thousand Merchants, Manufacturers and Professional Men in the States of California, Oregon and Nevada, and the Territories of Washington, Idaho and Montana.

Also, Lists of the Commercial, Agricultural, Manufacturing, Mining, Petroleum, Railroad, Telegraph, Banking and Insurance Companies, in operation at the present time in the above States and Territories; to which are added a variety of other items of information, rendering the work

A VALUABLE AND RELIABLE MEDIUM OF REFERENCE.

Compiled by the Editor of the San Francisco Directory, State Register, &c.

HENRY G. LANGLEY, Publisher, 612 Clay Street, San Francisco.

UNION HOTEL, SONOMA, SONOMA COUNTY, CALIFORNIA.

JOHN LUTGENS having purchased the Union Hotel, and thoroughly refitted and renovated the same, is prepared to give the best accommodations to the traveling public. Also, the best accommodations for boarders with Families, or otherwise, and the health of this community is not surpassed by any of the State.

PIONEER HOTEL OF SANTA ROSA.

SANTA ROSA HOUSE.

The subscriber having refitted in a superior style, the above named new and commodious Hotel, lathed and plastered throughout, and well ventilated and secure from fire, is now prepared to accommodate the traveling public generally, in the best manner, and on the most reasonable terms.

The Table will be supplied with all the delicacies of the season. The Bar will be found stocked with the choicest Ales, Wines and Segars. Families can be supplied with apartments every way suited to their desires. Connected with the House is a first class Billiard Table. An extensive Livery Stable is attached to the House. A line of Stages, running to and from Sonoma, Petaluma and Russian river, stop at this House daily.

F. P. COLGAN, Proprietor.

BRICK HOTEL,

AT

CLOVERDALE, SONOMA COUNTY, CAL.

H. F. GERKHART, - - - PROPRIETOR.

This Hotel has ample accommodations for boarders with families, having spacious and well ventilated rooms. The health of this locality is unsurpassed in any portion of the Pacific coast, making it a most desirable resort for any wishing to spend a few weeks for recreation or the improvement of their health.

AMERICAN HOTEL, MAIN STREET, PETALUMA.

P. N. EMERSON, - - - PROPRIETOR.

Having leased the above Hotel for a term of years, he is determined to keep a first class Hotel, and in such a manner as to merit the patronage of the community and traveling public.

Stages arrive and depart from this House daily for all parts of this and adjoining counties. The Hotel Omnibus will be kept on hand to convey guests to and from the boats.

SOTOYOME INSTITUTE

FOR

MALES & FEMALES

HEALDSBURG, CALIFORNIA.

The village in which this Institution is located, is delightfully situated on Russian River, in the County of Sonoma, thirty-two miles from Petaluma, in a district unrivaled for salubrity of climate, beauty of scenery, and high social advantages.

The School has been in operation, under the direction of the present proprietors, for three years, during which time it has gained for itself a standing that justly commends it to all friends of learning.

The scholastic year is divided into two sessions, of five months each, commencing about the first Wednesday of August and January of each year.

SOMETHING NEW.

STEVEN'S SELF-REGULATING WIND MILL,

MANUFACTURED BY
GEORGE STEVENS,

A ST., ADJOINING D. FORD'S BLACKSMITH SHOP, REDWOOD CITY.

These Mills are the most simple and efficient ever yet invented, and are got up at prices which defy competition. Every mill is warranted to run with as little wind as any other, and at the same time will, without any attention, so regulate itself, as to be in no danger from the strongest gale. Persons desiring mills, will find it to their interest to give me a call before purchasing elsewhere.

Tanks of every description made to order.

George Stevens.

MRS. POSTON'S
Seminary for Young Ladies,
MARYSVILLE, CAL.

ESTABLISHED 1857.

The principal, fully appreciating the influence that rightly educated women must ever exercise over society, has endeavored to found an institution which will afford to young girls facilities for the formation of those energetic and sound moral principles, as well as for that liberal development of the mental faculties, that the growing interests of our State demand. Parents who place their daughters here may rest assured that nothing will be neglected that contributes to the strengthening of the physical constitution, the cultivation of refined tastes and gentle manners, and to the acquirement of that discipline of mind and heart that will qualify the future woman to act well her part in whatever station of life she may occupy.

The branches included in a thorough English course of study, the languages, ancient and modern, and all the accomplishments considered as belonging to a finished system of instruction, each receives a due share of attention. Gyrnastic and Calisthenic exercises, under a competent teacher, form a part of the daily recreations, and have proved thoroughly successful in promoting health and cheerfulness.

The City of Marysville presents many advantages for such an establishment. It is easy of access from all parts of the State; has varied educational resources; is distinguished for its quietness, and is unsurpassed in the beauty and healthfulness of its situation. The location of the Institute is retired, securing to the pupils sufficient room for exercise and recreation, as well as the seclusion so necessary for the successful prosecution of study.

For terms, etc., address

MRS. E. C. POSTON, MARYSVILLE, CAL.

DAWSON HOUSE.

The public are respectfully informed that the above House is now opened and complete in every department. A fine Bar and Billiard saloon is connected with the House. Free Carriage from the Boat and Cars.

YOUNG LADIES' ACADEMY

OF NOTRE DAME,
MARYSVILLE, CAL.

1866.

THIS Establishment is under the superintendence of the SISTERS OF NOTRE DAME, a Society of Ladies, who, in San Jose, the Atlantic States and Europe, are engaged in the education of Young Ladies.

The Academy is eligibly situated in the upper part of Marysville, enjoying a salubrious air.

The building is surrounded by an extensive play ground, furnished with every facility for the amusement and physical welfare of the Pupils. During the hours devoted to recreation, the Pupils are always under the mild and efficient care of one or more of the Teachers. The most minute attention is paid to their neatness, health, and comfort; and in case of sickness, they shall receive the most affectionate care and attention.

In all institutions of this kind, the moral advancement of the Pupils should be considered equally important with the development of their intellectual powers. The heart must be educated as well as the mind; and adorned with those qualities which beautify the manners, and render virtue more amiable and attractive. Every incentive power to inspire a laudable emulation and develop talent shall be employed.

At the end of every three months, the Young Lady most distinguished for general good conduct and application receives the honorary decoration of a Medal. A report of the conduct, proficiency, and health of the Pupils is sent, every three months, to the Parents and Guardians.

The Catholic Religion is the only one professed by the Ladies of this Institution; but there shall be no interference with the religious principles of those who profess a different creed; nor shall a scholar be allowed, at any time to conform to the Catholic Religion, without the written or verbal permission of her Parent. Uniformity, however, requires that the boarders should assist at Divine Worship, as performed at the Institution.

The system of Education embraces Orthography, Reading, Grammar, Writing in various styles, Compositions, Arithmetic, Book-Keeping (single and double entry), History (Sacred and Profane, Ancient and Modern), Geography (the use of Globes and the Projection of Maps), Astronomy, Mythology, Botany, Natural Philosophy and Chemistry, Plain Sewing, Embroidery on Lace and Muslin, Beads, Chenille, Shell, &c., &c.; Drawing in Crayon, Indian Ink and Black Lead; Painting in Oriental style, in water and body colors; Music (Vocal and Instrumental). In a word, all the branches of Education usually taught in the best Schools for Young Ladies.

All letters, not known to be from Parents, will be subject to the inspection of the Superior of the Institution. The Young Ladies may receive visits from their Parents on Thursday afternoon, and such others as are formally authorized by the Parents. On the first Thursday of every month, the Pupils will be permitted to visit their Parents. Those whose Parents reside at a distance can obtain temporary leave of absence whenever visited by them, but not oftener than once a month; and in all cases the Pupils must have returned before dark.

The Uniform, which is strictly required to be worn on Sundays only, consists of a black Alpaca or Silk Dress, black Silk Apron, white Straw Hat, plain Linen Collar for Winter—Embroidered for Summer; black Kid Gloves—Mittens for Children. For the Summer Uniform Dress, inquiry is to be made at the Institution.

Each Pupil must be provided with a knife, fork, spoon, flat and deep plate, white bowl, goblet (silver or britannia), four napkins, four towels, four changes, two pairs of sheets, two pillow cases, the rest of the clothing in proportion; combs and brushes, &c. The bedding must consist of a mattress or feather bed of about six by two and a half feet, one pillow and two blankets. Bed and Bedding, except sheets, will be furnished by the Institution, if required, at \$10 per session.

No advance will be made by the Institution for the clothing or other expenses of the Pupils, if no sum to meet such expenses be deposited by the Parents. This regulation is considered indispensable, and will in all cases be strictly adhered to. No boarder will be received for a shorter time than half a session.

The scholastic year consists of one session, which commences on the 1st of September, and closes about the 15th of July.

TERMS:

Board and Tuition, per quarter.....	\$50 00
Washing.....	\$10 00
Physician's Fees.....	2 50

EXTRA CHARGES.

Piano, with use of Instrument, per quarter.....	\$18 00
Vocal Music.....	\$8 00
Guitar.....	15 00
Drawing and Painting.....	12 00

No extra charge for French, German, Plain or Fancy Needle Work. Payments are required to be made half a session in advance.

Letters to be addressed to the Superior of the Institution.

DR. J. W. MURRAY'S
CELEBRATED
VEGETABLE, LUNG AND LIVER BALSAM.
A NEW AND VALUABLE DISCOVERY.

The most popular and reliable remedy known for all Lung and Liver complaints, Scrofulas, Impurities of the Blood, and cutaneous diseases, Cancers, Rheumatism, Pains in the Chest or Spine, or Neuralgia, and all Female debilitations, so common on this coast.

IT TOOK THE FIRST PREMIUM AT THE OREGON STATE FAIR IN 1865. Manufactured and sold wholesale and retail, at the proprietor's office, in Corvallis.

Orders filled and sent to any part of the Coast or United States.

Also a sure remedy and antidote for the Cholera. That has cured all that ever took it according to directions in the Atlantic States, and will be warranted on this Coast. A SURE CURE AND PREVENTATIVE.

FOR SALE, WHOLESALE AND RETAIL, BY
Dr. J. W. Murray & Co., Chemist and Druggist,
CORVALLIS, OREGON.

We are also the original compounders of the world-renowned and greatly celebrated Magic Oil, one of the greatest discoveries in the Vegetable Kingdom. For all Aches and Pains of the human family. 50,000 Bottles sold in Oregon in the last two years. The only original, pure and genuine Magic Oil manufactured and sold Wholesale and Retail, at

PRIVATE APARTMENTS FOR FAMILIES.

Dr. CHAS. H. TOZER'S PRIVATE MEDICAL INSTITUTE, N. E. COR. KEARNY AND JACKSON STREETS, SAN FRANCISCO, CAL.

The Great Eradicator of Special Complaints, formerly of Locke Hospital, London, Eight Years in Sacramento, and the last Four Years in San Francisco.

Dr. TOZER'S

Experience is of forty years' standing, and during that time has met with unparalleled success in the treatment of all those diseases generally known as **VENEREAL** or **CHRONIC**.

It is impossible here to mention all the diseases with which he is familiar: some, perhaps, will not be out of place. The most formidable, the most destructive to mankind, is Self-Abuse. The brain being the seat of the disease, the whole system suffers in consequence. I will here enumerate some of the symptoms, so that those afflicted may be able to form an opinion in regard to their complaints, and seek advice in time, thereby saving themselves a world of suffering: Nervous Debility, Loss of Memory, Pain in the Limbs and Back, Palpitation of the Heart, Trembling of the Limbs, Headache, and an aversion to Social Society, especially that of females. There are a great many more, but these are sufficient, and should you be suffering from any of them, call on Dr. TOZER, and you will cure you in a short time, without any interruption in your business—or state your case by letter, and there will be no occasion for your calling at the office.

STRICTURE OF THE URETHRA is another formidable enemy to health. Send for one of my circulars on that disease, and inform yourself of the terrible results. The worst cases cured in a few days. **VENEREAL DISEASES**, in all their various forms, either Primary, Secondary, or Hereditary, completely eradicated from the system. Your constitution being restored to perfect health, there will be no danger of handing down to your children that terrible disease known as Scrofula.

SYPHILITIC DISEASE, as it presents itself on this Coast, is of a more formidable character than that seen in the Atlantic States or Europe, arising from the fact of its being a compound of Spanish, Chinese, and Sandwich Island disease. Those of you who have visited the two latter countries no doubt have seen the dreadful effects of it on both the native and foreign population. It requires altogether different modes of treatment.

THE OLD FORMULAS of Ricord, Acton and Bostwick, are of little account, except to dry up the disease on the surface, leaving the poison in the blood, which, sooner or later, will show itself as a Secondary disease in an aggravated form. These facts I have learned by experience, and think I can say without boasting, that I have seen more practice in these diseases than any other physician in San Francisco, dating as it does from 1849. It becomes you, therefore, to think well before you employ a physician. Who is the proper one to consult—an old experienced one, or one who has recently settled amongst you? **MY PLAN IS PURELY VEGETABLE**, destroying the Disease and purifying the Blood, so that there is no danger of Secondary Symptoms.

REUMATISM, NEURALGIA, and diseases arising from the use of Mercury, such as Pains in the Shin Bones, Swellings of the different Joints of the Body, Running Sores, etc., and Impurities of the Blood, cured in a short time by the use of my **VEGETABLE MIXTURES**, known only to myself.

SEMINAL WEAKNESS—Should you be afflicted with any of the following symptoms, such as Weakness of the Back and Limbs, Pain in the Head, Dimness of Vision, Nervousness and General Debility, Loss of Memory, Confusion of Ideas, and Depression of Spirits, Evil Foreboding, Self-Distrust, and an aversion to Society, consult Dr. TOZER at once, and he will restore you to perfect health.

TO FEMALES—When you are afflicted with Weakness in the Back and Limbs, Headache, Loss of Muscular Power, Palpitation of the Heart, Irritability, Nervousness, Extreme Urinary Difficulties, Derangement of the Monthly Sickness, Sterility, and other diseases peculiar to Females, consult Dr. TOZER, and you will receive particular attention. Let no false delicacy prevent you, but apply at once, and save yourself from painful suffering and premature death. My rooms are so arranged that there is no danger of exposure, or of meeting any one, except the Doctor.

FEMALE MONTHLY PILLS were never known to fail in giving relief in those cases for which they are recommended. To be obtained only at my office. Price, **FIVE DOLLARS**—with full directions on each Box. Sent by Mail or Express.

TO CORRESPONDENTS—Patients of either sex, residing in any part of the country, however distant, who may desire the opinion and advice of Dr. TOZER, can, by submitting a written statement of their case to the Doctor, receive all the attention and medicines necessary to effect a cure without the necessity of a personal interview. All letters strictly confidential, opened and replied to by the Doctor himself. Consultation at the office or by letter, FREE. Cures in all cases guaranteed. Office hours, from 9 A. M. to 8 P. M.

Remember, **Dr. CHAS. H. TOZER'S INSTITUTE** is at the Northeast Corner of Jackson and Kearny Streets, San Francisco, Cal. Entrance on Kearny Street.

All letters through the Post Office or Express should be addressed to Dr. CHAS. H. TOZER, San Francisco, Cal.

A GRATEFUL ACKNOWLEDGMENT TO SKILLFUL GENTLEMEN.

SACRAMENTO CITY, June 1st, 1868.

DR. CHAS. H. TOZER—Dear Sir: You will excuse me not writing to you sooner. You will perhaps remember that me the individual who called on you for assistance about a year ago. The roof of my mouth had completely rotted out, and my palate dropped down, and there remained, stopping up the passage so that I could hardly eat. You remember you cut it out at once, which relieved me immediately, and I was enabled to swallow my food, and in a short time began to improve. I took your medicine and followed your directions for several months. You finally succeeded in stopping the disease, saving my nose and upper lip, though you frequently cautioned me about losing it. I continued to improve until you finally recommended me to go into the country; and before going, by your advice, I had a cast taken of my mouth, in order that I could have a plate made for me to enable me to speak so as to be understood and am now using it. My eternal thanks are due to you for the perseverance and skill that you displayed in my case; and I have to thank you for my restored health, and even for my life, (as I was very near bleeding to death several times from the nose.) I am now in Sacramento City, enjoying good health, and I shall recommend all my friends to call on you should they be so unfortunate as to require assistance; and I would advise all persons to avoid certain scientific doctors in your city, for they will send them to a land from whence no traveler returns. With my best wishes for your success, I remain, yours, etc.,

S. S. F.

To CHAS. H. TOZER, San Francisco, Cal.

THE PIONEER MEDICAL AND SURGICAL INSTITUTE WAS ESTABLISHED IN 1850, BY

Dr. J. C. YOUNG,

Formerly Professor of the University, Penn.; Author of Comparative Anatomy; Honorary Member of the Royal College of Surgeons; Professor of Obstetrics and Lecturer upon Diseases of Women and Children; Lecturer upon Diseases of the Urinary and Generative Organ;

TO PROTECT THE AFFLICTED FROM THE UNPRINCIPLED, AND AFFORD THEM SPEEDY AND RADICAL CURES.

The Institute has now entered upon its seventeenth year, and the success of the treatment used and the rapidity of the cures effected have become part of the medical history of the Pacific Coast. In those early times the licenses of society developed an alarming increase in **SPECIAL and PRIVATE COMPLAINTS**, of a type unknown in the Eastern States and Europe, which the accepted remedies of the fountains of medical science would not reach. *Mercury only increased the disorder or dried it up, driving it back to the blood, for it to reappear in some new and more terrible form.*

MEDICAL

REMEDIES OF A PURELY VEGETABLE NATURE WERE DISCOVERED, AND THEIR EFFICIENCY BECAME SO MARKED THAT

CURES ARE GUARANTEED IN ALL CASES

OF SELF-ABUSE, SEMINAL WEAKNESS, NERVOUS DEBILITY, MERCURIAL COMPLAINTS, GONORRHEA, STRICTURE, GLEET, SYPHILIS, SECONDARY COMPLAINTS, DISEASES OF THE BLADDER AND KIDNEYS, ALL AFFECTIONS OF THE URINARY AND GENERATIVE ORGANS, ALL FEMALE IRREGULARITIES, ETC., ETC.

It does not matter from what the disease arose, or of how long standing or obstinate the complaint, the recovery is certain, and in as rapid manner as its nature will admit. **PRIVATE DISEASES** are the great destroyers of health. They insidiously attack the system, and undermine and destroy it; they drive the bloom from the cheek, the lustre from the eye, and the strength and vigor from the frame, giving to the world *puny and decrepit offspring*, and poison through successive generations the race of man. **FROM THEM ARISE CONSUMPTION, SCROFULA, HEREDITARY INSANITY, IDIOCY AND PARALYSIS.** *It is only by perfect and permanent cures that the afflicted can hope to secure his children against the certainty of an inheritance of the poison.*

SELF-ABUSE is the bane of youth and the horrible enemy to after-years, for it is a medical fact beyond question, that its practice even in the slightest degree entails upon the person the certainty of its after-effects, causing those terrible feelings of depression, timidity, loss of memory, confusion of mind, nocturnal emissions, indigestion, etc., marking the rapid waste of the vital principle of life in the urine, etc. It undermines and destroys the nervous structure, takes away the direct vitality of the different organs of the system, makes the victim totally unfit for the marriage relations, and leaves him to a miserable life of suffering, ending in a loathsome death. *To those who are suffering from any of the effects of that terrible weakness, the Doctor would give every assurance of secrecy, and assure them of rapid and perfect cures, without hindrance from business or the least possibility of suspicion.*

In all forms of **FEMALE IRREGULARITIES** and Weaknesses incidental to the Sex, no matter from what cause arising, the Doctor's reputation has been such as to need no more than a passing allusion. They can be treated at home with every certainty of the same success that would attend a visit to the

INSTITUTE.

Office for the sale of Dr. J. C. Young's celebrated Female Medicines.

PREVENTIVE POWDERS for Married Ladies, giving perfect control over the increase of family. Innocent and potent. Price \$10 per box, lasting from four to six months.
FEMALE LUNAR or FEMALE MONTHLY PILLS, for the removal of Suppressions, etc. A most valuable pill. Price \$5 per box.

TO THE AFFLICTED RESIDING IN THE INTERIOR.

My system of treatment is such that the same success marks its treatment when conducted by letter as by personal interview. Indeed, the greater number of my patients have never visited the Institute, but have had advice and remedies forwarded to them by mail or express. The patient is thus enabled to preserve the secret of his complaint, as *all letters are returned or destroyed, and the utmost secrecy preserved.* All that is required is to inclose that part of the advertisement mentioning the trouble of the writer, and full and complete directions, including the remedies, can be forwarded at once. All letters must be addressed to

BENJ. F. JOSSELYN, M.D.

Box 735.
